Installation Guide	3
--------------------------	---

Installation

There are two ways of installing extension in magento2.

- Using COMMAND LINE.
- Manually Install extension.

Option 1: Magento 2 install extension using COMMAND

LINE (Recommended) Follow below steps to install extension from the command line.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory If code directory does not exists then create.

Step 3: Disable the cache under System -> Cache Management.

Step 4: Enter the following at the command line: `php bin/magento setup:upgrade`

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration-> Advanced -> Advanced, the module will be displayed in the admin panel.

Option 2: Magento 2 install extension manually

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory. If code directory does not exist then create.

Step 3: Disable the cache under System -> Cache Management. Edit app/etc/config.php file and add one line code:
`'Mageants_ShippingPerProduct'=> 1`

Step 4: Disable the cache under System -> Cache Management

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to Stores -> Configuration->Advanced -> Advanced, the module will be displayed in the admin panel.

Thank you!
