Show per page

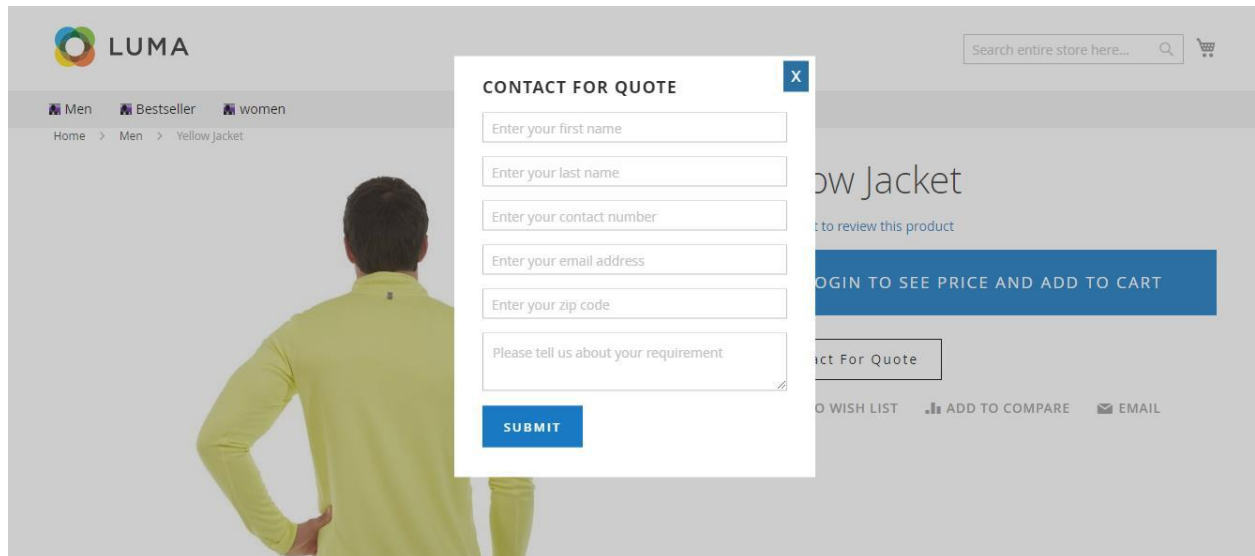

“Display Price After Login” once installed and configured from backend, you will see that pricing will disappear from Front-end products and user will see that "Login to See the Prices and Add Product to Car

PRODUCT DETAIL PAGE

Once you go on the Product Detail Page, you will observe that if you have enabled the “Contact Quote Button” to Yes, a button will appear on Detail Page, so if the user doesn’t wish to log in and directly get the quote.

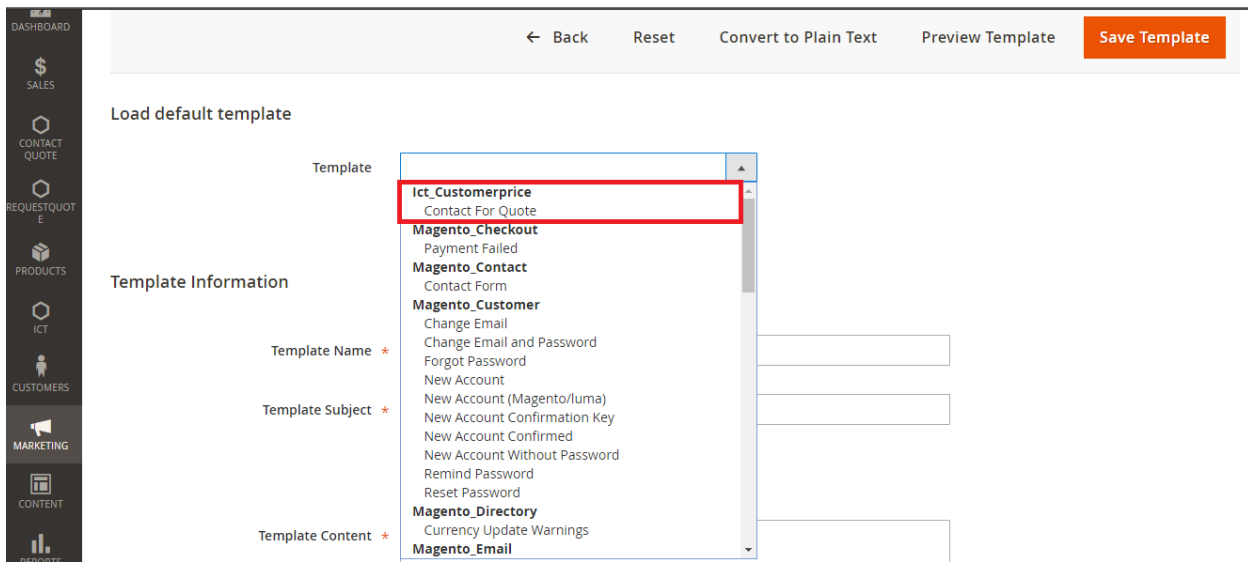

CONTACT FOR QUOTE

If the user clicks on Contact for Quote, a popup will appear asking for some details.

If the user fills and submits the form, an Email will be sent to Admin.

ADD OR EDIT EMAIL TEMPLATE

We also have the email template configured, so just select the template which is under “Ict_Customerprice” and you can edit the template as per your choice.

MANAGE CONTACT QUOTE

Once the Contact for Quote form is filled, its respective entry can be seen in the admin panel which can be managed and you can contact the users via Email or Phone.

Conclusion

“DISPLAY PRICE AFTER LOGIN” extension forces customer to log in to see the product price. The customer cannot see the product price and add to cart button if not logged in. A Contact for Quote form will be available on product detail page. The customer can request a quote from here without login and admin will get an email of submitted form details.
