Walmart Integration

In this tutorial, you will learn how to start selling your Magento Products on Walmart via M2E Pro. You will go through the preliminary set-up requirements and configuration of Walmart integration.

Preliminary requirements

Before you start configuring Walmart integration, please ensure that:

- Your M2E Pro version is **6.5.4 or higher**. Find the detailed information on how to install/upgrade your M2E Pro to the latest version [here](#).
- Your Seller account registration is fully completed and approved by Walmart.

If these requirements are met, you may start configuring Walmart integration.

Initial set-up wizard

The following step-by-step wizard will help you to complete the basic settings of Walmart integration.

Step 1. License set-up

Provide your contact details. These details will be associated with your M2E Pro Extension Key. Once you complete the step, please click **Proceed**.

License Set Up [Step 1]

The data stated below will be used to create M2E Pro License, which is required for M2E Pro Connection.

Email:	email.address@gmail.com
First Name:	admin
Last Name:	admin
Phone:	234214003
Country:	United States
City:	New York
Postal Code:	1001

[Edit](#)

I agree to Terms and [Privacy Policy](#).

Proceed

This information will be sent to M2E Pro for approval.
Read more in our [Privacy Policy](#).

Step 2. Marketplace set-up

Enable the US or/and Canada Walmart sites to sync your Module with the marketplace data. Please wait till the marketplace data is synchronized, then click **Proceed**.

Marketplaces Set Up [Step 2]
 In this Section you can choose the Walmart Marketplaces, on which you are going to sell your Items.

United States: 
▲ walmart.com

Canada: 
▲ walmart.ca

Please Note: you can always enable/disable Marketplaces or resynchronize their data in eBay, Amazon, Walmart > Walmart > Configuration > Marketplaces.

Proceed

Tip

At any time, you can enable/disable the Marketplaces, update the marketplace data under *Walmart > Configuration > Marketplaces*.

Step 3. Account set-up

You need to create an Account to link M2E Pro to your Walmart account on the selected marketplace. Please read more information [here](#). Once the Account is configured, **Proceed** to the next step.

Accounts Set Up [Step 3]
 In this Section you can create Accounts for all the Marketplaces, chosen on the previous step. Those Accounts will be used for Listing creations.

Please Note: you can always add or remove Accounts in eBay, Amazon, Walmart > Walmart > Configuration > Accounts.

Skip **Proceed**

Tip

At any time, you can edit Account configuration under *Walmart > Configuration > Accounts*.

Step 4. Product Identifiers set-up

Provide the SKU and Product ID settings, then press **Proceed**.

Settings Set Up [Step 4]
 In this Section you can choose the Walmart Settings, on which you are going to sell your Items.

SKU Settings

Source: 
 Modification: 
 Generate: 

Product Identifiers

UPC: 
 EAN: 
 GTIN: 
 ISBN: 

Please Note: you can always enable/disable Settings or resynchronize their data in eBay, Amazon, Walmart > Walmart > Configuration > General.

Proceed

Note

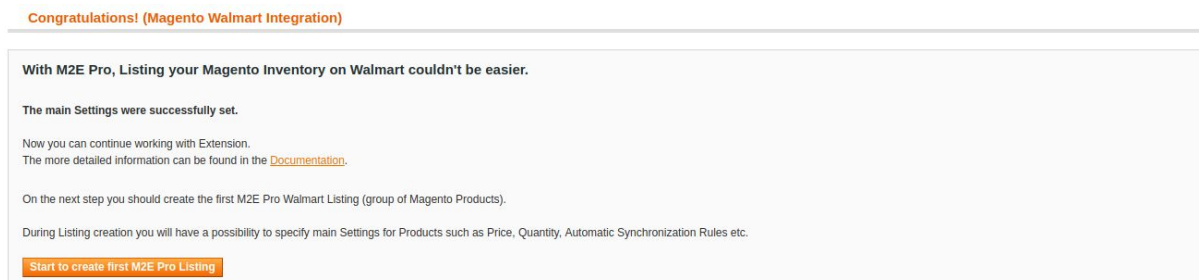

You must specify at least one valid and approved Product ID, i.e. GTIN, UPC, EAN or ISBN. Otherwise, Walmart will not permit to place your offer on their website.

Tip

At any time, you can edit SKU / Product ID settings under *Walmart > Configuration > General*. Please note that these settings affect only the non-listed products.

