

PRODUCT HOVER IMAGE

Overview of extension:

Product hover image extension adds a feature to change product image when customer hovers on it. It adds a great user experience on category products. Customers will get two views of the product without visiting the product view page.

Installation Guide:

- Extract the file in your magento app code directory.

MagentoRootDirecotry/app/code/

If there is no code directory in app then create it.

Make sure that directory structure as below:

MagentoRootDirecotry/app/code/Gaggle/Showhoverimage

- Open terminal and run below commands:

- `php bin/magento setup:upgrade`

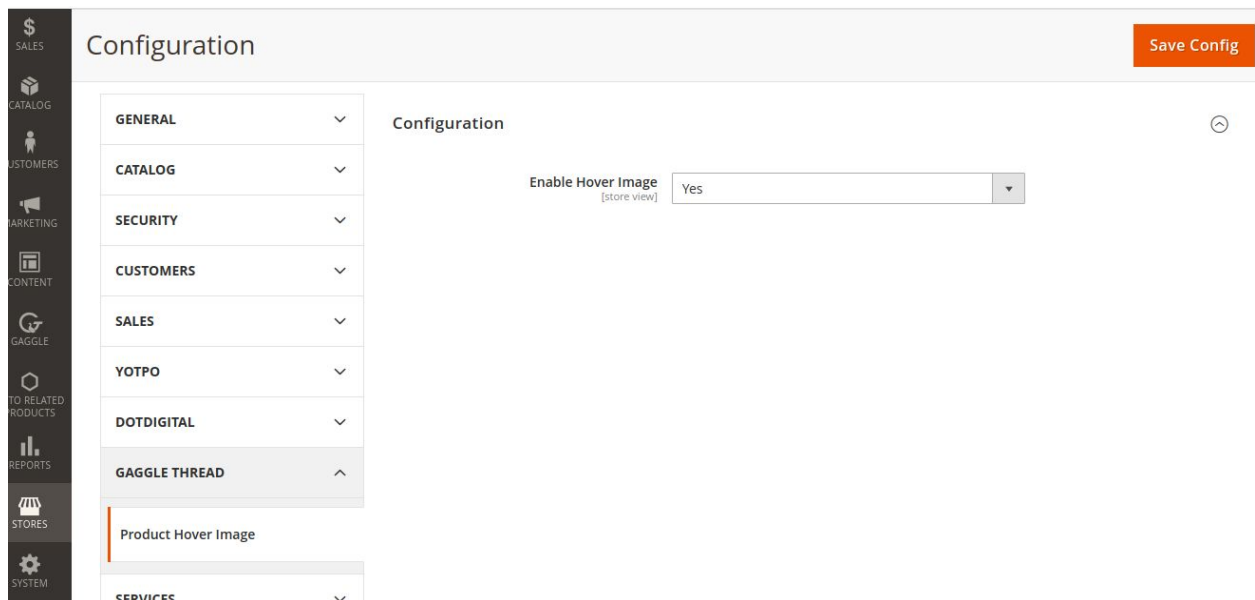

- `php bin/magento cache:flush`

User Guide:

1. Enable the extension

- a. Open Store -> Configurations -> Gaggle Thread -> Product Hover Image

- b. Choose “Yes” in “Enable Hover Image”

The screenshot shows the Magento 2 Configuration interface. On the left is a vertical sidebar with navigation icons and labels: SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, GAGGLE, TO RELATED PRODUCTS, REPORTS, STORES, and SYSTEM. The main content area is titled "Configuration" and has a "Save Config" button in the top right corner. A left-hand menu lists various configuration sections: GENERAL, CATALOG, SECURITY, CUSTOMERS, SALES, YOTPO, DOTDIGITAL, GAGGLE THREAD (which is expanded), and SERVICES. Under the "GAGGLE THREAD" section, the "Product Hover Image" configuration is visible. It includes the label "Enable Hover Image" with a "[store view]" link below it, and a dropdown menu currently set to "Yes".

2. Set Hover Image in Product (If no hover image is set in product it will automatically pick one image from product gallery)

- a. Open Product In admin section
- b. Open “Images and Videos” section
- c. Open image which you want to set as hover image and select “Hover Image” option.
