

Instruction for technical integration with the LOVAT system

There are two ways to install this plugin.

Option 1

1. Follow the link <https://github.com/Rozrabiaka/lovat-api/tree/master>
2. Download the archive file.
3. Upload files to the app/code folder.
4. Enter the following commands into the command-line:

```
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento cache:clean
```

Option 2 (Install a plugin via [Composer](#)):

1. Install [Composer](#) if it's necessary.
2. Write this command `composer require lovat/module-lovat`
3. Run the following commands into the command-line:

```
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento cache:clean
```

You have installed and configured the plugin successfully in Magento2.

After successful installation of the plugin you need to complete the following steps:

1. On the Admin panel, click **System**. In the **Extensions** section, select **Integrations**.
2. In the upper-right corner, click the **Add New Integration** button and complete all information.

BASIC SETTINGS

Integration Info ✎

API

General

Name *

Email

Callback URL

Enter URL where Oauth credentials can be sent when using Oauth for token exchange. We strongly recommend using https://.

Identity link URL

URL to redirect user to link their 3rd party account with this Magento integration credentials.

Current User Identity Verification

Your Password *

*Please don't fill these fields **Callback URL** and **Identity link URL**

3. On the Admin panel choose **API section**.
4. Choose "Lovat Api" and mark the checkbox of this resource.

- Show Toolbar
- Show List
- Mark as Read
- Remove
- Custom Variables
- Manage Encryption Key
- Global Search
- Lovat Api
- Lovat Api orders

5. When complete, click **Save** button.

After successful adding of the integration you need to activate it. Do the following:

The screenshot shows a user interface for managing integrations. At the top right, there is an orange button labeled "Add New Integration". Below it, a yellow banner displays a green checkmark and the text "The integration 'instruction' has been saved." Below the banner is a search bar with "Search" and "Reset Filter" buttons, and a status indicator "2 records found". To the right of the search bar, there are pagination controls: "20" in a dropdown menu, "per page", and "1 of 1" with navigation arrows. Below these controls is a table with the following columns: Name, Status, Activate, Edit, and Delete. The table contains two rows: "Lovat Api" with status "Active" and an orange "Reauthorize" button, and "instruction" with status "Inactive" and an orange "Activate" button. A red arrow points to the "Activate" button in the "instruction" row.

Name	Status	Activate	Edit	Delete
Lovat Api	Active	Reauthorize		
instruction	Inactive	Activate		

6. Click the button **Activate** and this window will appear. Then click the **Allow** button.

The screenshot shows a modal window titled "instruction" with a close button (X) in the top right corner. At the bottom right of the window is an orange button labeled "Allow". Below the window, the text "The integration you selected asks you to approve access to the following:" is displayed. Underneath, there is a section labeled "API" with a tree view showing "Lovat Api" and "Lovat Api orders".

7. When this window appears, click the button **Done**.

The screenshot shows a modal window titled "instruction" with a close button (X) in the top right corner. At the bottom right of the window is an orange button labeled "Done". Below the window, the text "Integration Tokens for Extensions" is displayed. Underneath, there are four rows of input fields for tokens:

- Consumer Key: 31vyk8biuxfzgf59sc0g0jfopj5xr716
- Consumer Secret: vxsthnn6b2f39squ39op863oiu6q37ws
- Access Token: c4wemwvjg35qlam4pd0sup1wlv990788
- Access Token Secret: 1ki7uqoi54d3m9slqairn4eceoxoag4

*You can find these keys if you click the button [Edit](#).
