

ICT EXTENSIONS INSTALLATION GUIDE FOR MAGENTO 2

SEP2017

ICT EXTENSION : INSTALLATION GUIDE

1. Login into the backend, go to System — Cache Management and enable all types of cache.

2. Connect to your website source folder with FTP/SFTP/SSH and upload all the extension files and folders to the specific folder as mentioned below to your Magento installation:

Create Folder So the Path Says: `app\code\Ict\Customerprice`

Please use the “Merge” upload mode. Do not replace the whole folders, but merge them. This way your FTP/SFTP client will only add new files. This mode is used by default by most of FTP/SFTP client’s software. For MacOS it’s recommended to use Transmit. If you install several extensions from ICT, they will contain same files from the Base package — feel free to overwrite them, these are system files used by all our extensions.

3. Run following command:

```
php bin/magento setup:upgrade
```

4. Go to System — Cache Management page under Magento backend and click “Flush Cache Storage” button. After this action, the extension is installed.
