

# PayPalPlus Magento 2 User's Guide

The PayPalPlus module for Magento 2 replaces the complete selection of payment methods in Magento. The PayPalPlus module supports other, proprietary payment methods that are activated in the module configuration.

## Requirements

The technical requirements for the module installation are as follows:

- Magento Community Edition 2.1.3
- PHP from 5.6.X

The following Magento checkouts are supported:

- Standard Magento 2 Checkout
- IWD OSC 1.0.7
- Magestore OSC 2.0.2
- Swissuplabs\_Fire OSC 1.4

## Installation

### Via *composer*

In order to install our module via composer, please insert our repository into your composer.json file.

```
{
  "repositories": [
    {
      "url": "git@github.com:i-ways/magento2-paypal-plus.git",
      "type": "git"
    }
  ]
}
```

After you have added the repository you need to add our module as required in your composer.json.

There are two possibilities:

1. Execute the following command in your main directory: *composer require iways / module-pay-pal-plus*
2. Manually add the module to your composer.json file.

```
"require": { "iways/module-pay-pal-plus": "~1.0" }
```

### Activation of the module

Activate the module using the Magento 2 Console with the following command from the Magento main directory:

```
bin/magento module:enable --clear-static-content Iways_PayPalPlus
```

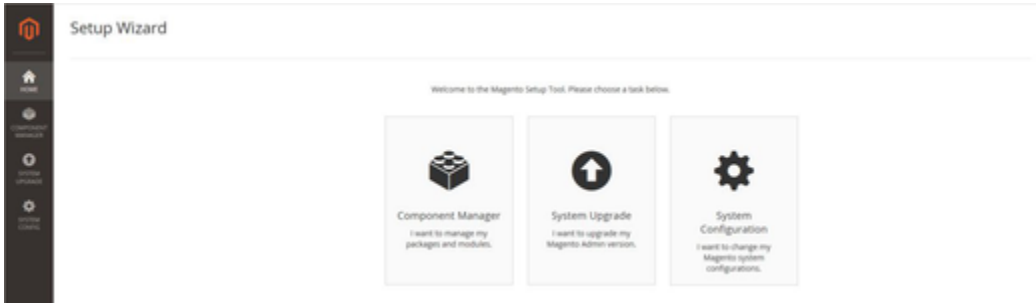

After this step you have to execute the database file with the following command:

```
bin/magento setup:upgrade
```

The Magento 2 PayPal Plus module should now be successfully installed in your webshop.

## Magento Marketplace

Log in with full administration rights in your webshop and navigate to it System | Tools | **Web Setup Wizard** | **Component Manager**

