

ADMIN SMS NOTIFIER USER GUIDE

Once the extension is installed, please make sure to refresh Magento's cache.

To configure *Admin SMS Notifier*, go to **Stores > Configuration > IMIHOV MODULES > Admin SMS Notifier**

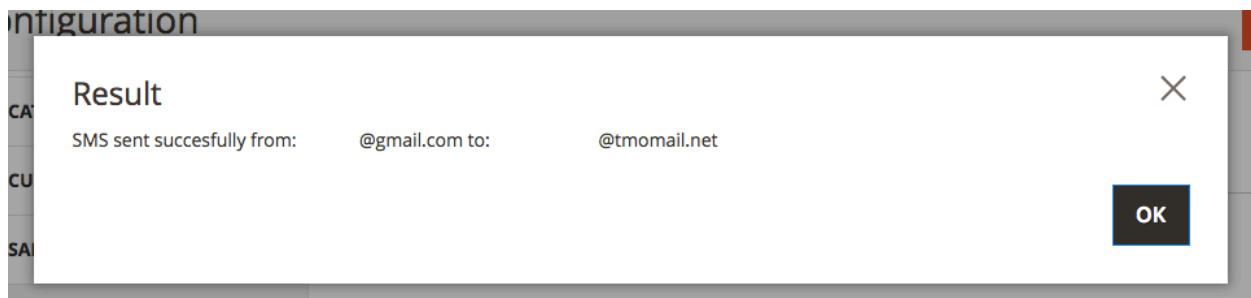

The screenshot shows the configuration interface for the 'Admin SMS Notifier' extension. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Products, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area is titled 'Store View: Default Config' and includes a 'Save Config' button. The configuration is organized into sections: 'Status' (with 'Enable SMS Notifier' set to 'Yes'), 'General settings' (with 'Sender' set to 'General Contact', 'Select Cell Phone Carrier' set to 'Please Select', and a 'Phone Number' field), and 'Order Created Event'. A 'Send General Settings Test SMS' button is located below the 'Phone Number' field.

- By default the extension is disabled, to enable it, please set the option *Enable SMS Notifier* to **Yes** to see the rest of the options.
- The extension has a few sections available for configuration outlined below
 - **Status** – Section for the Status of the extension
 - **Enable SMS Notifier** – Used to enable or disable the extension (Yes or No)
 - **General settings** – This section has the general settings for the extension
 - **Sender** – The sender of the message, it uses the store emails you have set under **Stores > Configuration > General > Store Email Addresses**
 - **Select Cell Phone Carrier** – A list of cell phone carriers
 - **Custom Carrier Address** – the option appears only if *Custom* is selected under *Select Cell Phone Carrier*. The option is only used if your carrier is not in the list above.
 - **Phone Number** – The phone number where the message will be sent
 - **Test Button** – A button used for testing if messages are being sent. Please make sure you save any changes to the settings before testing.
 - **Order Created Event** – This section contains the settings in the event that a new order is created
 - **Enable Notification** – Used to enable or disable the notification for this event

- **Use General Settings** – (Yes or No) If set to *Yes*, the settings from the *General Settings* section are applied to this event. This includes the sender, the phone number, and phone carrier. If set to *No*, the settings below will appear and you will be able to set separate sender, phone number, and carrier for this event
 - **Sender** – same as above
 - **Select Cell Phone Carrier** – same as above
 - **Custom Carrier Address** – same as above
 - Phone Number – same as above
- **Message Subject** – The subject of the message that would be send for this event
- **Message Content** – The message content that would be send for this event.
- **Test Button** – A button used for testing if the message for the event is being send
- **Customer Created Event** – This section contains the settings in the event that a new customer is created
 - Same setting as *Order Created Event*
- **New Review Event** – This section contains the settings in the event that a new product review has been posted
- **Newsletter Subscription Event** – This section contains the settings in the event that a customer subscribed from the newsletter
- **Newsletter Unsubscription Event** – This section contains the settings in the event that a customer unsubscribed from the newsletter
- **Coupon Applied Event** – This section contains the settings in the event that a coupon was used when a new order was places

To Test if you are receiving SMS messages to the specified cell phone number, please enter the cell phone number and it's corresponding carrier, save the settings by pressing the *Save Config* button, and then press the corresponding test button at the bottom of the section that you are testing. If the test message was successfully sent, you will see similar to the following message:

Ivan Mihov
mihovim@gmail.com
<https://imihov.com>

If you received the test message on your cell phone, the extension is working and you will be informed when an event which you have enabled has occurred in your Magento store. If you do not receive the text message, make sure that you have Email to SMS enabled with your cellphone carrier and you can send regular emails from your Magento store.
