

Sunny Landing Pages

Installation Manual

Installing the extension

1. Download and extract the Gaboli_Slp package at your local machine.
2. Connect to your server using SFTP client and upload the app folder into your Magento 2 root folder.
3. To complete the installation process, run the following command lines:
php bin/magento setup:upgrade
php bin/magento setup:static-content:deploy
4. Goto System > Cache Management. And flush Magento cache.

Creating Rest API User

5. Goto Admin > Permissions > All Users
6. Click on 'Add New User' and create a new user with administrator role.
7. Remember the username and password. They will be used while integrating with sunnylandingpages application.

Integrating Magento 2 with sunnylandingpages

8. Sign up on www.sunnylandingpages.com if you're not already.
9. Login to www.sunnylandingpages.com and goto manage account > manage integration
10. Choose Magento platform and click on "Connect". Enter your Magento 2 website url along with username and password which were created earlier in step 7 and submit by clicking the connect button.
11. After successfully connected, you can start building your pages using sunny builder and publish them in your Magento website.
