

# Paylike User Guide

## BACKEND SETTINGS

**Step 1:** To configure Paylike payment method, go to STORES → Configuration from admin panel.

**Step 2:** On the left side, tap the SALES tab and click on Payment Methods to view the Paylike payment method under OTHER PAYMENT METHODS.

The screenshot displays the Magento Configuration interface. On the left sidebar, the 'SALES' tab is selected, and 'Payment Methods' is highlighted with an orange box. The main content area shows the configuration for the 'Paylike' payment method, which is also highlighted with an orange box under the 'OTHER PAYMENT METHODS' section. The configuration includes the following fields:

- Enable Paylike** [store view]: A dropdown menu set to 'Yes'.
- Payment method title** [store view]: A text input field containing 'Paylike'.
- Payment method credit card logos** [store view]: A list of logos including Visa, Visa Electron, MasterCard, and Maestro.
- Payment method description** [store view]: A text input field containing 'Secure payment with credit card via © Paylike'.

### Step 3: A screen will appear with the following configuration settings:

#### Paylike

**Enable Paylike** [store view] Yes

**Payment method title** [store view] Paylike

**Payment method credit card logos** [store view]

- Visa
- Visa Electron
- MasterCard
- Maestro

**Payment method description** [store view] Secure payment with credit card via © Paylike

**Payment popup title** [store view] Paylike Popup

The text shown in the popup where the customer inserts the card details

**Transaction mode** [store view] Test

In test mode, you can create a successful transaction with the card number 4100 0000 0000 0000 with any CVC and a valid expiration date.

