

# IM Shipping Methods

This extension for Magento® allows you to create as many shipping methods as you want, up to hundreds and thousands.

These shipping methods may be for:

- different carriers – UPS, DHL;
- different directions and distances – countries, zip codes and postal indexes range;
- different order amount range;
- different order weight range;
- different product quantity range;

You can use static price or get price from carrier (you have to enter your account credentials for this carrier).

You can create shipping methods manually, or upload them by .CSV file.

All Shipping Methods, corresponding to the given purchase **will be seen in Checkout:**

The screenshot shows the checkout process. At the top, there is a progress bar with 'Shipping' (1) and 'Review & Payments' (2). A search bar and a shopping cart icon with '2' items are visible. The 'Shipping Address' section has three address options, each with a 'Ship Here' button. The first address is selected. Below it is a '+ New Address' button. The 'Shipping Methods' section lists three options: DHL Standart (\$7.87), UPS Standard (\$10.51), and UPS Express (\$73.12). A blue 'Next' button is at the bottom right.

Address	Ship Here
George Gerasimyak 50 University Ave Ste 260 New York, New York 10101 United States 380503360822	Ship Here
George Gerasimyak Via Albalonga, 40 Roma, Roma 00183 Italy 6387563545	Ship Here
George Gerasimyak 106 Purley Downs Rd. South Croydon, CR2 0RB United Kingdom 8509689486	Ship Here

+ New Address

Price	Carrier	Method
\$7.87	DHL Standart	Infomodus Shipping Methods
\$10.51	UPS Standard	Infomodus Shipping Methods
\$73.12	UPS Express	Infomodus Shipping Methods

Next

This Extension also supports different OnePageCheckouts.

You can use Infomodus Shipping Methods separately (using UPS or DHL default Magento® modules), or with one of our extensions:

- [UPS Shipping Manager Pro](#);
- [DHL Shipping Manager](#)

If you use Infomodus Shipping Methods with UPS Shipping Manager Pro or DHL Shipping Manager, you can create shipping labels automatically, as soon as order will placed.

**License :**

Single Domain License: you can use this extension only on one domain, ie. on one Magento installation. [Read more ->](#)

# Configuration

## Configuration of the Infomodus Shipping Methods is simple:

Go to: System -> Configuration -> left menu column -> Shipping Methods -> Infomodus Shipping Methods

### Here you can:

- Enable or disable these Infomodus Shipping Methods;
- Go to manual creation of your shipping methods;
- Enter Title you want (will appear in checkout);
- Sort order in checkout;
- Import Shipping Methods by CSV file;
- Export – download CSV file with current shipping methods;
- Enable or disable Debug mode: if you enable Debug mode all requests and responses will be recorded in logs: \var\log

As you see on these screenshots, some fields are different, if you select “static” or “dynamic” price.

Dynamic price means, that you will get price from your carrier – UPS or DHL.

## Description of all fields:

- **Title:** Title of the method, which is seen on the list of methods;
- **Method name:** name, which is seen in checkout;
- **Price Source:**
  - **Static:** you enter static price for this shipping methods (for example \$5 or 10 EUR);
  - **Dynamic:** price will be received from Carrier (UPS or DHL) especially for this shipment (weight, shipfrom, shipto addresses, negotiated rates, etc.);

### If Price Source Static:

- **Price (if Price Source is static);**
- **Carrier:** select UPS or DHL  
(if you don't have our extensions: UPS Shipping Manager Pro and DHL Shipping Manager, the system will use default Magento® modules UPS and DHL (System -> Configuration -> Shipping Methods);

### If Price Source Dynamic:

- **Carrier / Module:** Select carrier and module, which you want to use: one of our modules (if you already have it), or one of default Magento® modules UPS or DHL (in the drop-down list will be seen all installed and enabled modules);
- **Negotiated rates:** you can enable Negotiated rates (for UPS only);
- **Time in Transit:** if enabled, customer will see average time for shipping (for UPS only);
- **Shipping Service of a Carrier:** select shipping service of your carrier (UPS or DHL) from drop-down list.
- **Minimum Order Amount – Maximum Order Amount:** range or order amount, for which this shipping methods will appear in checkout;
- **Minimum Order Weight – Maximum Order Weight:** range or order weight, for which this shipping methods will appear in checkout;
- **Minimum Product Quantity – Maximum Product Quantity:** range or product quantity, for which this shipping methods will appear in checkout;
- **Minimum ZIP/Postal code – Maximum ZIP/Postal code:** range or ZIP/Postal codes, for which this shipping methods will appear in checkout. By this attribute you can set states and provinces.
- **Ship to Applicable Countries:** select “All Allowed Countries” or “Specific Countries”. If you select “Specific Countries”, the list of countries will appear;
- **Allowed Countries:** select one or as many countries as you want, for which this shipping methods will be seen;
- **Apply to Store:** select store (if you setted up multistore configuration of Magento®);
- **Enabled:** select Yes or No

# Upload of new Shipping Methods by .CSV file

Also you can create Excell file with all shipping methods you need, save it as .CSV and upload on Configuration page.

Example of such file you can download on the same page. Before this, you have to create at least 1-2 shipping methods manually. These methods will be in the file.

When you create CSV file with shipping methods the most important are correct names of all fields.