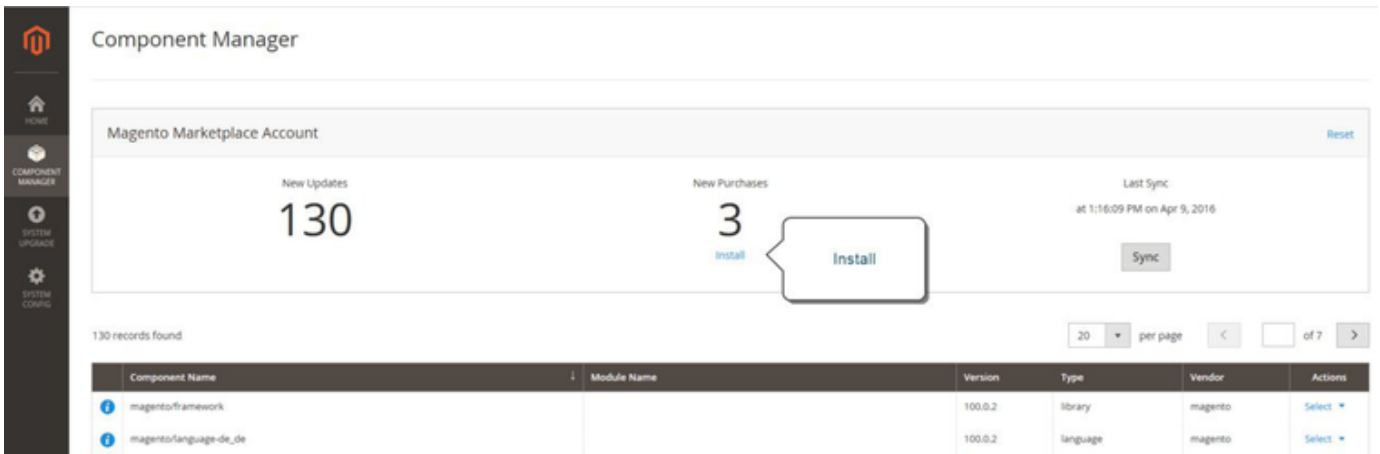

If you have not entered any access data, you will be prompted for this data at this point. For further information on the generation of your access data, please refer to [http://docs.magento.com/marketplace/user\\_guide/account/account-magento2-access-keys.html](http://docs.magento.com/marketplace/user_guide/account/account-magento2-access-keys.html).

After syncing with your Magento Marketplace account, you should see a number above zero under "New Purchases".

To install the PayPal Plus module, in the further course click Install.

In the next step, you must select our extension and install it.

