

## Overview

This powerful extension removes unnecessary steps and makes the checkout process much simpler. It provides a nice checkout experience for the customers and greatly increases your website sales. The default standard checkout that comes with includes several “continue” actions required by the customer, this makes checkout very cumbersome and may lead to shopping cart abandonment. This extension has been implemented in thousands of web sites and our clients enjoyed the benefits with increased sales.

## Installation Steps for Quick One Page Checkout Extension

### Step 1. Extract the files inside Magento Installation Root

Magento\_App\_Root folder is same as your Magento Installation directory

### Step 2. Folder structure for default theme

Magento\_App\_Root/app/design/frontend/base/<default>/template Where <default> folder is based on default theme. Please copy the files under template folder into your specific theme folder

### Step 3. Skin folder

Copy the js folder into your specific theme folder

Magento\_App\_Root\skin\frontend\default\<default>\js

Copy the css folder under the theme folder \skin\frontend\default\<default>\css\

Where <default> folder is based on default theme

### Step 4. Perform the changes in checkout.xml file

Go to location app/design/frontend/default<default>/layout/checkout.xml in your server. Please take a back of existing checkout.xml file.

If you are using theme in your website, go to “layout” folder under your template.

Example: /app/design/frontend/default/modern/layout/checkout.xml

In checkout.xml file Search checkout\_onepage\_index please comment line `<remove name="left"/>` as described below

```
*C:\Documents and Settings\kamtech-11\Local Settings\Temp\lz3temp-1\checkout.xml - Notepad++
File Edit Search View Encoding Language Settings Macro Run Window ?
checkout.xml
256 </checkout_multishipping_success>
257
258 <!--
259 One page checkout main layout
260 -->
261
262 <checkout_onepage_index>
263 <!-- Mage_Checkout -->
264 <!--<remove name="left"/>-->
265
266
267 <reference name="root">
268 <action method="setTemplate"><template>page/2columns-right.phtml</template></action>
269 </reference>
270 <reference name="right">
271 <action method="unsetChildren"></action>
272
273 <block type="checkout/onepage_progress" name="checkout.progress" before="--" template="checkout/onepage/pr
274 </reference>
275 <reference name="content">
276 <block type="checkout/onepage" name="checkout.onepage" template="checkout/onepage.phtml">
277 <block type="checkout/onepage_login" name="checkout.onepage.login" as="login" template="checkout/onep
278 <block type="checkout/onepage_billing" name="checkout.onepage.billing" as="billing" template="checkou
279 <block type="checkout/onepage_shipping" name="checkout.onepage.shipping" as="shipping" template="chec
280 <block type="checkout/onepage_shipping_method" name="checkout.onepage.shipping_method" as="shipping_m
281 <block type="checkout/onepage_shipping_method_available" name="checkout.onepage.shipping_method.a
282 <block type="checkout/onepage_shipping_method_additional" name="checkout.onepage.shipping_method.
283 </block>
284 <block type="checkout/onepage_payment" name="checkout.onepage.payment" as="payment" template="checkou
285 <block type="checkout/onepage_payment_methods" name="checkout.payment.methods" as="methods" templ
286 <action method="setMethodFormTemplate"><method>purchaseorder</method><template>payment/form/p
287 </block>
288 </block>
```

## Step 5. Refresh Magento cache

Admin Panel – System – Cache Management – Select all Check boxes – Flush Magento Cache

## Cache Storage Management

Flush Ma

Select All | Unselect All | Select Visible | Unselect Visible | 8 items selected

Cache Type	Description	Associated T
<input checked="" type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG

<input checked="" type="checkbox"/> Web Services Configuration	Web Services definition files (api.xml).	CONFIG_API
<input checked="" type="checkbox"/> Web Services Configuration	Web Services definition files (api2.xml).	CONFIG_API2

### How it Works?

This extension was developed to improve checkout behavior of magento's default one page checkout. The goal of this extension is to make the checkout steps less cumbersome for the users and have the checkout process much quicker.

In Quick One Page Checkout each and every step depends on its previous step submission details as like the normal one page checkout. For example, the shipping method will populate based on the shipping information

The basic screenshots of the checkout steps without any information is listed below.

## How to Uninstall Quick Onepage checkout?

If you will have any issues with the extension, please disable the extension the following way:

1. Go to app/etc/modules/Kamtech\_Checkqoc.xml find this line of code:

```
<active>true</active>
```

and change it to:

```
<active>>false</active>
```

2. Rename onepage.php file in the following path app/code/local/Mage/Checkout/Block/

3. Go to location app/design/frontend/default<default>/layout/checkout.xml in your server. Please take a back of existing checkout.xml file.

If you are using theme in your website, go to "layout" folder under your template.

Example: /app/design/frontend/default/modern/layout/checkout.xml

In checkout.xml file Search checkout\_onepage\_index please uncomment line <remove name="left"/>

```
296 <!--
297 One page checkout main layout
298 -->
299
300 <checkout_onepage_index translate="label">
301     <label>One Page Checkout</label>
302     <!-- Mage_Checkout -->
303
304     <remove name="left" />