If you need to change the SKU/Product ID of the already listed products, you can use the *Edit* tool [inside M2E Pro Listing](#).

That's it! The basic configuration is completed:

Now you can move forward – prepare your products to be listed on Walmart. Press **Start to create first M2E Pro Listing** to proceed.

Final configurations

At the final stage, you need to create M2E Pro Listing and place Magento Products into it.

Using M2E Pro Listing you may organize your products into the different groups by certain parameter, e.g. product type, brand, promotion event, etc. The product group approach allows you to share the same description, selling and synchronization settings across all products inside the Listing.

Please complete the following steps:

- Create [M2E Pro Listing](#).
- Assign [M2E Pro Policies](#) to this Listing, i.e. description, selling and synchronization settings.
- [Add Magento Products](#) to M2E Pro Listing.
- Define [Walmart Category](#) for each selected product.

From this point on, M2E Pro starts [managing your products automatically](#).

Tip

If you have any questions, please contact M2E Pro Support Team at support@m2epro.com.

Amazon Integration

In this tutorial, you will learn how to start selling your Magento Products on Amazon via M2E Pro. You will go through the preliminary set-up requirements and configuration of Amazon integration.

Preliminary requirements

Before you start, please ensure that:

- You have installed the **latest version** of M2E Pro. Please read more about [Extension installation/upgrade](#).
- Your Seller account registration is fully completed and approved by Amazon.

If these requirements are met, you may start configuring Amazon integration.

Initial set-up wizard

The following step-by-step wizard will help you to complete the basic settings of Amazon integration.

Step 1. License set-up

Provide your contact details. These are the details that will be associated with your M2E Pro Extension Key. Once you complete the step, please click **Proceed**.

Billing Info Set Up [Step 1]

The data stated below will be used to create M2E Pro Extension Key, which is required for M2E Pro Connection.

Email:	email.address@gmail.com
First Name:	admin
Last Name:	admin
Phone:	123456789
Country:	United States
City:	New York
Postal Code:	1001

[Edit](#)

I agree to Terms and [Privacy Policy](#)

Proceed

This information will be sent to M2E Pro for approval.
Read more in our [Privacy Policy](#).

Step 2. Marketplace set-up

Enable Amazon marketplaces to sync your Module with the marketplace data. Please wait till the marketplace data is synchronized, then click **Proceed**.

Marketplaces Set Up [Step 2]
 In this Section you can choose the Amazon Marketplaces, on which you are going to sell your Items.

United States:	<input type="text" value="Enabled"/>
	<small>amazon.com</small>
Mexico:	<input type="text" value="Disabled"/>
	<small>amazon.com.mx</small>
Australia:	<input type="text" value="Disabled"/>
	<small>amazon.com.au</small>
United Kingdom:	<input type="text" value="Disabled"/>
	<small>amazon.co.uk</small>
Germany:	<input type="text" value="Disabled"/>
	<small>amazon.de</small>
Italy:	<input type="text" value="Disabled"/>
	<small>amazon.it</small>
France:	<input type="text" value="Disabled"/>
	<small>amazon.fr</small>
Spain:	<input type="text" value="Disabled"/>
	<small>amazon.es</small>
Canada:	<input type="text" value="Disabled"/>
	<small>amazon.ca</small>

Please Note: you can always enable/disable Marketplaces or resynchronize their data in eBay, Amazon, Walmart > Amazon > Configuration > Marketplaces Tab.

Tip

At any time, you can enable/disable the Marketplaces, update the marketplace data under *Amazon > Configuration > Marketplaces*.

Step 3. Account set-up

You need to create an Account to link M2E Pro to your Amazon account on the selected marketplace. Please read more information [here](#). Once the Account is configured, click **Complete this Step**.

Accounts Set Up [Step 3]
 In this Section you can create Accounts for all the Marketplaces, chosen on the previous step. Those Accounts will be used for Listing creations.

Please Note: you can always add or remove Accounts under Amazon > Configuration > Accounts.

Tip

At any time, you can edit Account configuration under *Amazon > Configuration > Accounts*.

Click **Complete Configuration** to save the basic settings.

Congratulations! (Magento Amazon Integration)

With M2E Pro, Listing your Magento Inventory on Amazon couldn't be easier.

The main Settings were successfully set.

Now you can continue working with Extension.
 The more detailed information can be found in the [Documentation](#).

