komfortkasse.eu/magento2

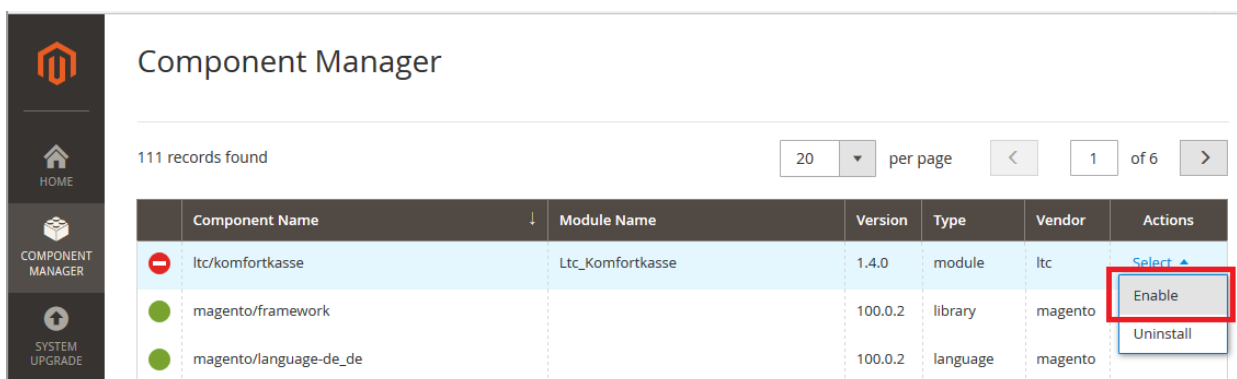

Installation & User Guide

After installing, open your Magento administration interface and navigate to System - **Web Setup Wizard** and open the **Component Manager**.

(Experienced users: you may also enable the module by calling **php magento module:enable Ltc_Komfortkasse** and **php magento setup:upgrade**).

Look for the component **ltc/komfortkasse** and choose **Enable** from the Drop-Down.

Follow the steps: perform the Readiness Check, create a backup...

Enable Ltc_Komfortkasse

Readiness Check Create Backup Enable Module

Back Next

Step 1: Readiness Check

Let's check your environment for the correct PHP version, PHP extensions, file permissions and compatibility.

Start Readiness Check

... finally, enable the module.

Enable Ltc_Komfortkasse

Readiness Check Create Backup Enable Module

Back

Step 3: Enable Module

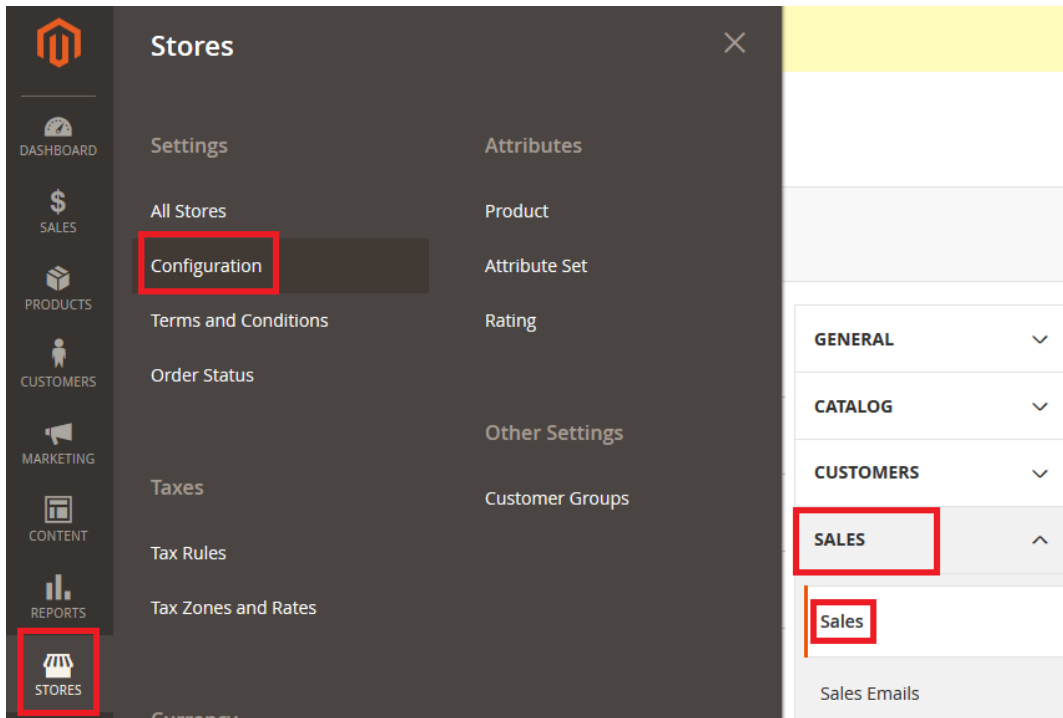

We're ready to enable Ltc_Komfortkasse.

Enable

After the update has been performed, you should see a success message.

The following modules have been enabled:
- Ltc_Komfortkasse

To configure the extension, navigate to **Stores - Configuration - Sales - Sales:**

Look for for the **Komfortkasse** Tab.

Enable "export orders" in order to transfer order data from your store to Komfortkasse. Enable "update orders" to retrieve payment status updates.

Export Orders [STORE VIEW]
Activate export of orders

Update Orders [STORE VIEW]
Activate update of orders

The following settings are present for three different payment methods: Prepayment, COD and Invoice.

Choose the payment methods that an order must have to be transferred to Komfortkasse. Normally, this will be "Bank Transfer Payment" for prepayment. (For "Invoice", you will have to install an extension that provides a payment method Invoice, like [this one](#).)

If you don't want to manage a specific payment method with Komfortkasse, leave this selection empty.

Prepayment: Payment Methods

A dropdown menu with the following items: Credit Card (Braintree), Credit Card Direct Post (Authorize.net), Offline Payment Methods (highlighted in blue), Bank Transfer Payment (highlighted in blue), Cash On Delivery, Check / Money order, No Payment Information Required, Purchase Order, PayPal, and Credit Card.

[STORE VIEW]

All payment methods that should be exported for prepayment orders

Choose the status(es) that an order must have to be transferred to Komfortkasse. Depending on how your status flow is, that can be "Pending", "Processing", or both. For COD or Invoice, this will probably be "Complete".

Prepayment: Statuses Open

A dropdown menu with the following items: -- Please Select --, Pending (highlighted in blue), Processing, Suspected Fraud, Complete, Closed, Canceled, and On Hold.

[STORE VIEW]

Order statuses that should be exported for prepayment orders (open orders)

Choose the status you want an order to have after it has been paid. This can be a new status that you create (e.g., "Bank Transfer Paid"), or "Processing". For COD and Invoice, this will probably be a custom order status like "Complete/Paid".

Prepayment: Status Paid

A dropdown menu with the value "Processing" selected.

[STORE VIEW]

Order state that should be set when a payment has been received for a prepayment order

Choose the status you want an order to have when it has been canceled. Typically, this is "Canceled". For Invoice and COD, this will be a custom order status like "Complete/Unpaid".

Prepayment: Status Cancelled

A dropdown menu with the value "Canceled" selected.

[STORE VIEW]

Order state that should be set when a prepayment order has been cancelled

Do not change the other options (encryption, access code, secret keys). These values will be automatically filled in when you connect your shop with Komfortkasse.
