

HumCommerce Extension Installation Guide

To install HumCommerce extension, follow these simple steps:

Step 1:Download the HumCommerce extension from Magento marketplace.

Step 2:Upload the “HumCommerce.zip” file from your computer to the server where Magento 2 is installed or setup.

To upload the HumCommerce Magento 2 extension, open the terminal and type in the following commands.

```
scp file_path server_user_name@ip of server:server_destination_path
```

For example -

```
scp your_downloaded_path/HumCommerce.zip  
mike@112.110.9.1:/your_Magento_root_directory/app/code
```

After this process completes, the terminal will display “**100%**”.

Note:

1. “**your_downloaded_path**” will depend on the path where you have downloaded the “HumCommerce.zip” file.
2. “**mike**” is the username in this example.
3. “**your_Magento_root_directory**” will depend upon your Magento 2 setup on the server.

Step 3: Now login to your server by typing the following command in your terminal.

```
ssh user_name@ip
```

For example - ssh mike@112.110.9.1

Step 4: Go to your Magento 2 root directory by using the command “cd”.

```
cd directory_name
```

For example - cd /home/mike/public_html

Now, you are in Magento 2 root directory.

Step 5: Go to “app > code directory” by typing the following command.

```
cd app/code/  
mkdir Humcommerce  
cd Humcommerce
```

Now, you are in code directory of Magento 2

Step 6: Unzip the uploaded file by typing the following command.

```
unzip upoaded_file_name
```

For example - unzip HumCommerce.zip

The file has been extracted into code directory of Magento 2.

Step 7: Go to Magento 2 root directory again by typing “cd ..” twice.

```
cd ..  
cd ..
```

Step 8: Type the following command in your terminal to enable the extension.

```
php bin/magento module:enable module_name
```

```
For example - php bin/magento module:enable Humcommerce_HumCommerce
```

After this process completes, you'll get the following message:

**“The following modules have been enabled:
- Humcommerce_HumCommerce”**

HumCommerce extension has been successfully installed and enabled.

Now you can configure the HumCommerce Magento 2 extension from your admin panel.
