

LayUp payment method configurations stored here:

Stores / Configuration / Sales / Payment Methods / LayUp

Configuration values:

- **Title:** Payment method label, which is used on the frontend
- **Enable payment method:** Enable / Disable payment method
- **Mode:** Sandbox or Production mode
- **Enable Debug mode:** Enable / Disable debug logging
- **Merchant API Key:** Your API key (it is different for Sandbox and Production modes)
- **API Url:** Api url, it is also different for Sandbox mode and Production
- **Store name:** Put the store name or other text, this text will be displayed on the LayUp UI for each order.
- **Image url:** Image to display on LayUp UI for each order, put the absolute path to image, and make sure it is accessible.
- **Absorb fee:** Yes (you will absorb LayUp fee) / No (Client will pay LayUp fee)
- **Enable split payment plan:** Allow customers to split LayUp payment plans between other users.
- **Maximum duration of payment plan:** Number of months for maximum payment plan duration.
- **Minimum duration of payment plan:** Number of months for minimum payment plan duration. (If Maximum duration of payment plan is 10 and minimum is 5 then customer can't take payment plan longer than 10 month and less the 5)
- **Deposit Type:** Choose the deposit type your customers have to make (Percentage, Installment, Flat)
- **Client deposit percentage:** If Deposit type is Percentage then type how much client has to pay first deposit.
- **Client deposit amount:** If Deposit type is Flat then type deposit amount.
- **Payment From Applicable countries:** Select countries for which you want to enable LayUp payment option.
- **Payment From specific countries:** Select countries for which you want to enable LayUp payment method.
- **Show button on ...:** Display or not payment method button on Product page / Minicart.

Every order placed with payment method LayUp has View **Plan** button inside Payment information. This button can show the current payment plan status.

Information about plans will be updated every day via cron job.If payment plan is completed cron will create an Invoice automatically.
