## How does the plugin work in the frontend of the website?

The plugin shows the recommendations with the configuration made in our management web app.

It can show recommendations on the home page, on the product page, on the shopping cart, and on the order confirmation page.

If you choose to display the visual search button it will be shown in the header. Clicking it, the visual search feature will be presented and the user can upload an image to search for similar products in the website catalog.
