

GoMage Feed Pro for Magento 2

Installation/Uninstallation/Activation Guide

Installation

When your order is complete and you have received the order confirmation email, you may [login to your GoMage account](#) and download the FeedPro extension package under **Downloadable Products** section.

Step 1. Upload Files

If you purchase the extension via Magento Marketplace, you will receive a package containing two archives – one with the extension files and one with GoMage Core which is in fact the Activation module.

Unzip the GoMage Core package **first** and upload it into **/app/code/GoMage** folder in the root directory of your Magento 2 project. After that unzip and upload the package with the extension files to the same folder. You may use either FTP or SSH connection to do that. If there is no /code or /GoMage folder on the server yet, you should create those folders prior to uploading the extension.

Step 2. Install the Extension

Access your server by SSH, go to Magento 2 root folder and run the following command:

```
php bin/magento setup:upgrade
```

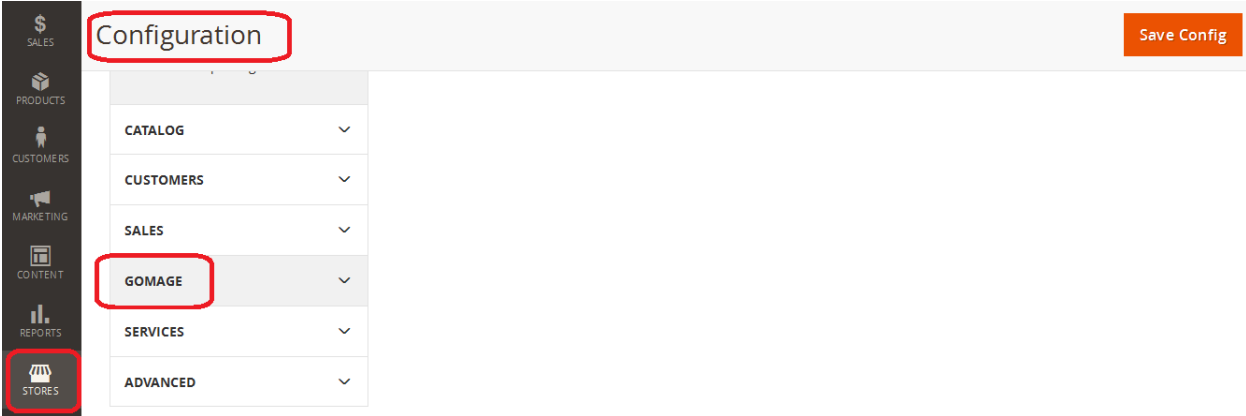

Step 3. Clear cache

Go to **System** → **Cache Management** and clear the store cache.

Step 4. Use Extension

Go to **Stores** → **Configuration**. You will see a new tab named **GOMAGE** in the left column.

Screenshot: Stores Configuration

At this point you need to activate the extension.

Activation 2.0

In order to activate the extension, go to **Stores -> Configuration -> GoMage -> Activation 2.0** section in your admin panel of Magento 2. The list of all installed GoMage extensions is displayed on this page.

The screenshot shows the Magento 2 Configuration page for GoMage Activation v.2.0.0. The left sidebar contains navigation menus for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Third Parties & Extensions. The main content area is titled 'GoMage Activation v.2.0.0' and features an 'Activate Extensions' button. Below this, there is a 'Show available domains' button and a list of installed GoMage extensions with their activation status:

- GoMage_Ads v0.0.1: Module is not Activated
- GoMage_GroupedConfiguration v0.0.1: Module is not Activated
- GoMage_ProCart v0.0.1: Module is not Activated
- GoMage_ProductDesigner v0.0.1: Module is Activated, Available domains: 0
- GoMage_ProductTabs v0.0.1: Module is not Activated
- GoMage_Sales v0.0.1: Module is not Activated
- GoMage_SeoBootser v0.0.1: Module is not Activated
- GoMage_Slider v0.0.1: Module is Activated, Available domains: 1
- GoMage_Feed v1.1.1: Module is not Activated
- GoMage_Navigation v2.0.0: Module is not Activated

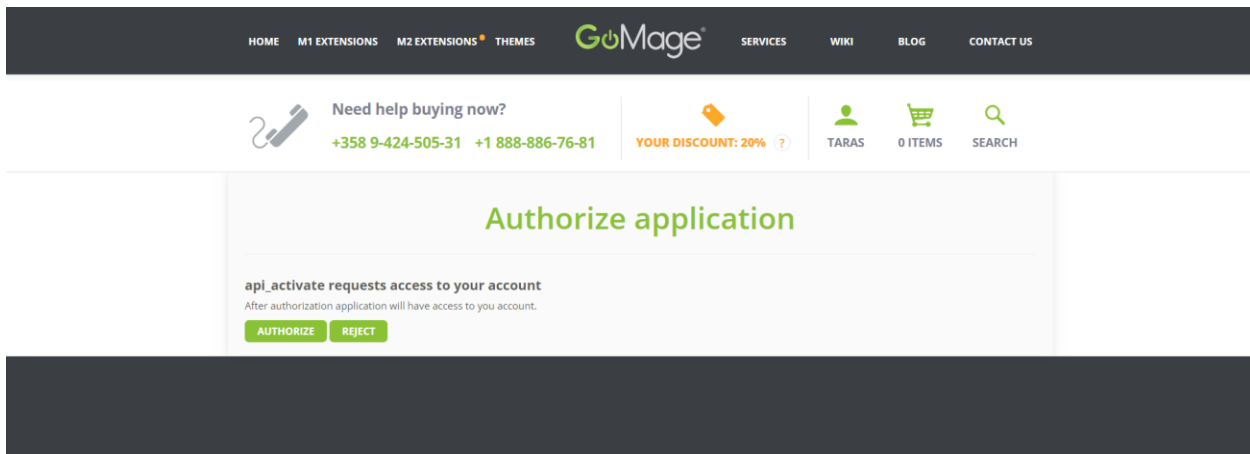

A warning message is displayed: 'Incorrect license key. Your license is blocked. Please contact support@gomage.com'. The footer of the page includes the copyright notice 'Copyright © 2018 Magento Commerce Inc. All rights reserved.' and the version information 'Magento ver. 2.2.5' with a 'Report an Issue' link.