**Test mode Public Key** [store view] 6bb16eb9-de0f-4224-9bc1-3d2b35b0bccd

Get it from your Paylike dashboard

**Test mode App Key** [store view] c0d3d84c-4ced-4f07-963f-f3e5b6196e75

Get it from your Paylike dashboard

**Live mode Public Key** [store view] 578ebd22-3fbf-4e48-9235-1cdc7b9e3dde

Get it from your Paylike dashboard

**Live mode App Key** [store view] 3d95ea92-83dd-4c8b-b315-d6efba2874e0

Get it from your Paylike dashboard

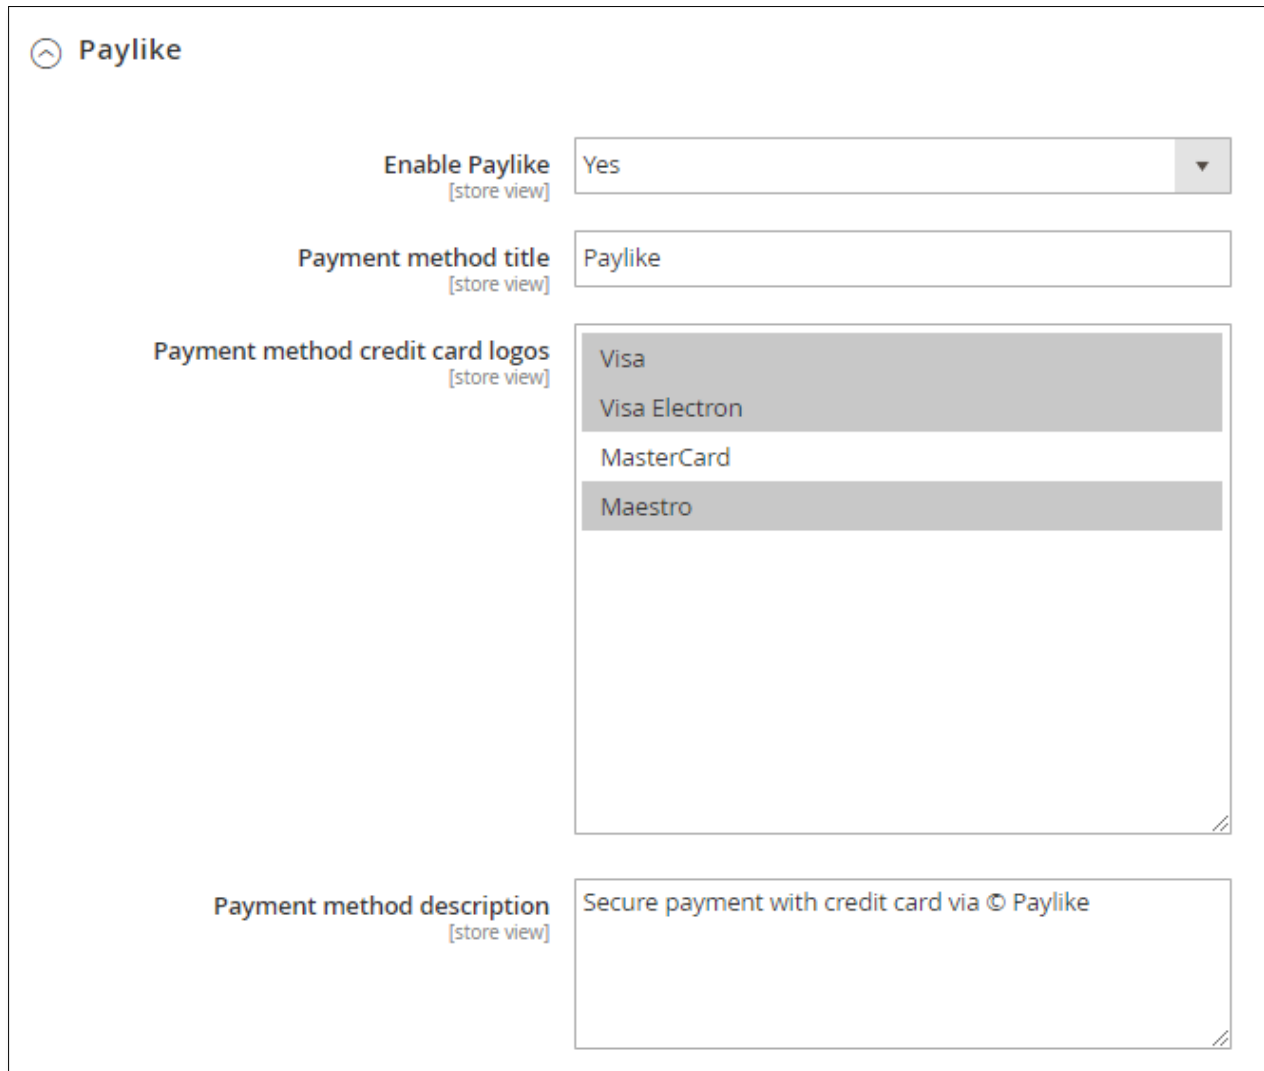

**Capture mode** [store view] Delayed

If you deliver your product instantly (e.g. a digital product), choose Instant mode. If not, use Delayed.

**Sort Order** [store view] 1

**Step 4:** Fill the configuration settings according to your requirements.

## 1. Frontend Configuration Settings

The screenshot shows the configuration settings for the Paylike payment method. At the top left, there is a back arrow icon and the text "Paylike". Below this, there are four configuration fields:

- Enable Paylike** [store view]: A dropdown menu with "Yes" selected.
- Payment method title** [store view]: A text input field containing "Paylike".
- Payment method credit card logos** [store view]: A list of credit card logos with "Visa", "Visa Electron", "MasterCard", and "Maestro" listed. "Visa" and "Maestro" are highlighted with a grey background.
- Payment method description** [store view]: A text input field containing "Secure payment with credit card via © Paylike".

**Enable Paylike:** To enable Paylike payment method on frontend.

**Payment method title:** To set title of payment method on checkout page of frontend.

**Payment method credit card logos:** To display the credit card types which are available for payment

**Payment method description:** To display any description of payment method on frontend.

On the frontend, it appears like this:

Payment Method:

Check / Money order Payment method title

---

Paylike Payment method credit card logos

Secure payment with credit card via © Paylike Payment method description

My billing and shipping address are the same

John Doe  
House 12, Block B  
Kansus City, California 12345  
United States  
3434324

**Place Order**

## 2. Transaction mode Settings

<b>Transaction mode</b> <small>[store view]</small>	Test	
	In test mode, you can create a successful transaction with the card number 4100 0000 0000 0000 with any CVC and a valid expiration date.	
<b>Test mode Public Key</b> <small>[store view]</small>	6bb16eb9-de0f-4224-9bc1-3d2b35b0bccd	
	Get it from your Paylike dashboard	
<b>Test mode App Key</b> <small>[store view]</small>	c0d3d84c-4ced-4f07-963f-f3e5b6196e75	
	Get it from your Paylike dashboard	
<b>Live mode Public Key</b> <small>[store view]</small>	578ebd22-3fbf-4e48-9235-1cdc7b9e3dde	
	Get it from your Paylike dashboard	
<b>Live mode App Key</b> <small>[store view]</small>	3d95ea92-83dd-4c8b-b315-d6efba2874e0	
	Get it from your Paylike dashboard	

**Transaction mode:** To set the mode of transaction, it can be either test or live. In test mode, you can create a successful transaction with any test credit card account number.

