

Dominate Checkout Open-Source For Magento 2 Installation Guide

Task List to install and enable the Dominate Checkout on your site:

1. Purchase the free Dominate Checkout product on <https://www.dominare.co> or from Magento's Marketplace.
2. Download and Install the Dominate Checkout Open-Source extension on your Magento 2 store (*Read the [Install the Dominate Checkout Open-Source using composer](#) or [Install the Dominate Checkout Open-Source extension manually](#) sections*).

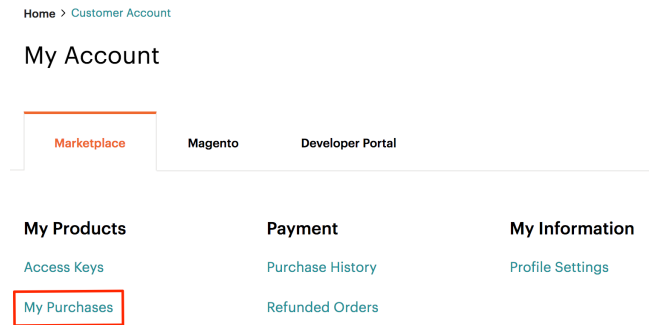

Install the Dominate Checkout Open-Source extension using Composer:

Once you have purchased the Dominate Checkout Open-Source extension from the Magento Marketplace, follow these steps to install the Magento Connector properly.

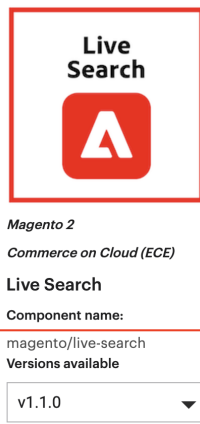

1. Log in to [Magento Marketplace](#) with the username and password you used to purchase the extension.
2. In the upper-right corner, click Your name > My Profile.

3. Click My Purchases.

4. Find the extension you want to install and click Technical Details.

5. Navigate to your Magento project directory and update your `composer.json` file as follows:

```
composer require iwd/iwd-opc:<version>
```

6. Enter your [authentication keys](#). Your public key is your username; your private key is your password.

7. Wait for Composer to finish updating your project dependencies and make sure there aren't any errors

8. Enable the extension and clear static view files:

```
bin/magento module:enable IWD_Opc --clear-static-content
```

9. Register the extension:

```
bin/magento setup:upgrade
```

10. Recompile your Magento project: In Production mode, you may receive a message to "Please rerun Magento compile command". Magento does not prompt you to run

the compile command in Developer mode.

```
bin/magento setup:di:compile
```

11. Clean cache:

```
bin/magento cache:clean
```

Install the Dominate Checkout Open-Source extension manually

Once you have downloaded the Magento extension from your download [link](#) sent to your email after submitting the form, follow these steps to install the Dominate Checkout Open-Source properly.

Please do not use 7zip software to unpack the .tgz package if you decide to install the extension via FTP.

If you are installing it using the ssh console, please follow these steps:

1. Back up your web directory and store the database
2. Install Dominate Checkout Open-Source extension by uploading the package to your directory: `path_to_the_store_root_folder/app/code/IWD/Opc`
3. In the SSH console of your server navigate to your store root folder: `cd path_to_the_store_root_folder`
4. Run the following command: `php -f bin/Magento setup:upgrade`
5. Now run the following command: `php -f bin/Magento setup:static-content:deploy`
6. Flush store cache; log out from the backend and log in again

Upgrade the Dominate Checkout Open-Source extension using composer:

To update the extension please follow these instructions:

1. Update per module name:
`composer update iwd/iwd-opc`
2. Update per version being x.x.x the newest version number:
`composer require iwd/iwd-opc ^x.x.x`
3. Run the following commands to upgrade, deploy, and clean the cache.

bin/magento setup:upgrade --keep-generated
bin/magento setup:static-content:deploy
bin/magento cache:clean