Step 1. Click “**Activate Extensions**” button. You are redirected to the authentication page on <https://www.gomage.com> website where you need to enter the login and password for your GoMage account in order to verify your identity.

The screenshot shows the GoMage website's authentication page. The top navigation bar includes links for HOME, M1 EXTENSIONS, M2 EXTENSIONS, THEMES, GoMage, SERVICES, WIKI, BLOG, and CONTACT US. Below the navigation bar, there is a contact information section with a phone number '+358 9-424-505-31 +1 888-886-76-81' and a 'Need help buying now?' button. The main content area is a login form titled 'LOG IN AS A CUSTOMER' with the following fields and buttons:

- Log in to use **api_activate**
- Email Address:
- Password:
- Buttons: REJECT, LOGIN

Click “**Authorize**” button in order to allow the application access to your account, verification of your data and activation of your GoMage extensions.

Step 2. After successful authentication you are redirected back to the extension activation page in your admin panel of Magento 2, and all GoMage extensions installed on your site become activated, unless some of your licenses are blocked or there are any other factors hindering the activation process. The activation status of extensions changes depending on whether or not each extension has been activated, and the information about the quantity of domains available for activation on every license is displayed.

Step 3. Expand the list of websites/stores existing in your Magento and choose those of them for which the extension needs to be activated. Remember that your license must be valid for the necessary number of [additional domains](#) if you wish to activate the extension for more than one site within the same Magento. If you try to activate the extension for more sites than your license allows, you will get a corresponding error message on the Activation page.

Module is Activated

Available domains 1

GoMage_Slider v0.0.1

Module is not Activated

GoMage_Feed v1.1.0

Module is not Activated

GoMage_Navigation v2.0.0

Main Website

NewSiteFirst

NewSite_Second

ThirdStores

SiteFourth

The “**Available domains**” field shows the number of domains allowed for every extension license. If the license is valid for 10 domains and only 2 websites have been selected for extension activation, the number of remaining available domains is 8, which means that you can activate the extension for 8 more websites within the same installation of Magento 2.

The “**Show available domains**” button at the top of this section can be used to refresh the information about all extension licenses and the number of websites allowed for activation on every license.

Step 4. If your website uses https, make sure that “Use Secure URLs on Storefront” option is set to “Yes” at **Stores -> Configuration -> General -> Web -> Base URLs (secure)** in your Magento 2 admin panel.

Base URLs (Secure)

Any of the fields allow fully qualified URLs that end with '/' (slash) e.g. https://example.com/magento/

Secure Base URL [store view] Specify URL or {{base_url}}, or {{unsecure_base_url}} placeholder.

Secure Base Link URL [store view] Use system value May start with {{secure_base_url}} or {{unsecure_base_url}} placeholder.

Secure Base URL for Static View Files [store view] May be empty or start with {{secure_base_url}}, or {{unsecure_base_url}} placeholder.

Secure Base URL for User Media Files [store view] May be empty or start with {{secure_base_url}}, or {{unsecure_base_url}} placeholder.

Use Secure URLs on Storefront [store view] Use system value Enter https protocol to use Secure URLs on Storefront.

Use Secure URLs in Admin [global] Use system value Enter https protocol to use Secure URLs in Admin.

Enable HTTP Strict Transport Security (HSTS) [store view] See HTTP Strict Transport Security page for details.

Upgrade Insecure Requests [store view] See Upgrade Insecure Requests page for details.

Offloader header [global] Use system value

Uninstallation

Step 1. Deactivate the extension

1.1. If you have SSH access to the server, run the following command:

```
php bin/magento module:disable GoMage_Feed
```

1.2. If you do not have SSH access, login to the admin panel, go to **Stores > Configuration > Advanced > Advanced**, choose **GoMage_Feed** and set the value to **Disable**. Then save the changes.

The extension is now deactivated.

Step 2. Delete Folder

BE VERY CAREFUL WHEN DELETING FILES OR FOLDERS, YOU MAY ACCIDENTALLY DELETE THE WRONG FILES OR FOLDERS.

Using an FTP client delete the following folder:

```
<your Magento® install dir>/app/code/GoMage/Feed
```

Step 3. Edit the Config file

Find your <your Magento® install dir>/app/etc/config.php file and open it in a text editor.

Find the following line: 'GoMage_Feed' => 1 and delete it.

Step 4. Delete Data from the Database

Run the following script on your server (MySQL) to delete data from the database:

```
delete from core_config_data where path like 'gomage_feed/%';
drop table gomage_feed;
drop table gomage_feed_attribute;
delete from setup_module where module = 'GoMage_Feed';
```

Step 5. Clear Cache

Go to **System** → **Cache Management** and clear the store cache.
