

Kimonix extension for Magento 2 setup instructions

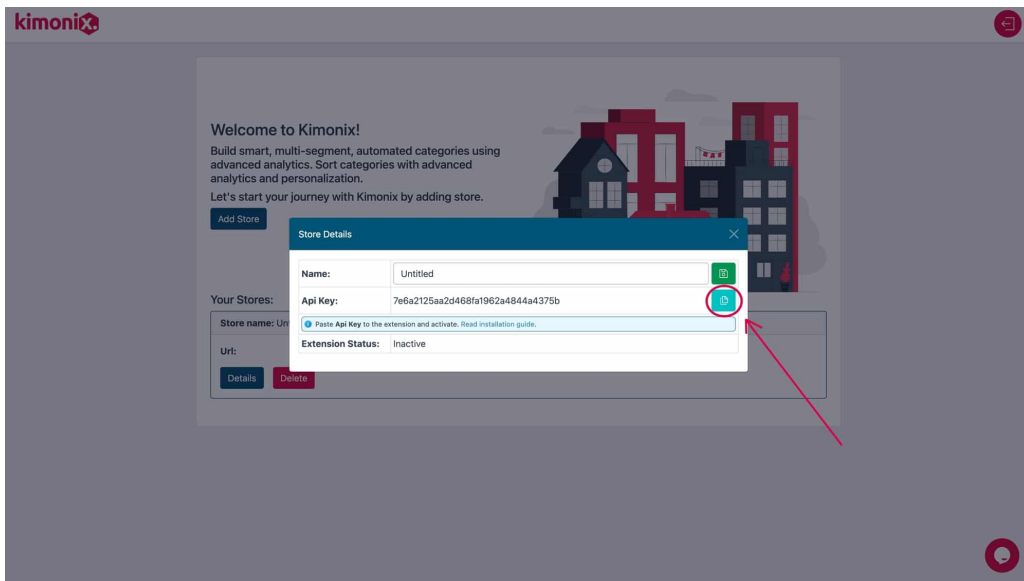

To install the Kimonix extension for Magento 2, Please follow the next steps:

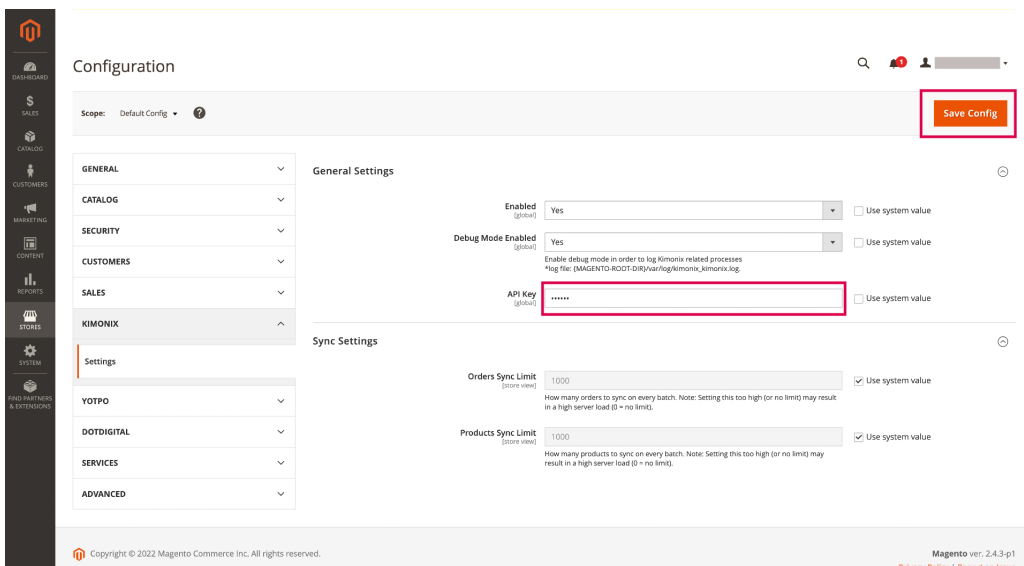

Step 1: Run the following command under your Magento 2 server root dir:

```
composer require kimonix/magento2-module-kimonix
php bin/magento maintenance:enable
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
php bin/magento maintenance:disable
php bin/magento cache:flush
```

