
Installation instructions for Magento 2 (3D Product Configurator)

The following instructions are about the Magento integration with Zakeke:

- Place an order for the module through the [Magento Marketplace](#) .
- Open a terminal and run the following command in your Magento directory

```
composer require futurenext/zakekeconfigurator
```

Note: If you're using Composer for the first time, or if you see a Composer error, make sure that you've saved your [authentication keys](#).

- Set up the module by running the following commands.

```
php bin/magento setup:upgrade  
php bin/magento cache:flush  
php bin/magento cache:clean
```

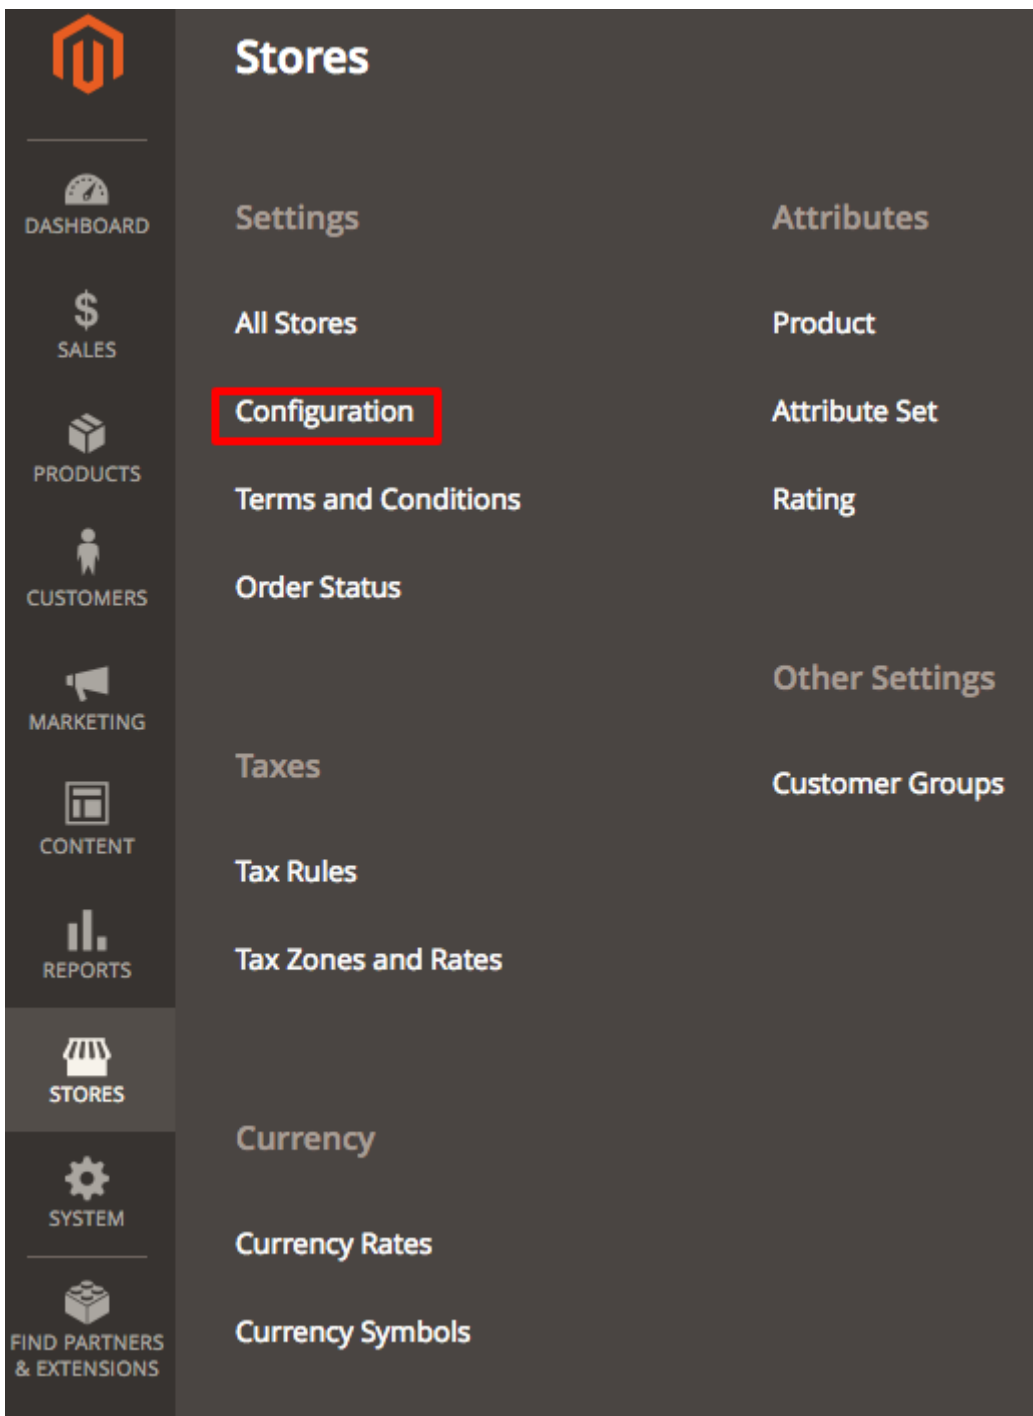

- If you run Magento in production mode, you must also compile and deploy the module's static files.

```
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy
```

