Introduction

The Checkout Sign Up extension will allow guest user to create customer account automatically on order success and send email of further instruction. There is one checkbox below email field if user wants to create customer account in site. It will make user's next checkout easy.

Installation

- Backup your web directory and store database
- Download extension installation package
- Disable Magento Cache run command "**php bin/magento cache:disable**" using SSH from your magento root directory
- Upload contents of the extension installation package to your "**app/code/MageArray/CheckoutSignup**", directory
- Then run commands "**php bin/magento setup:upgrade**" using SSH from your magento root directory
- Enable Magento Cache run command "**php bin/magento cache:enable**" using SSH from your magento root directory

Usage

Admin

Checkout Sign Up Configuration

To configure the Checkout Sign Up Extension for Magento, navigate to **Stores >> Settings >> Configuration >> MageArray Extensions >> Checkout Signup**

The screenshot shows the Magento Admin Configuration interface. At the top, the word "Configuration" is displayed on the left, and search, notification (6), and user (admin) icons are on the right. Below this is a "Store View" dropdown set to "Default Config" with a help icon, and a red "Save Config" button. A left sidebar contains a menu with categories: GENERAL, CATALOG, CUSTOMERS, MageArray Extensions (expanded), Checkout Signup (selected), SALES, DOTMAILER, SERVICES, and ADVANCED. The main content area is titled "Checkout Signup" and features a single configuration option: "Enable Extension [store view]" with a dropdown menu currently set to "Yes".

Settings

- **Enabled** - Activate or Deactivate the Extension.

Frontend

Sign Up on Checkout Page

There is one checkbox in the checkout shipping step. If that is selected while checkout then it will create customer account and also attach the current order with that customer account and further instruction will be mailed in user's email address from where the user can set a password for his account.

Checkbox is invisible if entered email address is already registered on the site.
