You also should run the Magento in developer mode when you’re extending or customizing it. You can use this command line to show current mode:

```
php bin/magento deploy:mode:show
```

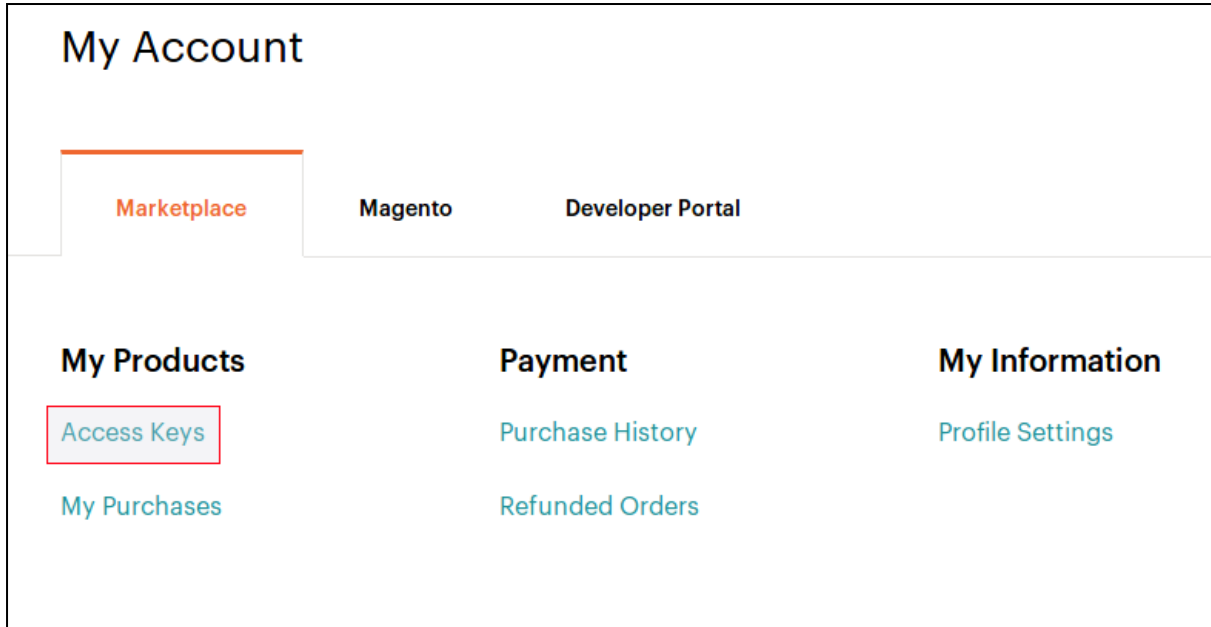

Use this command to change to developer mode:

```
php bin/magento deploy:mode:set developer
```

