

## Hootsuite - Magento Plugin Installation Guide

The Hootsuite - Magento Product Catalog Synchronization with the Facebook plugin requires the following:

- PHP version 7.2 or higher.
- Magento version 2.3.x.

We recommend using a Dependency Manager tool like [Composer](#) for installing the required library on your magento platform.

To Install, Run the following command from your project root:

```
composer require hootsuite/feed-export-magento2-extension
```

Next, Run the setup upgrade command from your magento root directory:

```
php bin/magento setup:upgrade --keep-generated
```

Finally, Run setup di compile (only in **Production** mode):

```
php bin/magento setup:di:compile
```