On the next step you should create the first M2E Pro Amazon Listing (group of Magento Products).

During Listing creation you will have a possibility to specify main Settings for Products such as Price, Condition, Quantity, Automatic Synchronization Rules etc.

Now you can move forward – prepare your products to be listed on Amazon. Press **Start to create first M2E Pro Listing** to proceed.

Final configurations

At the final stage, you need to create M2E Pro Listing and place Magento Products into it.

Using M2E Pro Listing you may organize your products into the different groups by certain parameter, e.g. product type, brand, promotion event, etc. The product group approach allows you to share the same selling and synchronization settings across all products inside the Listing.

Please complete the following steps:

- Set up **M2E Pro Listing** and assign **Selling, Synchronization** Policies to the Listing.
- **Add Magento Products** to M2E Pro Listing.
- Assign M2E Pro Policies to the selected Listing Products, e.g. you can set up:
 - **Description Policy** for a product to **create a new ASIN** in the Amazon catalog.
 - **Product Tax Code Policy** to list the product on **Amazon Business** Europe.
 - **Shipping Policy** to apply **Amazon Shipping Templates** to the product.

From this point on, M2E Pro starts managing your products automatically.

Tip

If you have any questions, please contact M2E Pro Support Team at support@m2epro.com.

eBay Integration

In this tutorial, you will learn how to start selling your Magento Products on eBay via M2E Pro. You will go through the preliminary set-up requirements and configuration of eBay integration.

Preliminary requirements

Before you start, please ensure that:

- You have installed the **latest version** of M2E Pro. Please read more about [Extension installation/upgrade](#).
- Your Seller account registration is fully completed and approved by eBay.

If these requirements are met, you may start configuring eBay integration.

Initial set-up wizard

The following step-by-step wizard will help you to complete the basic settings of eBay integration.

Step 1. License set-up

Provide your contact details. These are the details that will be associated with your M2E Pro Extension Key. Once you complete the step, please click **Proceed**.

Please ensure your personal information is correct

Email:	email.address@gmail.com
First Name:	admin
Last Name:	admin
Phone:	234214003
Country:	United States
City:	New York
Postal Code:	10001

[Edit](#)

I agree to Terms and [Privacy Policy](#).

This information will be sent to M2E Pro for approval.
Read more in our [Privacy Policy](#).

Step 2. Link M2E Pro to your eBay account

Select whether you want to onboard your Live or Sandbox account, then sign in.

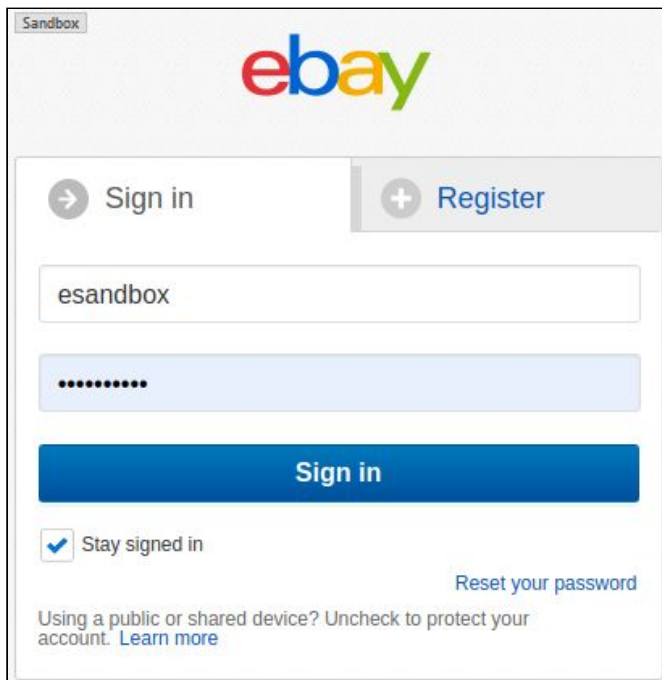

Please sign into eBay to link M2E Pro to your eBay Account and proceed to the next step.

