

## INSTALLING EXTENSION ON MAGENTO 2

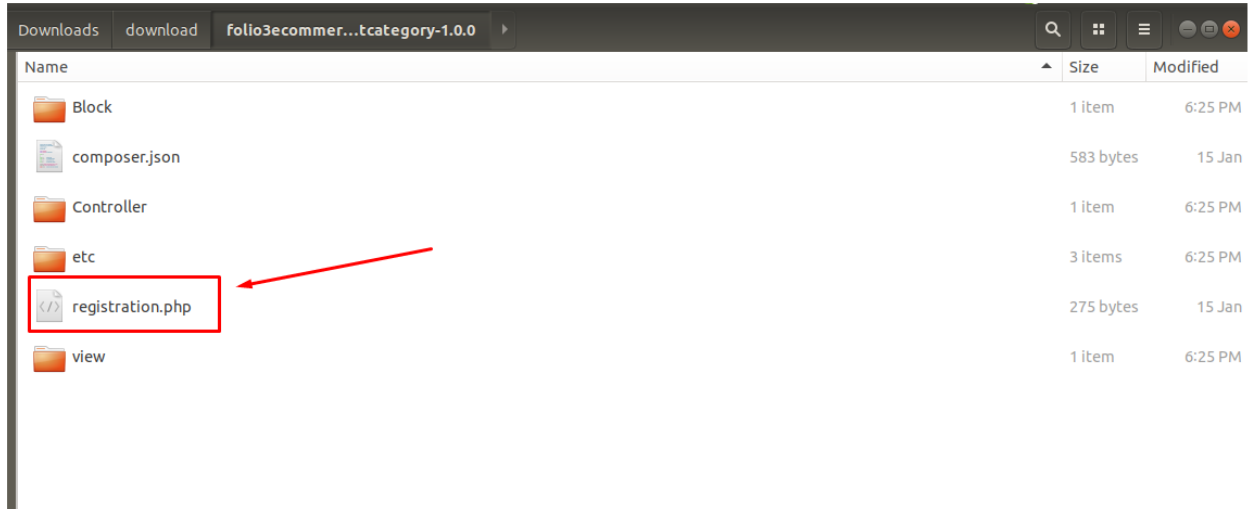

**Step #1:** Extract the downloaded extension package as you can see in the below screenshot.

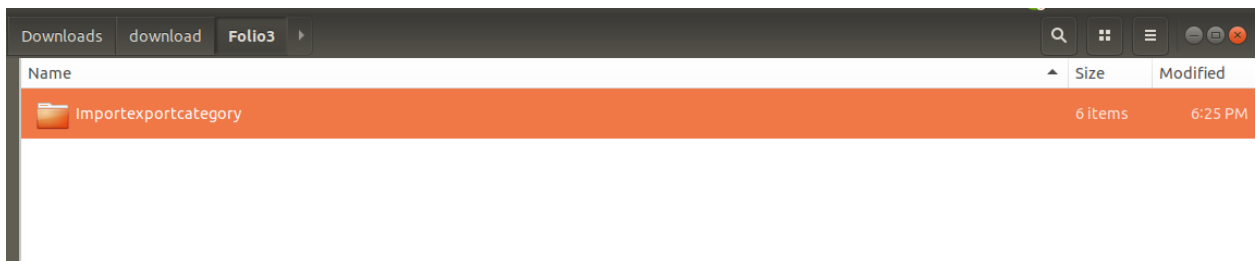

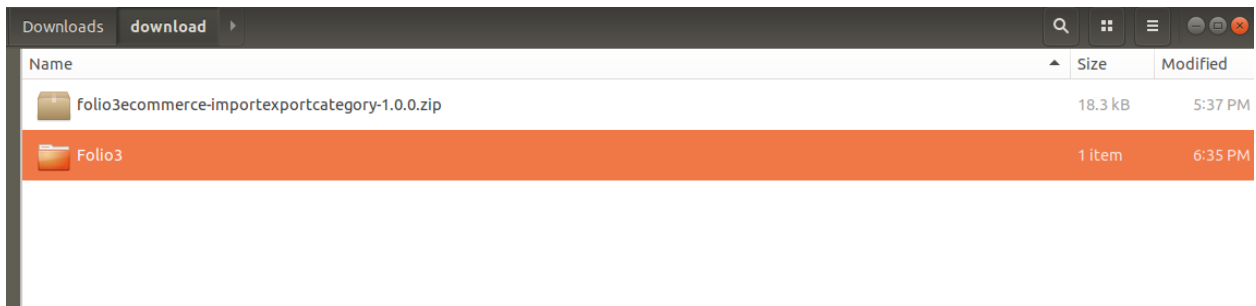

**Step #2:** Rename extracted package folder with the actual extension name. You can find the extension name in the *package* → *registration.php*

For Magento (1.x & 2.x) Design, Development & Customization please visit us at:  
<https://ecommerce.folio3.com/magento-development-company/>

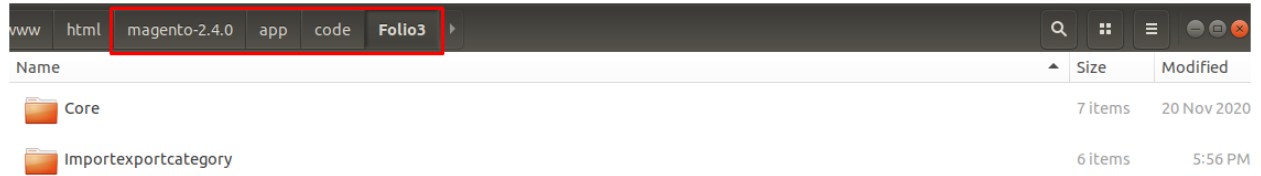

**Step #3:** Create a new folder with the name “Folio3” and move the extension into this folder

For Magento (1.x & 2.x) Design, Development & Customization please visit us at:  
<https://ecommerce.folio3.com/magento-development-company/>

**Step #4:** Connect to your server and upload files, folders to your server at M2 root directory */app/code/Folio3*