**Test mode Public and App Key:** Create an account on Paylike and get the keys from Paylike dashboard.

**Live mode Public and App Key:** Create an account on Paylike and get the keys from Paylike dashboard

Without these keys, the payment and transaction fails.

### 3. Capture mode Settings

**Capture mode**  
[store view]

Delayed

If you deliver your product instantly (e.g. a digital product), choose Instant mode. If not, use Delayed.

In instant mode, only authorization is done after payment.

In delayed mode, after authorization, the amount is captured too.

**Step 5:** Click on Save Config button on the top right corner to save the configuration settings and clear the cache if required.

Save Config

⊖ Paylike

**Enable Paylike**  
[store view]

Yes

**Payment method title**  
[store view]

Paylike

**Payment method credit card logos**  
[store view]

Visa  
Visa Electron  
MasterCard  
Maestro

# PAYLIKE TRANSACTIONS

To test the Paylike transactions, add products to cart and go to checkout page. Click on Place Order button, paylike popup will appear. Fill the fields and click on Pay button and it will redirect to success page.

The screenshot displays a checkout page with a progress bar at the top. The 'Shipping' step is completed, and the 'Review & Payments' step is active. The 'Payment Method' section shows 'Paylike' as the selected option, with logos for VISA, VISA Electron, and Maestro. Below this, there is a checkbox for 'My billing and shipping address are the same' which is checked, followed by the shipping address: John Doe, House 12, Block B, Kansas City, California 12345, United States, 3434324. A 'Place Order' button is visible at the bottom right. A 'Paylike Popup' is overlaid on the page, containing a 'CARD NUMBER' field with the value '0000 0000 0000 0000', an 'EXPIRY MONTH/YEAR' field with the value 'MM / YY', and a 'CVC' field with the value 'XXX'. The popup also features a green 'Pay' button and a price of '\$59.00'. An orange arrow points from the 'Place Order' button to the 'Pay' button in the popup. A green diamond icon with the text 'Secure payment by Paylike' is located below the popup.

## INSTANT MODE

In instant mode, payment is done before order is created i.e. after authorization by paylike popup, the amount is captured and invoice of the order is generated automatically. And, the order status is changed to “**Processing**”.

So, the order cannot be voided or cancelled in instant mode.

In instant mode, only refund can be done using the invoice.

### 1. Refund

In Magento, Online refunds are done from the Invoice not the Order by following steps:

- Open the order
- In the Order view tab on the left, click on Invoices
- You will get an invoice listing for that order, click on View link of the invoice you want to refund
- Click on Credit Memo on the top right corner to refund the amount captured
- Complete the particulars (you can adjust the amount of money you want to refund) and then click on Refund button to refund the amount

#### **Result:**

In Magento, the order status is changed to ‘Closed’ after refund.

## DELAYED MODE

In delayed mode, only authorization is done by paylike before order is created. The order status is changed to **Pending Payment** because amount is not capture. Capture is done when required. It is done when the admin creates the invoice manually.

So, in delayed mode, void, cancel and refund can be done.

### 1. Refund

In delayed mode, the admin has to create an invoice manually. And then he can refund it.

In Magento, Online refunds are done from the Invoice not the Order by following steps:

- Open the order
- In the Order view tab on the left, click on Invoices
- You will get an invoice listing for that order, click on View link of the invoice you want to refund
- Click on Credit Memo on the top right corner to refund the amount captured
- Complete the particulars (you can adjust the amount of money you want to refund) and then click on Refund button to refund the amount

### Result:

In Magento, the order status is changed to 'Closed' after refund.

## 2. Void

In delayed mode, the amount is only authorized so it can be voided by the following steps:

- Open the order
- Click on Void button on the top right corner to void the authorized amount

### **Result:**

In Magento, the order status still remains 'Processing', this is because Magento allows offline invoice creation after order is voided.