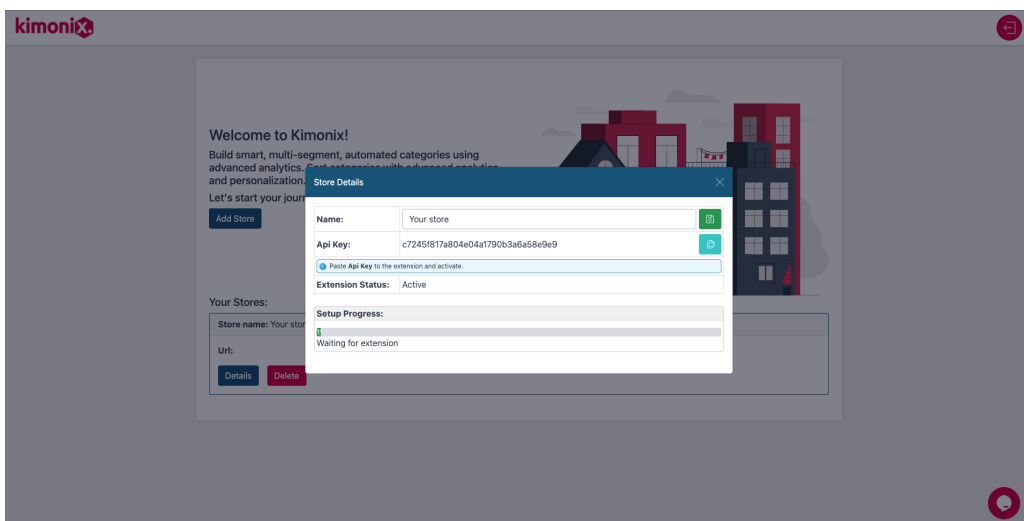

Step 2: After finishing the installation of the extension, go to Kimonix application and copy the Api Key.

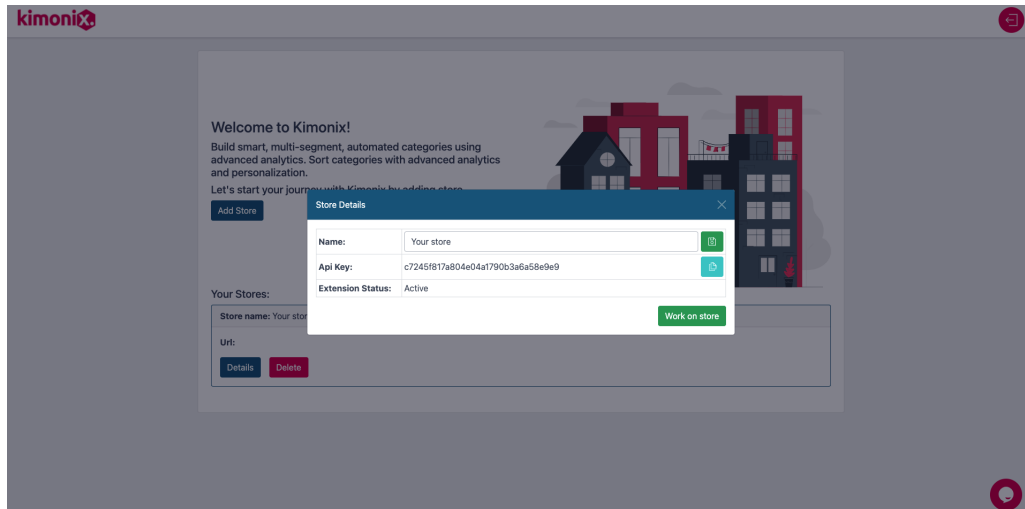

Step 3: Go to your Magento 2 admin interface to activate extension under "Stores" > "Configuration" > "Kimonix". Paste here the API Key and press "Save Config".

Step 4: the setup should automatically start. Wait until it is finished.

Step 5: Congratulations! here, setup was finished. Just press the button "Work on store" and start using the app.

If you still have problems with the setup, feel free to contact us at support@kimonix.com or in our chat.
