Description

TelegramBot — allows to integrate you Magento 2 store into a Telegram messenger. This will result in revenue and profit growth. Untie your hands with this extension: manage your store directly from a popular messenger. You'll be able to receive a push notifications, messages and many other.

TelegramBot — this extension will allow to manage your store straight from the Telegram Messenger. Which will ultimately attract more customers to the store. They will be able to check the store directly from their phone. Product view, info about new products and many other options are available at a single command.

The module solves administrative issue. Once a customer makes an order, messenger will send you a push notification. No need to monitor your mail box for the orders, all of them are entirely at one place. This module can send a wide variety of information to you, just set all up as per your needs. You can also share your responsibilities with other managers.

Extension Features:

- Integrates your catalog to Telegram Messenger.
- Integrates Recently Viewed Products.
- Integrates Bestsellers Products.
- Integrates Newest Products.
