

UPS Access Point Navigator for Magento 2.x

Installation Guide

1. Using SSH run command: **composer require infomodus/upsap**
2. Then run command: **php bin/magento s:up**
3. Then clean cache by command: **php bin/magento c:f** or via Admin interface
4. If your store was compiled / already in the product mode, you need to re-compile it
with command **php bin/magento setup:di:compile**