## 3. Cancel

In delayed mode, the amount is only authorized so it can be cancelled by the following steps:

- Open the order
- Click on Cancel button on the top right corner to void/cancel the authorized amount

### **Result:**

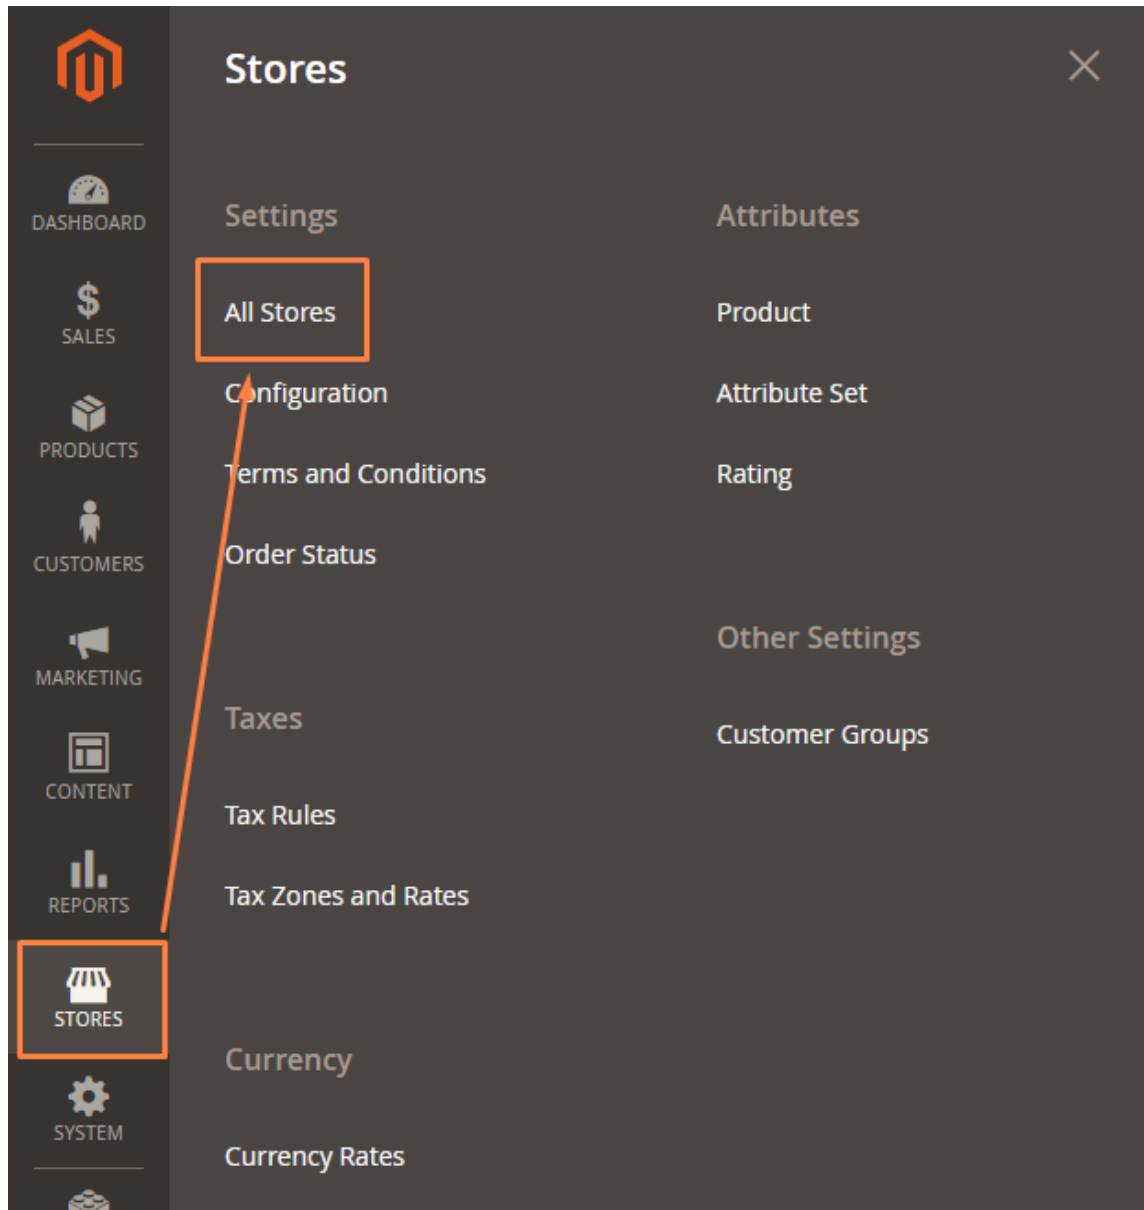

In Magento, the order status changes to 'Cancelled' and order is cancelled and no further process can be done with the order.