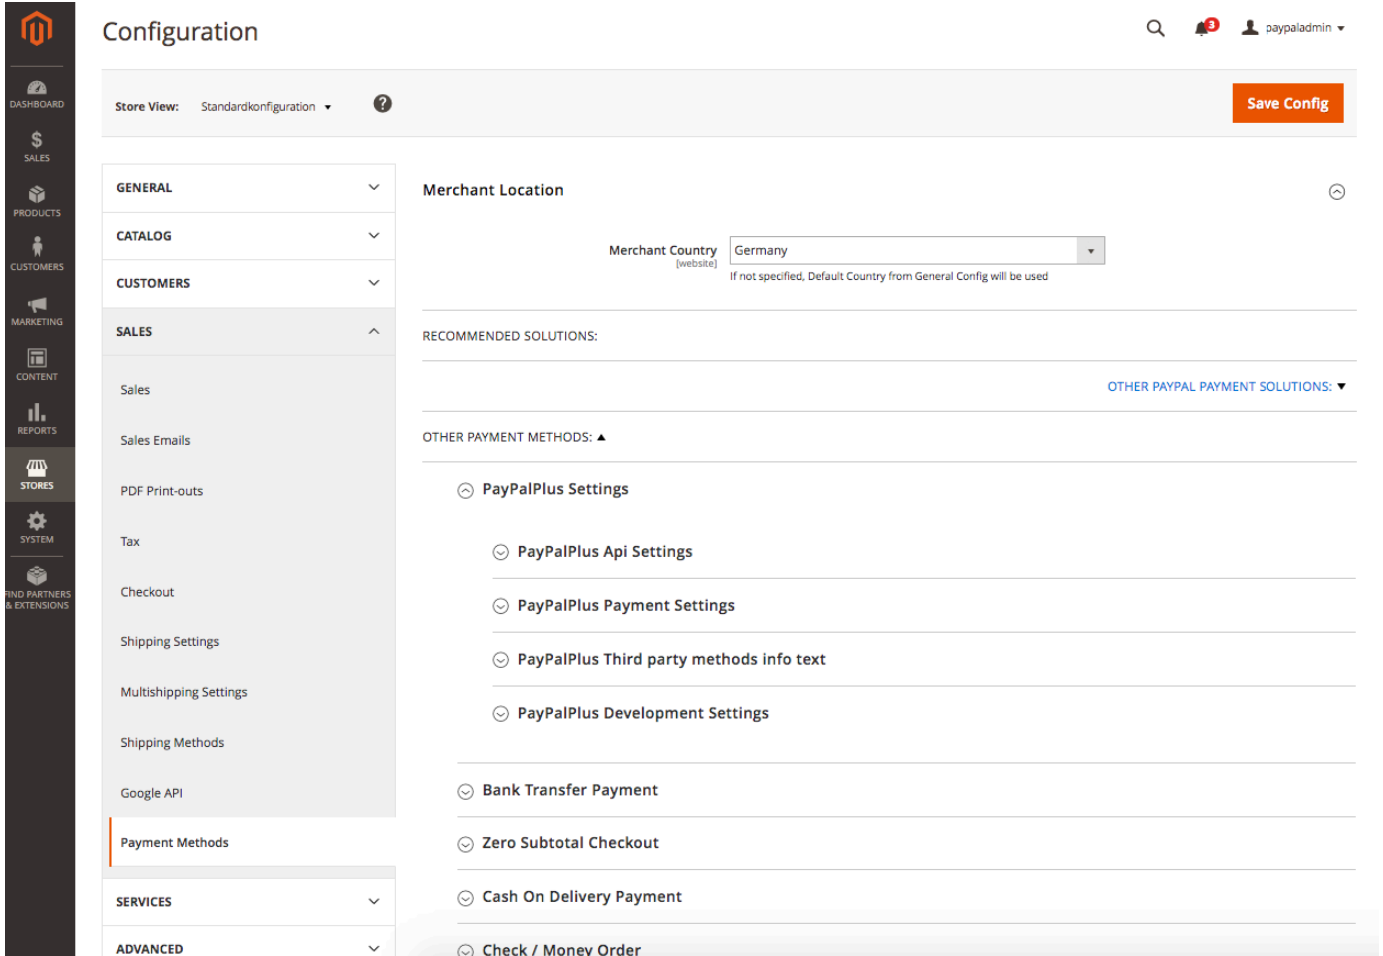

For detailed instructions on how to install Magento 2 modules, please refer to the official documentation at: [http://docs.magento.com/marketplace/user\\_guide/quick-tour/install-extension.html](http://docs.magento.com/marketplace/user_guide/quick-tour/install-extension.html).

## Backend

You can reach the module's backend area via the Magento configuration at:

Stores | Configuration | Sales | Payment Methods | **PayPalPlus Settings**.

**Note: The configuration is only displayed if you have selected "Germany" as your merchant country.**

The screenshot shows the Magento 2 Configuration interface. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Products, Customers, Marketing, Content, Reports, Stores, System, and Third Parties & Extensions. The main content area is titled "Configuration" and shows the "Store View" set to "Standardkonfiguration". A "Save Config" button is in the top right. The left sidebar menu is expanded to "SALES", which includes "Sales", "Sales Emails", "PDF Print-outs", "Tax", "Checkout", "Shipping Settings", "Multishipping Settings", "Shipping Methods", "Google API", and "Payment Methods". The "Payment Methods" section is active, showing a list of payment methods: "PayPalPlus Settings", "Bank Transfer Payment", "Zero Subtotal Checkout", "Cash On Delivery Payment", and "Check / Money Order". The "PayPalPlus Settings" section is expanded, showing sub-sections: "PayPalPlus Api Settings", "PayPalPlus Payment Settings", "PayPalPlus Third party methods info text", and "PayPalPlus Development Settings". The "Merchant Location" section is visible at the top, with "Merchant Country" set to "Germany".

## Configuration

The following fields can be configured:

## PayPalPlus Api Settings

How to retrieve your PayPal API credentials.

Client ID <small>[store view]</small>	<input type="text" value="*****"/>
Client Secret <small>[website]</small>	<input type="text" value="*****"/>
Mode <small>[website]</small>	<input type="text" value="Sandbox"/>
Header Image URL <small>[website]</small>	<input type="text"/>

The image at the top left of the checkout page. Max size is 750x90 pixel. [https](#) is highly encouraged.

## PayPalPlus Payment Settings

Enable this Solution <small>[website]</small>	<input type="text" value="Yes"/>
Show loading indicator <small>[website]</small>	<input type="text" value="Yes"/>
Transfer order's ID as PayPal invoice number <small>[website]</small>	<input type="text" value="Yes"/>
Payment from Applicable Countries <small>[website]</small>	<input type="text" value="All Allowed Countries"/>
Payment from Specific Countries <small>[website]</small>	<div style="border: 1px solid #ccc; padding: 5px;"><ul style="list-style-type: none"><li>Aruba</li><li>Australia</li><li>Austria</li><li>Azerbaijan</li><li>Bahamas</li><li>Bahrain</li><li>Bangladesh</li><li>Barbados</li><li>Belarus</li><li>Belgium</li><li>Belize</li></ul></div>
Allowed Third-Party Modules <small>[store view]</small>	<div style="border: 1px solid #ccc; padding: 5px;"><p>--Please Select--</p><ul style="list-style-type: none"><li>No Payment Information Required</li><li>Check / Money order</li><li>Cash On Delivery</li></ul></div>

### PayPalPlus Third party methods info text

Only selected and saved third party payments will be shown.

