## 1.0 Introduction

The online store admin can now allow online users to select the preferred date and time for delivery. The Preferred delivery module allows the online users to select the date from the availability calendar and date from the drop-down list. This way, the online users can get product delivery as per their preferences. The Preferred delivery date and time extension allow the online store merchant to set the time slot range, delivery days gap and holiday from the admin interface. The Preferred delivery date and time plugin is mobile responsive and offer smooth functioning.

## 2.0 Installation

After purchasing the Preferred Delivery Time extension, the store admin will get the following files:

1. **Preferreddeliverytime.zip** which has the source code of this Preferred Delivery Time plugin.
2. User Manual, with all the basic details and information.

**The steps to install the Preferred Delivery Time Module are mentioned below:**

- Buy the Preferred Delivery Time from our store. You can download the extension package.
- The package has a zipped file that contains the user manual and the source code of the Preferred Delivery Time Module. Now, Unzip this package.
- Create a folder  
**{Magentoroot}/app/code/Knowband/Preferreddeliverytime**
- Upload the extracted content in the above folder via FTP manager (like Filezilla or WinSCP – download here: <http://filezilla-project.org/>).

- Now run below commands to install the plugin:

**1. php bin/magento module:enable  
Knowband\_Preferreddeliverytime**

**2. php bin/magento setup:upgrade**

**3. php bin/magento setup:di:compile**

The extension is now installed and ready for use. In Admin Panel go to  
“**Knowband Extensions > Preferred Delivery Time**”.

You can now configure and use the Preferred Delivery Time Module.