# LANGUAGE SWITCHER

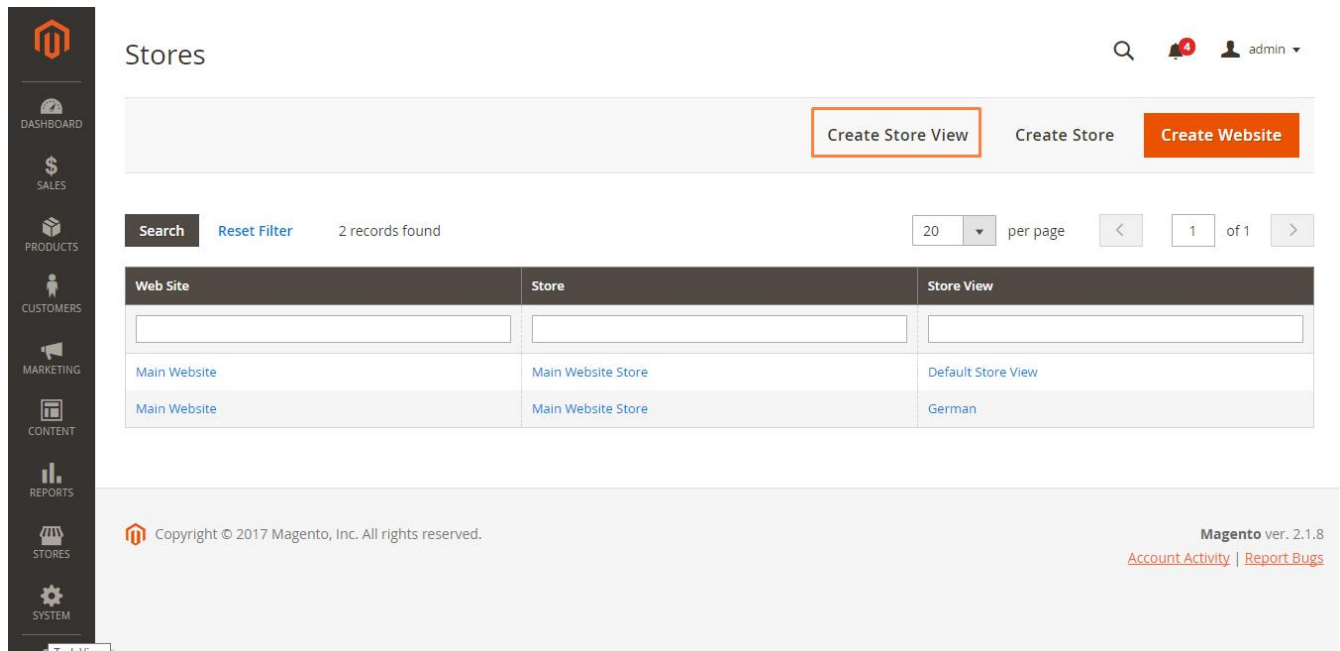

To add language package for the module, you need to follow the steps below:

