10. You will receive an email telling you that the process has started

11. When the process finish, you will receive an email telling you that the process has finished

12. Go to the “Search” tab

13. You can choose how Fokus will appear. Either in "widget" mode or in "icon" mode.

recherche

widget [store view] Widget

position [store view] Droit

mobile [store view] Yes

14. For widget you can choose between “left” or “right” positions to display it on the wanted side on your website
15. For the "icon" mode you can manually select the position where you want it to appear on your forehead. Just click on "select identify" and then select the desired location. At the end click on "use" in the bottom left corner. **Caution:** This mode often requires CSS adjustment for fine tuning. You can choose whether to display Foqus as website element or a mobile friendly element.
16. You can choose whether to display Foqus as website element or a mobile friendly element.
17. Click on “Save config”
18. In the "cron" tab you can enable or disable cron synchronization. The crons allow to set up the scheduled automatic synchronization. **Caution:** It is impossible to guarantee the operation of the CRON. Often contact your developer to make sure it is set up.
