Mass Prices Updater location

After installing you can find extension working space under «**Products**» > «**Mass Prices Updater**» menu item.

The screenshot shows the Magento 2 admin interface. On the left, the 'Catalog' sidebar is open, highlighting 'Mass Prices Updater'. The main content area displays a product grid with the following columns: SKU, Categories, Price, Special Price, Cost, and MSRP. The grid shows three rows of products, each with a 'From' and 'To' price field and a 'USD' currency dropdown. The 'Price' column contains the value '149.00' for all three rows, and the 'Cost' column contains '99.00' for all three rows. The 'Categories' column lists 'Women / Bottoms / Shorts' and 'Erin Recommends' for each row.

SKU	Categories	Price	Special Price	Cost	MSRP
WSH12-32-Red	Women / Bottoms / Shorts Erin Recommends	149.00		99.00	
WSH12-32-Purple	Women / Bottoms / Shorts Erin Recommends	149.00		99.00	
WSH12-32-Green	Women / Bottoms / Shorts Erin Recommends	149.00		99.00	

How to use extension

Extension inherited all general mass actions work flow of Magento 2. You have to select checkboxes in first column of the products grid for products which you would like to proceed, then select required mass action and click «**Submit**» button.

Mass Prices Updater has 7 predefined custom mass products actions which helps you to speed up management of relations between products in your product catalog:

- Save Changes
- Update: Price
- Update: Cost
- Update: Special Price
- Update: Price based on Cost
- Update: Special Price based on Cost
- Update: Special Price based on Price

Extension has 4 editable columns right in the products grid:

- Price
- Cost
- Special Price
- MSRP

«Save Changes» mass action

Those 4 columns allow you to specify «Price», «Cost», «Special Price» and «MSRP» values for each particular product in the product grid. To do it you have to:

1. Specify new values in «Price», «Cost», «Special Price» and «MSRP» editable cells for required products, which shown as rows in products grid
2. Select checkboxes in first column for products, which should be updated
3. Select «Save Changes» mass action from mass actions dropdown
4. Click «Submit». So extension will take all pricing data from product grid and apply for all selected products.

The screenshot shows the 'Mass Prices Updater' interface. At the top, there's a search bar and a 'Scope' dropdown set to 'All Store Views'. Below that, there's a search filter section with 'Search terms', 'Search', and 'Reset Filter' buttons. A 'Submit' button is visible, along with a status '2046 records found (2 selected)'. The main part of the interface is a table with columns: 'Type', 'SKU', 'Categories', 'Price', 'Special Price', and 'Cost'. The 'Price' column has 'From', 'To', and 'USD' sub-columns. The 'Special Price' column has 'From', 'To', and 'USD' sub-columns. The 'Cost' column has a 'From' sub-column. Three rows are visible, each with a checkbox in the first column. The second and third rows are highlighted in light blue, indicating they are selected. A dropdown menu is open over the table, listing various mass actions: 'Save Changes', 'Update: Price', 'Update: Cost', 'Update: Special Price', 'Update: Price based on Cost', 'Update: Special Price based on Cost', and 'Update: Special Price based on Price'. 'Save Changes' is selected in the dropdown.

Type	SKU	Categories	Price	Special Price	Cost
Simple Product	WSH12-32-Red	Women / Bottoms / Shorts	149.00		99.00
Simple Product	WSH12-32-Purple	Women / Bottoms / Shorts	149.00		99.00
Simple Product	WSH12-32-Green	Women / Bottoms / Shorts	149.00		99.00

«Save Changes» mass action is good when you need specify different values of «Price», «Special Price» and/or «Cost» columns for each particular product for list of products.

If you need to apply same values of «Price», «Cost» or «Special Price» to list of products, you have to use «Update: Price», «Update: Special Price» or «Update: Cost» mass products actions.

«Update: Price», «Update: Cost», «Update: Special Price» mass actions

Depends on one of those selected mass action - it allows you to apply same «Price», «Cost» or «Special Price» value to selected list of products from the products grid. To use this mass products actions you have to:

1. Select checkboxes from the products grid for products to which you would like to apply new «Price», «Cost» or «Special Price» value
2. Select appropriate mass products action from mass products actions drop down
3. Specify new «Price», «Cost» or «Special Price» value in «By:» input field
4. Click «Submit»

The screenshot shows the 'Mass Prices Updater' interface. At the top, there's a search bar and a user profile 'admin'. Below that, the 'Scope' is set to 'All Store Views'. A search bar contains 'Search terms' and a 'Search' button. Below the search bar, the 'Update:' dropdown is set to 'Update: Cost', and the 'By:' field contains '99'. There are 'Submit' and 'Reset Filter' buttons. The table below has columns: ID, Image, Name, Type, SKU, Categories, Price, Special Price, and Cost. The table shows three rows of products. The first row (ID 2046) is a 'Configurable Product' and is not selected. The second row (ID 2045) is a 'Simple Product' named 'Erika Running Short-32-Red' with a price of 149.00 and a cost of 99.00; it is selected with a checked checkbox. The third row (ID 2044) is a 'Simple Product' named 'Erika Running Short-32-Purple' with a price of 149.00 and a cost of 99.00; it is also selected with a checked checkbox. The 'Price' and 'Special Price' columns have 'From' and 'To' input fields and a currency dropdown set to 'USD'.

Update: «Price based on Cost», «Special Price based on Cost», «Special Price based on Price»

Depends on one of those selected mass action – it allows you to update **Price** or **Special Price** attribute for selected list of products based on **Cost** or **Price** attributes of those selected products. For example, if you choose «Update: Special Price based on Price» and put -20% as value – extension will

take value of **Price** product attribute and deduct 20% from this value and will save it into **Special Price** product attribute. To use this mass products action you have to:

1. Select checkboxes from the products grid for products to which you would like to appropriate mass action
2. Select appropriate mass products action from mass products actions drop down
3. Specify value or rule for update in «By:» input field
4. Click «Submit»

The screenshot shows the 'Mass Prices Updater' interface. At the top, there's a search bar and a 'Scope' dropdown set to 'All Store Views'. Below that, a search filter is active with 'Update: Special Price based on Price' and 'By: -20%'. The main table has columns: ID, Image, Name, Type, SKU, Categories, Price, Special Price, and Cost. Two rows are highlighted in light blue, indicating they are selected. The first highlighted row is 'Erika Running Short-32-Red' (SKU: WSH12-32-Red) with a price of 149.00 and a cost of 99.00. The second highlighted row is 'Erika Running Short-32-Purple' (SKU: WSH12-32-Purple) with a price of 149.00 and a cost of 99.00. The interface also shows pagination (1 of 103) and a 'Submit' button.

Absolute and Relative Values

Extension allow you to use Absolute and Relative values for «**Price**», «**Cost**» and «**Special Price**» products grid column and for extension mass products action.

Absolute values – it is standard numeric values you use in default Magento 2 product edit mode to describe exact price value for particular product.

Relative values – it is values -, + and * special symbols followed by digits and which can be ends with % special symbol. If extension will identify such value it will load product value stored in database and will *subtract*, *add* or *multiply* this value specified in product grid for this particular product. For

example, right now you have price \$ 45.00 for selected products and you want to start Sale campaign with 20% discount, so you can choose «**Update: Special Price based on Price**» mass action and specify -20% in «**By:**» input field. By clicking **Submit** button extension will save \$ 36.00 value as final result into «**Special Price**» attribute.