- Finally ensure that you run the eventual command needed to restore the file permissions

Module configuration and integration of Zakeke

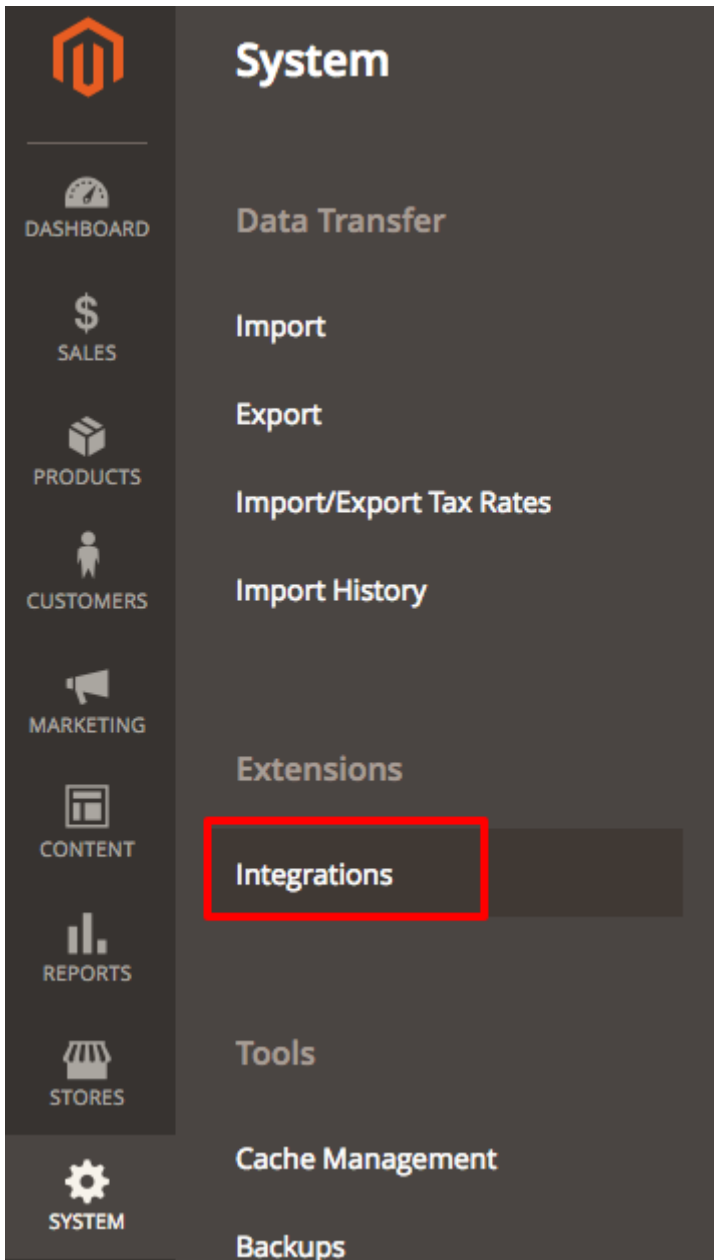

1. Go back into your Magento Store as Admin and navigate to *Stores*. In the drop-down menu, select *Configuration*.

1. Under *General* section, select *Zakeke - 3D Configurator* . (Note: if you don't see *Zakeke - 3D Configurator*, delete your Magento cache files, which are located in `/magento/var/cache` . Delete all folders within the cache folder and reload the page).
2. Setup Zakeke with your Zakeke API client id and secret key. [Please access to this page to get your Zakeke API keys.](#)
3. Finish by clicking on *"Save Config"* .
4. Disable your pop-up blocker prior to the connection of Magento 2 to your Zakeke account. Below there are few support pages on how to disable the pop-up blocker for these popular browsers:

- [Chrome](#)
- [Firefox](#)
- [Safari](#)

5. Navigate to the *Integrations* page by going to *System > Extensions > Integrations*.

1. Locate the line with *"Zakeke - 3D Configurator "* then click on *"Authorize"*.
 2. As soon as a prompt comes up, click on *"Allow"*.
-
