

Installation

a. Composer Installation

- Navigate to your Magento root folder
`cd path_to_the_magento_root_directory`
- Then run the following command
`composer require kiwicommerce/module-login-as-customer`
- Make sure that composer finished the installation without errors.

b. Command Line Installation

- Backup your web directory and database.
- Upload contents of the Login As Customer installation package to the following directory.

```
app/code/KiwiCommerce/LoginAsCustomer
```

- In the SSH console of your server, navigate to your Magento root folder
`cd path_to_the_magento_root_directory`
- Then run the following command
`php bin/magento module:enable KiwiCommerce_LoginAsCustomer`
- After install the extension, run the following command
`php bin/magento setup:upgrade`
`php bin/magento setup:di:compile`
`php bin/magento setup:static-content:deploy`
`php bin/magento cache:flush`
- Log out from the backend and log in again.
- That's it. Super admin is able to see all the options and he can control all visibility and enable and disable properties from the configuration option.
