1.0 Introduction

Auto Switch Language & Currency extension helps you localize your eCommerce site.

The store admin can fix the default language and currency to be used in a particular location from the back-end. The Auto Switch Language & Currency extension detects the IP of the site visitors. The visitors can view the contents and product prices in the specified language and currency.

The store owners can now localize their business and cater to overseas customers without making any changes in the site for the various locations.

1.1 Admin Benefits:

- With this module, the admin can tap the global audience with least hassle.
- This module automatically changes the language of the site based on the location of the store visitor. The store owner need not make any changes in the back-end of the site.
- This module changes the currency of the eCommerce site automatically based on the location of the customers.
- The mapping of the language and currency for the various locations can be done at a few button clicks from the admin interface.

2.0 Installation

The steps to install the Auto Switch Language & Currency Module for Magento 2 are mentioned below:

1. Buy Auto Switch Language & Currency extension from the Magento Marketplace. You can download the extension package after purchasing this extension.
2. The package has a zipped file that contains the user manual and the source code of Auto Switch Language & Currency extension. Unzip the package.
3. Create a folder **{Magento root}/app/code/Knowband/Autoswitchlangcurrency**

4. Upload the extracted content in the above folder via FTP manager (like Filezilla or WinSCP - download here: <http://filezilla-project.org/>).
5. Now run below commands to install the extension:
php -f bin/magento module:enable --clear-static-content Knowband_Autoswitchlangcurrency

php -f bin/magento setup:upgrade

php -f bin/magento setup:di:compile

php bin/magento setup:static-content:deploy
6. The extension is now installed and ready for use. In Admin Panel go to “*Knowband Extensions > Auto Switch Language & Currency*”.

You can now configure and use the Auto Switch Language & Currency extension for Magento 2 platform.
