

Features of Bulk Price Update for Magento:

- Ability to update prices for multiple products selected via Catalog -> Manage Products in Admin Panel
- The prices can be increased or decreased by percentage or constant amount.

Usage of Bulk Price Update for Magento:

- In Admin Panel open Catalog -> Manage Products
- With the checkboxes in the very left column select the products you would like to update or Select All
- In the top right of the table, there is an "Actions" selector, select "Update attributes" there and "Submit"
- On the left side select "Prices" tab. Then specify how the prices should be changed and "Save"
- That's it. Thanks.