## 1. Create Store View

1. To create store view for any language, go to STORES → All Stores from admin panel.

2. A screen will appear like below, click on **Create Store View** button.

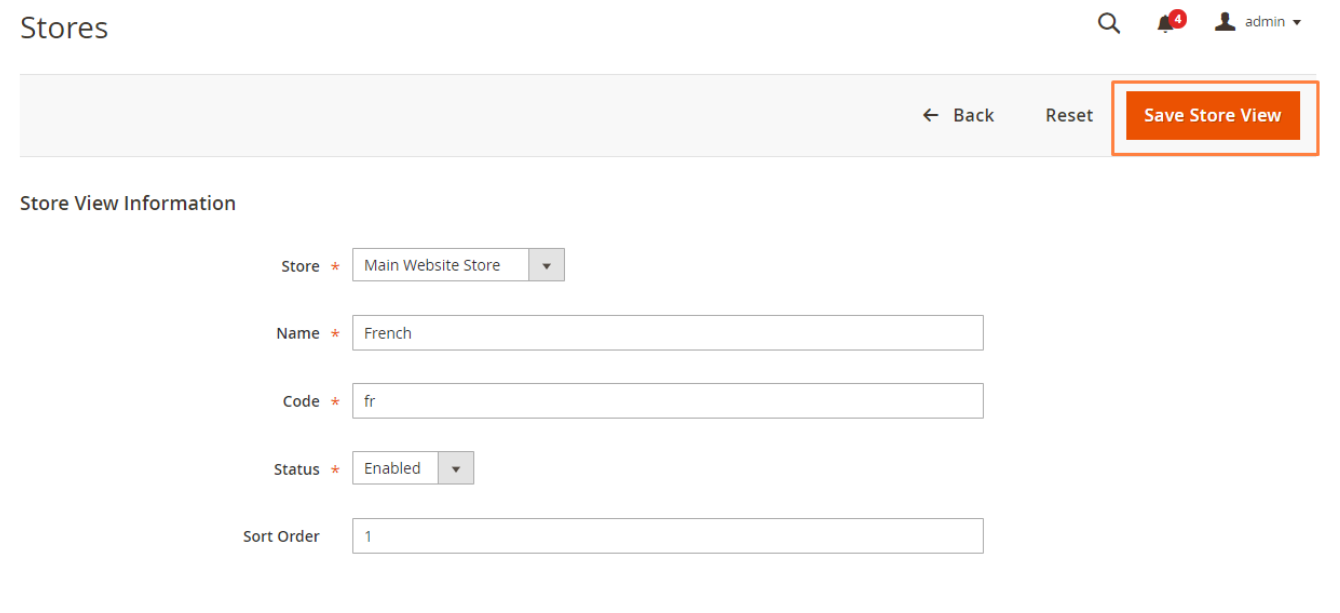

The screenshot shows the 'Stores' management page in Magento. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Products, Customers, Marketing, Content, Reports, Stores, and System. The main header includes the title 'Stores', a search icon, a notification bell with '4', and a user profile 'admin'. Below the header is a toolbar with three buttons: 'Create Store View' (highlighted with an orange box), 'Create Store', and 'Create Website'. A search bar contains '2 records found' and a pagination control shows '20 per page' and '1 of 1'. A table lists existing store views:

Web Site	Store	Store View
Main Website	Main Website Store	Default Store View
Main Website	Main Website Store	German

At the bottom, the footer contains 'Copyright © 2017 Magento, Inc. All rights reserved.', 'Magento ver. 2.1.8', and links for 'Account Activity' and 'Report Bugs'.

