

BULK PRICE UPDATE

Installation Guide:

- Extract the file in your magento app code directory.
MagentoRootDirecotry/app/code/
If there is no code directory in app then create it.
Make sure that directory structure as below:
MagentoRootDirecotry/app/code/Gaggle/Priceupdate
- Open terminal and run below commands:
 - *php bin/magento setup:upgrade*
 - *php bin/magento cache:flush*

User Guide:

For making its functionality clear, let's take an example:

1. Suppose that you want to decrease all products price by 5%.

You just need to follow below steps:

- a. Open admin panel
- b. Click on "Gaggle" in left icons
- c. After that you will get a form :
 - i. Category
 - As you want to update all products price then Select "All" in this field.
if you want to update price of specific category then you can select that category.
 - ii. Price Type
 - As you want to decrease price in percentage then select "Percentage"
 - iii. Attribute
 - If you want to update only price

- attribute then select “Price Attribute”

iv. Price

- As you want to decrease price by 5 % then enter -5 in this field
 - a. “-“ Because you want to decrease price
 - b. “5” Five because you want to decrease by 5 %

Magento Admin ← Back Reset **Apply Price**

Price Update

Category Here you can select specific category. So price will be applied on selected category.

Price Type Here you can select Fixed or Percentage.
- Fixed for updating price in fixed amount
- Percentage for updating price in percentage
