**ZAKEKE**

Interactive Product Designer

## Integration

**Magento 1**

# Magento 1

## Installation of the Zakeke module

The following instructions are about the Magento integration with Zakeke:

## Module configuration and integration of Zakeke

- In the Admin page, navigate to System. In the drop-down menu select Configuration and in the left navigation select Zakeke Interactive Product Designer, then General Settings (Note: if you don't see Zakeke Product Customization, delete your Magento cache files, which are located in /magento/var/cache. Delete all folders within the cache folder and reload the page).
- Setup Zakeke as follows:
  - Zakeke username: your Zakeke username. If you haven't created an account yet, please create one;
  - Zakeke password: your Zakeke password.

### Zakeke Interactive Product Designer

Save Config

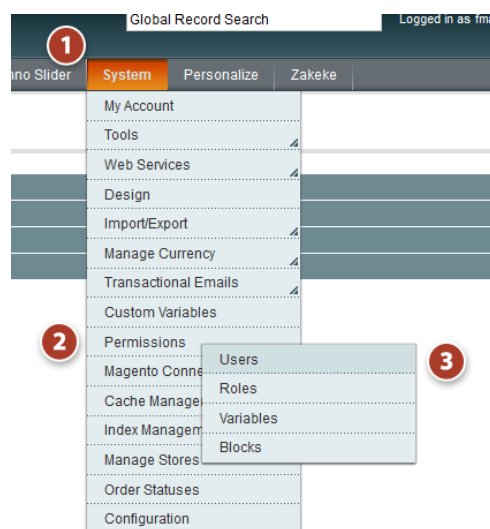

#### General Settings

These credentials will be used to allow the integration of Zakeke with your store. By entering your Zakeke credentials your store will be able to communicate with the Zakeke API.

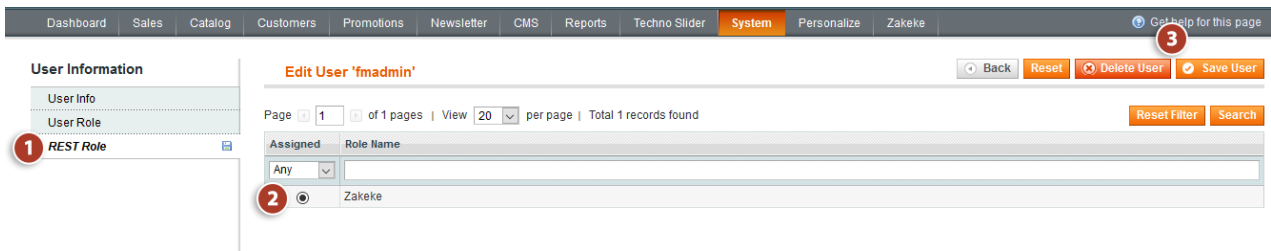

Zakeke username  [STORE VIEW]

Zakeke password  [STORE VIEW]

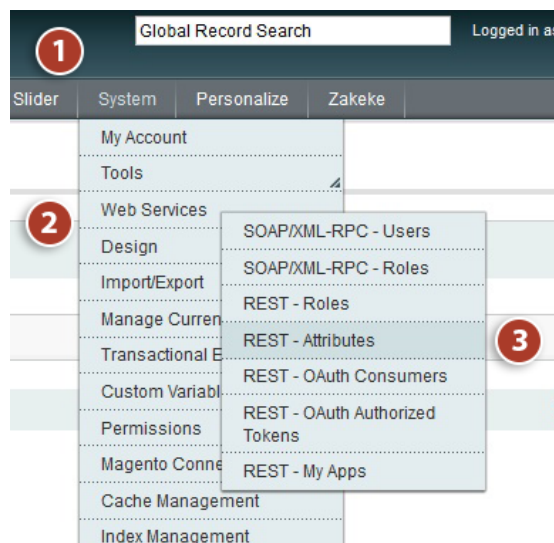

- Finish by clicking on Save Config.
- Navigate to the Users permission page by going to System > Permissions > Users.

- Select your user account.
- Click on REST role and check Zakeke radio button.

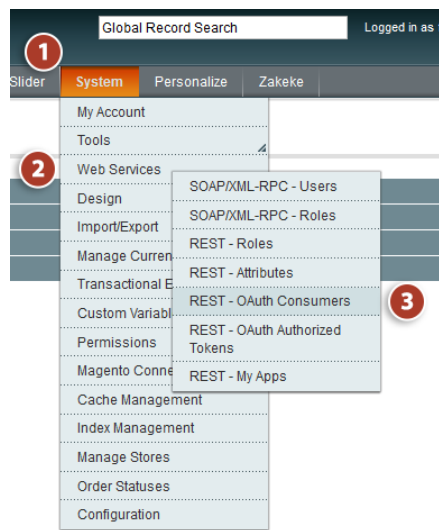

- Save your user settings.
- Navigate to REST - Attributes page by going to System > Web Services > REST - Attributes.

- Click on Admin from User Type. In the Resource Access drop-down menu select All.

- Click on Save.
- Navigate to REST - OAuth Consumers page by going to System > Web Services > REST - OAuth Consumers.

- Locate the line with Zakeke and click on it.
- Take note of Key and Secret values.

### Edit Consumer

---

Consumer Information

Name *	Zakeke
Key *	9410d8b3855697fde9d4e8c807105137
Secret *	d829d7a9fcbf5bf6bd1f3f444769fb59
Callback URL	https://www.zakeke.com/integration/magento1/success
Rejected Callback URL	https://www.zakeke.com/integration/magento1/rejected
Current Admin Password *	

- Access to your Zakeke account and navigate to: ADVANCED > E-Commerce.
- Select Magento 1.9.x .
- Setup the E-Commerce as below:
  - API Key: insert the OAuth consumer Key noted in step 7;
  - API Secret: insert the OAuth consumer Secret noted in step 7;
  - Store URL: insert your Magento Store Base URL (Note: make sure that at the end of URL there's / slash);
  - Administration path: insert your Magento Store administration path. (Note: make sure to only use the path like for example admin\_123, not the full URL)
- Click on Save.
- You'll be redirected to your Magento Store OAuth dialog. Click on Authorize in order to enable all functionalities of Zakeke and to finish the process of plugin installation.

## Authorize application

### Zakeke requests access to your account

After authorization application will have access to you account.
