Instructions

Full Migration Notice

- Please do not remove Connector file during the Full Migration.
- Due to shopping cart configuration peculiarities some of migrated data may not be properly displayed at storefront. So, it is highly recommend to check Demo Migration results at the store backend and clear the store cache.
- Full migration might take time, you can safely close this window and return later to check progress. We will send an email to your [mail] when the process completes.

You can try demo first or run full migration immediately.

- **To Try Demo:** Start your demo migration with limited number of entities. You will see the same actions as the actual migration. However you can skip this step by clicking "Skip Demo Migration" button to immediately move forward to Full Migration.
- **To Perform Full Migration:** Please click to "Skip Demo Migration" button to perform full migration immediately. Please wait during data is migrating, an email will be sent you from LitExtension system after migration completed. Now, your data will be moved to new desired store as your expectation.

5. Don't Have Time To Migrate By Your Own?

In case, If you are busy and just want someone to completely take care of your store migration for you or Your store has some third party modules or some custom fields need to migrated. We would like to offer [the All-In-One Migration service](#), this service provides high quality migration service with low cost. We will perform data migration and provide all the necessary customization for you. The main goal is to save time and minimize efforts of e-merchants.

If you have any more question while using LitExtension service, please do not hesitate [Contact Us](#) for further assistance.