No Payment Information Required <small>(store view)</small>	<input type="text"/>
Check / Money order <small>(store view)</small>	<input type="text"/>
Cash On Delivery <small>(store view)</small>	<input type="text"/>

### PayPalPlus Development Settings

Show Pui in Sandbox <small>(website)</small>	<input type="text" value="Yes"/>
Debug <small>(website)</small>	<input type="text" value="Yes"/>
Cache access token <small>(website)</small>	<input type="text" value="Yes"/>

Reduces API calls

## PayPalPlus Api Settings

### PayPalPlus Settings

#### PayPalPlus Api Settings

[How to retrieve your PayPal API credentials.](#)

Client ID <small>(store view)</small>	<input type="text" value="*****"/>
Client Secret <small>(website)</small>	<input type="text" value="*****"/>
Mode <small>(website)</small>	<input type="text" value="Sandbox"/>
Header Image URL <small>(website)</small>	<input type="text"/>

The image at the top left of the checkout page. Max size is 750x90-pixel.  
**https** is highly encouraged.

**Client ID** | Enter the Client ID of your PayPal APP.

**Client Secret** | Enter the Client Secret of your PayPal APP.

**Mode** | Here you can switch between the sandbox and the live mode. It is recommended to first test the configuration in sandbox mode.

**Header Image URL** | The picture in the upper left corner of the payment page. Max 750px x 90px. If you do not fill this field, the default logo is used.

## PayPalPlus Settings

## PayPalPlus Payment Settings

Enable this Solution <small>(website)</small>	Yes
Show loading indicator <small>(website)</small>	Yes
Transfer order's ID as PayPal invoice number <small>(website)</small>	Yes
Payment from Applicable Countries <small>(website)</small>	All Allowed Countries
Payment from Specific Countries <small>(website)</small>	<ul style="list-style-type: none"><li>Afghanistan</li><li>Åland Islands</li><li>Albania</li><li>Algeria</li><li>American Samoa</li><li>Andorra</li><li>Angola</li><li>Anguilla</li><li>Antarctica</li><li>Antigua and Barbuda</li></ul>
Allowed Third-Party Moduls <small>(store view)</small>	<ul style="list-style-type: none"><li>--Please Select--</li><li>No Payment Information Required</li><li>Check / Money order</li><li>Cash On Delivery</li></ul>

**Enable this solution** | Use this dropdown to enable the PayPalPlus module in the checkout.

**Payment from Applicable Countries** | This drop-down menu allows you to switch between the ad in each customer country or those selected from countries that are selected from a specific country.

**Payment from Specific Countries** | Here, you can restrict the customer countries in which payment methods are to be replaced by PayPalPlus.

**Allowed Third-Party Moduls** | Here you have the option to activate other payment methods, which can be displayed in the payment method selection of PayPalPlus.

All methods of payment are checked in the checkout for validity for the current order of the customer and activated if necessary. Please note that problems may occur if the payment method requires further entires in the checkout.

### Third-party methods info texts

## ⌵ PayPalPlus Third party methods info text

Only selected and saved third party payments will be shown.

No Payment Information Required  
[store view]

Check / Money order  
[store view]

Cash On Delivery  
[store view]

If you have selected payment methods in the **Allowed Payment Methods section of third-party providers**, you can add description texts to these payment methods. These are displayed in the *iframe*.

The fields are generated dynamically and are only visible after selecting and storing the configuration.

## PayPalPlus Development Settings

### ⌵ PayPalPlus Development Settings

Show Pul in Sandbox  
[website]

Debug  
[website]

Cache access token  
[website]

Reduces API calls

**Show Pul in Sandbox** | This option allows you to show purchase on invoice in sanbox mode.

**Debug** | Debug mode displays API errors in the front end, and the individual queries of the PayPal Rest Api are stored in the log directory in the PayPal.log file.

**Cache access token** | This option allows you to cache the access token.

## Order processing

In the Magento backend, the order is created with the appropriate payment method chosen by the customer. If the buyer uses one of the PayPal payment methods (PayPal, direct debit or credit card), further functionalities of the standard PayPal module, such as Credit note, can be used in the order processing.

## Purchase on invoice

If your account with PayPal is available for the "purchase on account", this payment method is automatically displayed when the payment is selected.

Note: Information on purchase on account can be dynamic per transaction and may not be displayed fixed under any circumstances. Please always download the latest information for the ad.

## Frontend

If the purchaser chooses the "purchase on invoice" process, the purchaser will be guided through the "purchase on invoice" process and will be shown additional payment information on the order confirmation page.