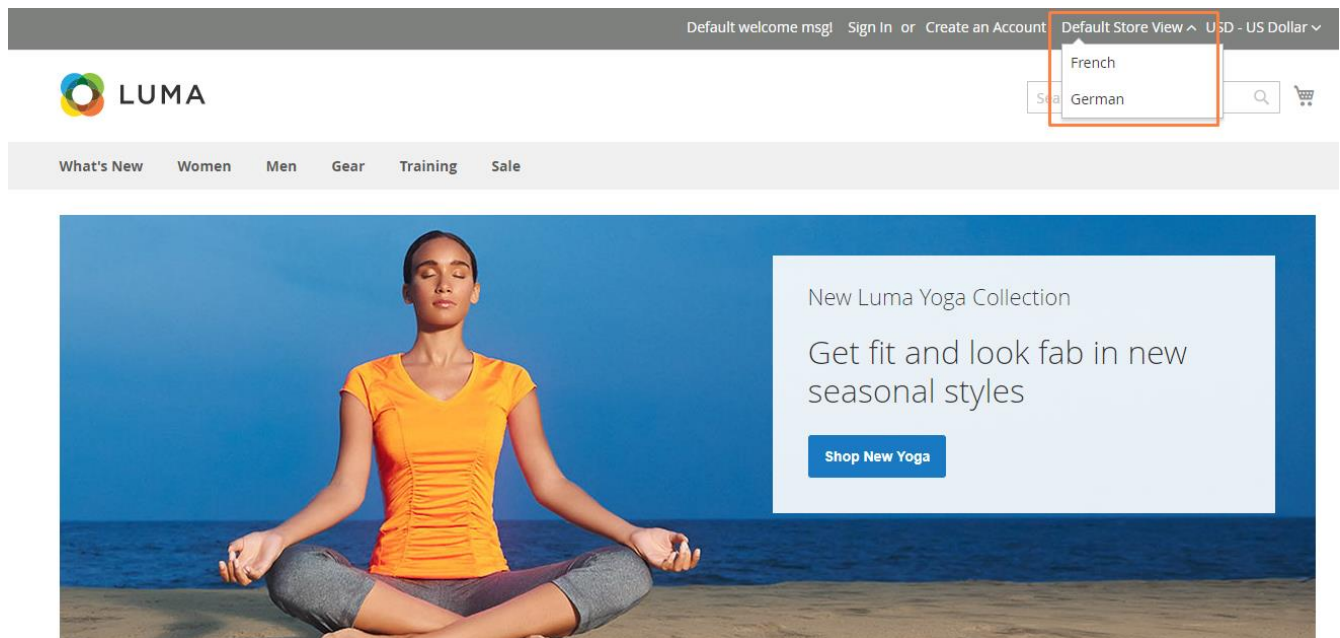

3. A screen will open like below. Fill all the fields and click on **Save Store View** button.

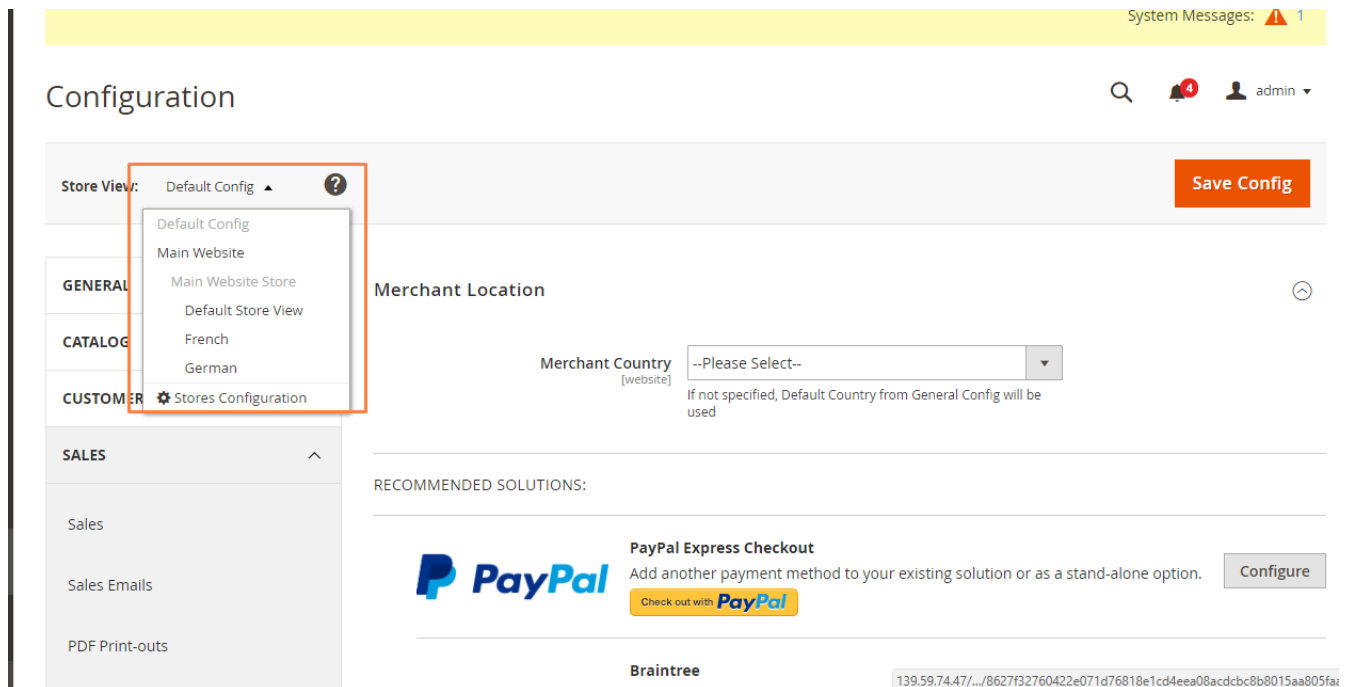

The screenshot shows the 'Create Store View' form. The header is identical to the previous screenshot. The toolbar now includes 'Back', 'Reset', and 'Save Store View' (highlighted with an orange box). The form is titled 'Store View Information' and contains the following fields:

- Store \* (dropdown menu): Main Website Store
- Name \* (text input): French
- Code \* (text input): fr
- Status \* (dropdown menu): Enabled
- Sort Order (text input): 1

