Introduction

The fact that a lot of information is required when creating a new account can discourage Customers from doing so on your site. However, most of them already have social accounts such as Facebook, Google, Yahoo, Twitter, LinkedIn, Live etc. Why don't you enable them to use such accounts to log in by using our Social Login extension? Customers just need to click on the account button they like, and then enter their username and password! For more information about this extension please visit MageArray.com

Installation

- Backup your web directory and store database
- Download extension installation package
- Disable Magento Cache run command "**php bin/magento cache:disable**" using SSH from your magento root directory
- Upload contents of the extension installation package to your store root directory
- Then run commands "**php bin/magento setup:upgrade**" using SSH from your magento root directory
- Enable Magento Cache run command "**php bin/magento cache:enable**" using SSH from your magento root directory

Usage

General Configurations

To configure the Social Login extension for magento 2, navigate to **Stores >> Settings >> Configuration >> MageArray Extensions >> Social**

The screenshot shows the 'Configuration' page in the Magento 2 admin interface. The breadcrumb trail is 'Stores >> Settings >> Configuration >> MageArray Extensions >> Social'. The page title is 'Configuration'. The 'Store View' is set to 'Default Config'. A red speech bubble highlights the 'Social Login System Config (General Options)' section. The 'General Options' section contains five settings, all set to 'Yes':

Setting	Value	Scope
Enabled Social Login	Yes	[STORE VIEW]
Show On Login Page	Yes	[STORE VIEW]
Show On Checkout Page	Yes	[STORE VIEW]
Show On Create Account Page	Yes	[STORE VIEW]
Show Button with Label?	Yes	[STORE VIEW]

Below the 'General Options' section are several expandable sections for social media connect options: Facebook Connect Options, Google Connect Options, Twitter Connect Options, LinkedIn Connect Options, Yahoo Connect Options, and Live/Windows Connect Options.

Login .

Social Login Tab

- Enabled Social Login – Activate or Deactivate the Extension (by default it's activate).
- Show On Login Page – Show social icons for login on customer login page.
- Show On Checkout Page – Show social icons for login on checkout page.
- Show On Create Account Page – Show social icons for login on customer account create page.
- Show Button with Label? – Set yes if you want a text with icon on social login buttons.

Facebook Connect

Facebook Connect Options Tab

- Enabled– Activate or Deactivate the Login Using Facebook Account.
- Application ID – Application ID for your site generated by Facebook.
- Application Secret – Application Secret for your site generated by Facebook along with Application ID.

How to Get Facebook Credentials

- Go to <https://developers.facebook.com/> and login to your facebook account.
- After successfully login click on Register button from top right corner.
- It opens a popup accept the privacy policy and click on register button.
- From next page select the App platform as Website.
- Give a name to your app for eg. 'MageArray' and create new Facebook App ID.
- Choose category of your business or website and click on Create App ID.
- Add your website URL at the bottom of the page and click Next.
- From Next Steps click on Skip to Developer Dashboard.
- Now on Dashboard you can see Application ID Copy that and paste it Under Facebook Connect Options Tab's Application ID box.
- To see App Secret click on show button and copy that App Secret Under Facebook Connect Options Tab's Application Secret box and save configuration.
- Now on facebook dashboard Go to Settings -> Advanced -> Client OAuth Settings and add redirect URI (<http://www.yourdomain.com/sociallogin/facebook/connect>) in Valid OAuth redirect URIs and save changes.
- Now your customer can login to your site using their Facebook Account.

Google Connect

Google Connect Options Tab

- Enabled– Activate or Deactivate the Login Using Google Account.
- Client ID – Client ID for your site generated by Google.
- Client Secret – Client Secret for your site generated by Google along with Client ID.

How to Get Google Credentials

- Go to <https://console.developers.google.com/projectselector/apis/credentials> and login to your google account.
- Add Project Name for eg. 'MageArray' and accept Terms of Service and click on Create.
- From next page click on create credentials and choose OAuth client ID.
- Click on Configure product name button and add Product Name for eg. 'MageArray' and fill all the fields you want to show to your customers and save.
- Choose Application Type as Web Application then add Name, your website url and redirect URI(<http://www.yourdomain.com/sociallogin/google/connect>) and click on create.
- Now one popup opens with your Client ID and Client Secret. Add that Under Google Connect Options Tab's Client ID and Client Secret respectively and save configuration.
- Now your customer can login to your site using their Google Account.

