

# Product Delivery Date

# Installation Guide:

- Extract the file in your magento app code directory.

*MagentoRootDirecotry/app/code/*

If there is no code directory in app then create it.

Make sure that directory structure as below:

*MagentoRootDirecotry/app/code/Gaggle/DeliveryDate*

- Open terminal and run below commands:
  - *php bin/magento setup:upgrade*
  - *php bin/magento cache:flush*

# User Guide:

## Admin Settings

- System Configuration
  - **Enable Delivery Date Calendar**  
*This field is for enabling or disabling delivery date functionality*
  - **Make Calendar Field Required**  
*If this field is set to "Yes" then on frontend customer will not be able to add item to cart without selecting Delivery Date.*

- **Days To Disable**  
*Days which will not be selectable by customer. Like if shipping is not allowed on sunday then admin can enter sunday in this field.*
- **Dates To Disable**  
*These dates will be disabled in date picker .  
Enter Dates's in format [m,d,y] e.g. [2,27,2014],[2,28,2014] etc..*
- **Minimum Date**  
*Set 0 for current date. e.g if this field is zero then customer will not be able to select date less than current date. If this field is -5 then customer will not able to select date less than (currentDate-5 days).*
- **Maximum Date**  
*If this field is set to 15 then customer will be able to select date not more than next 15 days*
- **Date Format**  
*Here admin can set date format E.g. dd/mm/yy*
- **Show Date Picker On Slected Products**  
*If this field is set to "Yes" then delivery date picker will be displayed only for the products which have "Show Delivery Datepicker" attribute set to "Yes"*
