Overview

Online booking trend is growing. Normally every hotels will have their own website for booking. However, the independent operation not bring higher business efficiency than a really bigger system. Booking systems are growing larger. Based on the needs of users, Magebay providing you Magento Booking System Pro Extension. Magento Booking Extension is smart and flexible system.

With just a few simple steps and take a little time to set up, the user has a massive system with sufficient information about the hotel, room, facilities, services, booking type, orders, customers.

Magento Booking System providing you four types of booking:

- ✚ Hourly Booking
- ✚ Daily Booking
- ✚ Hotel Booking
- ✚ Hours Intervals Booking

Installation

The installation of the extension has never been easier. We definitely set Booking System Pro is an extremely easy job.

You can buy our Booking System Pro Extension at <https://bookingsystempro.com/>. After finish the order, customer can login customer account and download pakage. Then following this step to start installing Magento Booking Extension

Step 1: Unpack the contents of the "Magebay_BookingSystemPro.zip" folder that you have downloaded.

Step 2: Use FTP client (such as Filezilla, WinSCP, cuteFtp) to upload or copy all folders in the extension to your Magento site root folder. This will not overwrite any existing file; just add new files to the folder structure.

Step 3: After uploading process is done then follow the mentioned steps below:

- Open command prompt and change directory to your magento install directory
- Run the following command in command prompt:

```
php bin/magento module:enable Magebay_Bookingsystem
```

```
Info: Some modules might require static view files to be cleared. To do this, run 'module:enable' with the --clear-static-content option to clear them.

C:\wamp64\www\magento2>php bin/magento module:enable Magebay_Marketplace
The following modules have been enabled:
- Magebay_Marketplace

To make sure that the enabled modules are properly registered, run 'setup:upgrade'.
Cache cleared successfully.
Generated classes cleared successfully. Please run the 'setup:di:compile' command to generate classes.
Info: Some modules might require static view files to be cleared. To do this, run 'module:enable' with the --clear-static-content option to clear them.

C:\wamp64\www\magento2>php bin/magento module:enable Magebay_Messages
The following modules have been enabled:
- Magebay_Messages

To make sure that the enabled modules are properly registered, run 'setup:upgrade'.
Cache cleared successfully.
Generated classes cleared successfully. Please run the 'setup:di:compile' command to generate classes.
Info: Some modules might require static view files to be cleared. To do this, run 'module:enable' with the --clear-static-content option to clear them.

C:\wamp64\www\magento2>_
```

- Then run the following command for setup upgrade:

```
php bin/magento setup:upgrade
php bin/magento setup:static-content:deploy
```

```
c-content option to clear them.

C:\wamp64\www\magento2>php bin/magento setup:upgrade
Cache cleared successfully

- ❑ **Length of reservation:** This type will be available in period of discount time.

✦ **Addons & Cross-sells**

When you have a service like hotel booking, rent, you need more options for your service. In this section, you can add more services and set price for these services.

It supports input type like **Field, Drop Down, Multi Dropdown, Radio Button, Checkbox**

The screenshot displays the Magento booking system's service management interface. It features a table with columns for 'Title', 'Is Required', and 'Sort Order'. The table lists services such as 'Service', 'Cafe', and 'water'. A modal window is open for editing a service, showing a 'Check In' date field and a 'Service *' section with checkboxes for 'Cafe +\$10.00' and 'water +\$5.00'. A callout box with the text 'Input type will be displayed in frontend' points to the 'Input Type' dropdown menu in the table, where 'CheckBox' is selected.

Title	Is Required	Sort Order
Service	Y	
Cafe		
water		5

Input Type: CheckBox, Field, Drop Down, Multi Dropdown, Radio Button, CheckBox

Service *
 Cafe +\$10.00
 water +\$5.00

Callout: Input type will be displayed in frontend

Booking System Pro in frontend

After configuring the Magento Booking System in backend, now it's time to view the Booking System Pro in the frontend.

5.1. Find Your Booking page

Find Your Booking Page is a page which displays all booking product. Instead of surfing all list and view products from listing, with this page, customers can search booking products via filter by price, by star rating, by facilities, by services, by google map, by google address.

5.1.1 Filter By:

- **By categories:** Customers can search products by categories by select category from Category dropdown. Categories are listed auto from backend.

- **By price:** when customers want to find a product in a price range, this feature is helpful for them. Customers can choose price to search the product

- **By Rating:** the best way to know the quality of product is view the rating of that product. Magento Booking Pro supports user filter product by rating.