4. The store view is saved now and it will appear on frontend now.

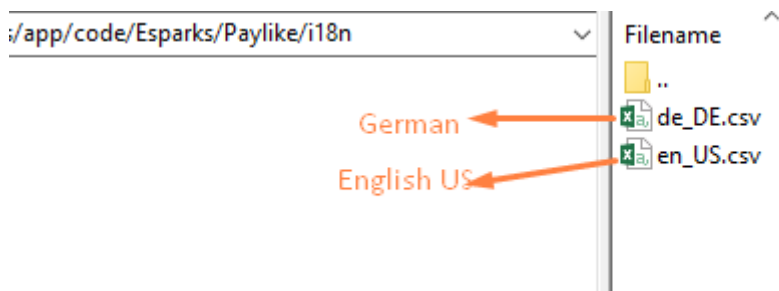

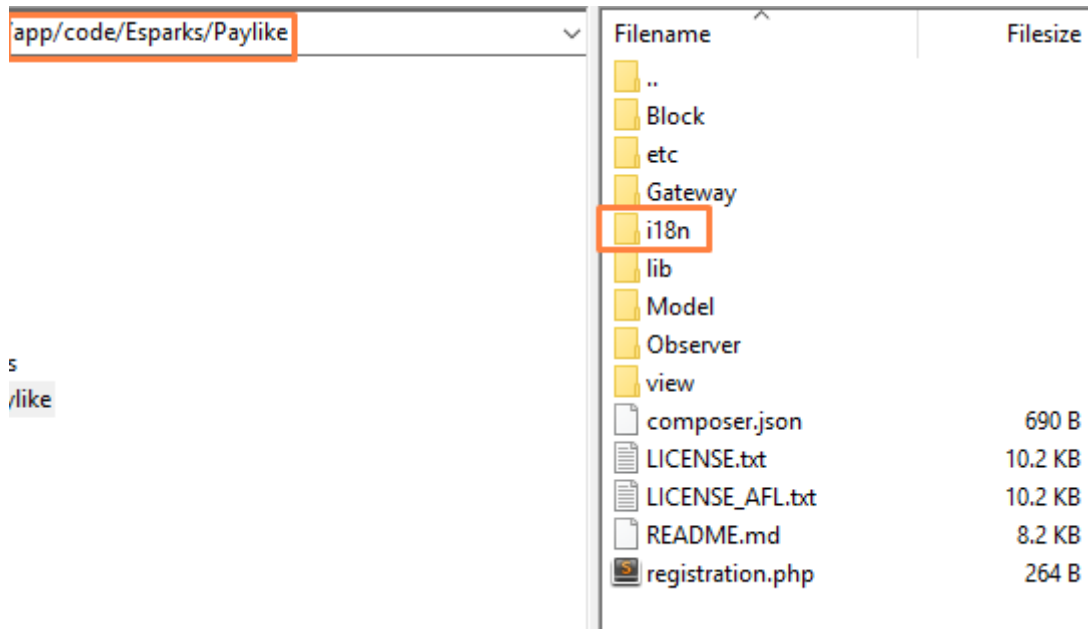

5. On backend, you can change the store view to configure the settings for each type of store view.

## 2. Add translation for Store View

1. Open the i18n folder in module directory. Add .csv file for the language e.g. de\_DE for German.

2. Add translations in the .csv file for your language like below and save the file.

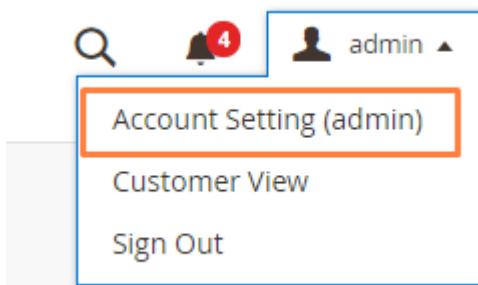

```
de_DE.csv
1 "FRAUD_MSG_LIST","Fraud Messages"
2 "Paylike","Paylike"
3 "Enable Paylike","Ermöglichen Sie Paylike"
4 "Payment method title","Zahlungsmethode Titel"
5 "Payment method credit card logos","Zahlungsart Kreditkarten-Logos"
6 "Payment method description","Zahlungsmethodenbeschreibung"
7 "Payment popup title","Bezahlungs-Popup-Titel"
8 "Transaction mode","Transaktionsmodus"
9 "Test mode Public Key","Testmodus Öffentlicher Schlüssel"
10 "Test mode App Key","Testmodus App-Taste"
11 "Live mode Public Key","Live-Modus Öffentlicher Schlüssel"
12 "Live mode App Key","Live-Modus App-Taste"
13 "Capture mode","Aufnahmemodus"
14 "Checkout mode","Checkout-Modus"
15 "Sort Order","Sortierreihenfolge"
16 "Visa","Visa"
17 "Visa Electron","Visa Electron"
18 "MasterCard","MasterCard"
19 "Maestro","Maestro"
20 "Instant","Sofortig"
21 "Delayed","Verspätet"
```

3. Run this command and clear the cache:

```
php bin/magento setup:upgrade
```

4. On frontend, you can switch to any language and the translations will appear.

5. To change the backend language, you need to tap **admin** on the top right corner and click on **Account Setting (admin)**.

6. Change the **Interface Locale** of your admin panel and click on **Save Account** button.

My Account Reset **Save Account**