[Sign Into eBay](#) or [Sign into eBay Sandbox](#)

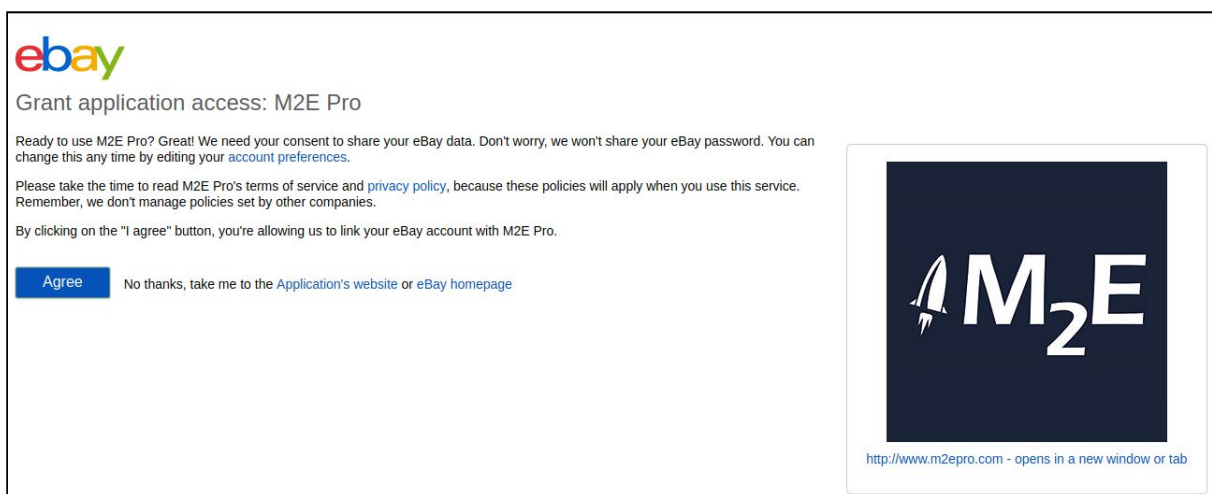

If you don't have an eBay Account, please create one. It's easy and fast.

[Register for eBay](#)

You will be redirected to eBay. Please enter the credentials of the selected account and click **Sign In**.

Click **Agree** to grant M2E Pro access to your eBay account data.

M2E Pro eBay Account will be created automatically. Please read more information [here](#).

Tip

At any time, you can edit Account configuration under *eBay > Configuration > Accounts*.

Tip

At any time, you can enable/disable the Marketplaces, update the marketplace data under *eBay > Configuration > eBay Sites*.

Step 3. Select M2E Pro Mode

Simple Mode has a basic set of configurations and predefined synchronization settings.

Advanced Mode allows you to apply various pricing and stock management strategies, flexible synchronization settings, etc.

Please click **Continue** to proceed.

Please select an M2E Pro Mode

There are two modes available to you.
We have chosen the Mode we think is most suitable for you, based on your selling history, but you can change this if you prefer.

Simple (Suitable for new Users and for those with a limited Inventory.)

Advanced (Suitable for the more experienced user.)

If you're not sure which Mode to choose, go for the Simple Mode. Don't worry you can change it later in *eBay > Configuration > General*

Continue

Tip

At any time, you can change the Mode under *eBay > Configuration > General*.

Step 4. Account set-up

Provide settings for the 3rd Party Item and Customer Feedback importing. Please find more details [here](#).

Congratulations, you have successfully linked your eBay Account to M2E Pro.

You can change it if you need.

Import 3rd Party Items: No

Import Feedback: No

[Edit](#)

Now, create an M2E Pro Listing. This will allow you to define specific Settings on eBay.

[Create an M2E Pro Listing](#)

Tip

At any time, you can edit Account configuration under *eBay > Configuration > Accounts*.

Congratulations! The basic configuration is completed. Now you can move forward – prepare your products to be listed on Walmart. Press **Create an M2E Pro Listing** to proceed.

Final configurations

At the final stage, you need to create M2E Pro Listing and place Magento Products into it.

Using M2E Pro Listing you may organize your products into the different groups by certain parameter, e.g. product type, brand, promotion event, etc. The product group approach allows you to share the same selling, payment, shipping, synchronization, etc. settings across all products inside the Listing.

Please complete the following steps:

- Set up [M2E Pro Listing](#), i.e. define payment, shipping, return, selling, description, synchronization, etc. settings.
- [Add Magento Products](#) to M2E Pro Listing.
- Assign [eBay Category](#) to the products and define the relevant [Specifics](#).

From this point on, M2E Pro starts managing your products automatically.

Tip

If you have any questions, please contact M2E Pro Support Team at support@m2epro.com.