Twitter Connect

Twitter Connect Options Tab

- Enabled– Activate or Deactivate the Login Using Twitter Account.
- Consumer ID – Consumer ID for your site generated by Twitter.
- Consumer Secret – Consumer Secret for your site generated by Twitter along with Consumer ID.

How to Get Twitter Credentials

- Go to <https://apps.twitter.com/> and login to your Twitter Account.
- Click Create new app button from the page
- Add Name for eg. 'MageArray', Description, Website and Callback URL (<http://www.yourdomain.com/sociallogin/twitter/connect>).
- Read Developer Agreement and Click on Create your twitter application.

- After successfully creating application from twitter click on Keys and access tokens tab and copy Consumer Key and Consumer Secret and add it Under Twitter Connect Options Tab's Consumer ID and Consumer Secret and save configuration.
- Now your customer can login to your site using their Twitter Account.

Linkedin Connect

Linkedin Connect Options Tab

- Enabled– Activate or Deactivate the Login Using Linkedin Account.
- Api Key – Api Key for your site generated by Linkedin.
- Secret Key – Secret Key for your site generated by Linkedin along with Api Key.

How to Get Linkedin Credentials

- Go to <https://www.linkedin.com/developer/apps> and login to your Linkedin Account.
- Click Create Application button from the page
- Add details in the shown form and Submit the application.
- After submitting the form you will get Client ID and Client Secret add that Under Linkedin Connect Options Tab's Api Key and Secret Key respectively and save configuration.
- From linkedin app page check the box of r_emailaddress and r_basicprofile under Default Application Permissions.
- Add Authorized Redirect URLs (<http://www.yourdomain.com/sociallogin/linkedin/connect>) under OAuth 2.0 and update the app.
- Now your customer can login to your site using their Linkedin Account.

Yahoo Connect

Yahoo Connect Options Tab

- Enabled– Activate or Deactivate the Login Using Yahoo Account.
- Consumer ID – Consumer ID for your site generated by Yahoo .
- Consumer Secret – Consumer Secret for your site generated by Yahoo along with Consumer ID.

How to get Yahoo Credentials

- Go to <https://developer.yahoo.com/apps/> and login to your Yahoo Account.
- Click Create an app button from the page
- Add Name for eg. 'MageArray', Description, Website and Callback URL (<http://www.yourdomain.com/>).
- In API Permission check Profiles and select Read/Write Public and Private and click create.
- After successfully creating application you can see copy Client ID and Client Secret and add it Under Yahoo Connect Options Tab's Consumer ID and Consumer Secret and save configuration.
- Now your customer can login to your site using their Yahoo Account.

Live/Windows Connect

Live/Windows Connect Options Tab

- Enabled– Activate or Deactivate the Login Using Live/WindowsAccount.
- Client ID – Client ID for your site generated by Live/Windows.
- Client Secret – Client Secret for your site generated by Live/Windows along with Client ID.

How to get Live/Windows Credentials

- Go to <https://account.live.com/developers/applications/> and login to your Live/Windows Account.
- Click Create application button from the page
- Add Application Name and click I Accept.
- Fillup the form and save the basic information and click on api settings tab.
- Add target domain and redirect url (<http://www.yourdomain.com/sociallogin/live/connect>) and save that tab.
- Now goto App Settings tab there you can see copy Client ID and Client Secret and add it Under Live/WindowsConnect Options Tab's Client ID and Client Secret and save configuration.
- Now your customer can login to your site using their Yahoo Account.

Social Login Icons Only

Login Page

The screenshot shows the front-end of the MageArray login page. At the top, there is a dark grey navigation bar with the text "Default welcome msg! Sign In or Create an Account". Below this is the MageArray logo and a search bar with the placeholder text "Search entire store here...". A red callout bubble with white text points to the social login icons, stating "Social Login Buttons icons only on Magento Login Page". The main heading is "Customer Login". Underneath, there are social login options for Facebook, Google+, Twitter, Yahoo!, and Windows. The page is divided into two sections: "Registered Customers" and "New Customers". The "Registered Customers" section includes a form with fields for "Email *" and "Password *", a "Login" button, and a link for "Forgot Your Password?". The "New Customers" section includes a "Create an Account" button. A red asterisk at the bottom left indicates "* Required Fields".
