

# Koalafi Extension for Magento Installation Guide

## About Koalafi

At Koalafi, we use technology to help more people, even those without credit, get the things they need. We believe financing doesn't have to be confusing or stressful. Our simple and transparent application creates a better experience for customers and more opportunity for you.

- Expand your reach: Our technology enables us to make more informed decisions about applicants, resulting in more approvals, and more transactions for you.
- Simplify the experience: Customers can apply with one of the shortest applications available and get a decision in seconds. We'll always present clear and straightforward terms upfront before a customer agrees to anything.
- Keep customers coming back: A hassle-free checkout gives customer a great impression of your brand and our targeted marketing campaigns will ensure you stay top of mind.

Koalafi supports two flow types. You can choose to support one or both based on the needs of your implementation.

1. Shop First This flow is for customers who have added items to their cart, proceeded to checkout, and selected Koalafi as their method of payment at checkout. These customers have not already applied for financing elsewhere on your site. Customers initiate this flow from the shopping cart by selecting Koalafi as their payment method.
2. Approval First This flow is for customers who wish to apply for Koalafi financing but don't yet know what they want to buy, or want to see what financing they can get approved for before shopping. Customers typically initiate this pre-approval flow from a financing page or marketing callout. After approval, the customer shops on your site, checks out, and then chooses Koalafi at checkout as their payment method to complete their financing. This flow is a great tool for converting more potential customers!

## Installation

1. Download and unzip the extension.

2. Copy files to ``<Magento root>/app/code/Koalafi/Payment`` directory.
3. Execute the following console commands:
  - 3.1. ``php bin/magento module:enable Koalafi_Payment``
  - 3.2. ``php bin/magento setup:upgrade``
  - 3.3. ``php bin/magento cache:clean``

## Configuration

1. To configure the extension, go to `Stores > Settings > Configuration > Sales > Payment Methods`.
2. Expand Koalafi Payment section, enter configuration data and click 'Save Config'.
