

Extension Installation/Upgrade

To start using M2E Pro Extension in your Magento, you should obviously Install it first. However, M2E Pro Extension has being improved on a constant basis, so the releases of new versions are rather frequent. You can find a detailed information about each version in our [Release Notes](#).

Every new version is carefully checked and tested. Moreover, each release contains fixes and improvements comparing to previous versions along with the new functionalities added. Thus, to achieve the best result from the work with M2E Pro, it is strongly recommended to use the most up-to-date version.

i Please note, no data can be lost during an upgrade process. However, please, always back up your systems prior to any upgrade related activity.

Moreover, there are several methods how the Installation/Upgrade process can be executed available for M2E Pro:

- via **M2E Pro Installation Tool**;
- **Manually** by downloading the archive;
- via **Composer/GitHub**.

Each of these methods has its own specific. So, depending on the particular aspects of your own system, you can select the one which will best suit your needs.
