

# HYPERSPACE EBOOK

## INSTALLATION GUIDE

### Composer automatic installation:

```
php composer.phar require hyperspace/ebook && php bin/magento setup:upgrade
```

### Manual installation from package:

- 1) Create folder vendor/hyperspace/ebook and extract package zip contents
- 2) Add object line on main Magento file "composer.json":  
{ "type": "path", "url": "vendor/hyperspace/ebook" }  
in "repositories" array section (f.e. below main repository)
- 3) Run two console command to install extension from local path:  
php composer.phar --ignore-platform-reqs require hyperspace/ebook:2.3.4  
php bin/magento setup:upgrade