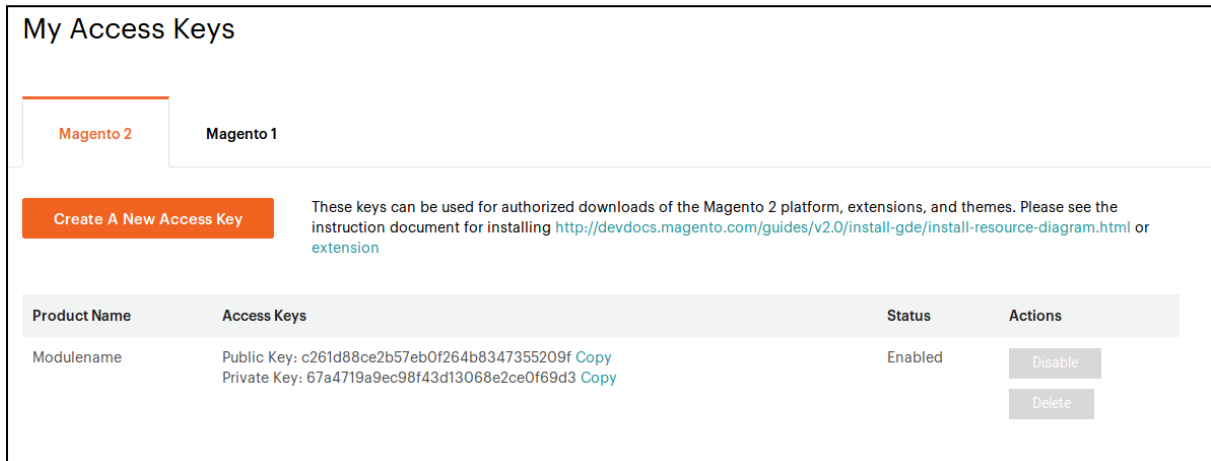

INSTALLATION STEPS

Install Using Web Wizard Setup:

1. Purchase an extension from the Magento Marketplace.
2. Open the 'My Access Keys' page from "My Profile".

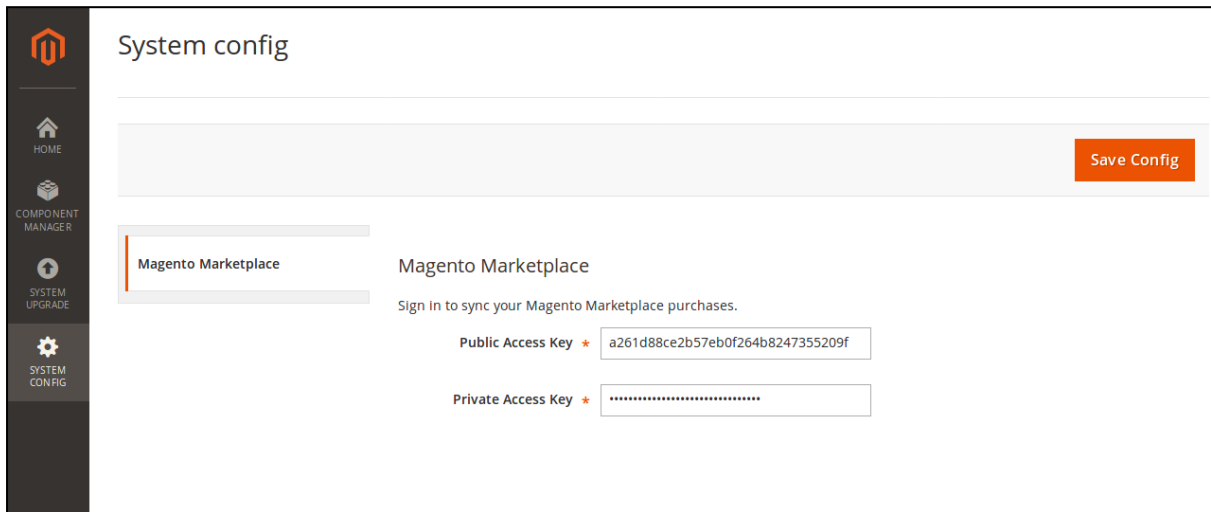

3. Click on the 'Access Keys' button and the keys will be generated automatically.

Step 1: Readiness Check

Let's check your environment for the correct PHP version, PHP extensions, file permissions and compatibility.

Start Readiness Check

Ajax Category Products Extension for Magento 2 By MageBees

<p>Step 1: Readiness Check</p> <p>✓ Completed! You can now move on to the next step.</p> <p>✓ Check Updater Application Availability Updater application is available.</p> <p>✓ Check Cron Scripts Cron script readiness check passed.</p> <p>✓ Check Component Dependency Component dependency is correct.</p> <p>✓ PHP Version Check Your PHP version is correct (7.0.13-1~dotdeb+8.1).</p> <p>✓ PHP Settings Check * Your PHP settings are correct.</p> <p>✓ PHP Extensions Check You meet 15 out of 15 PHP extensions requirements. Show detail</p>	<p>Step 1: Readiness Check</p> <p>✗ Error! You need to resolve these issues to continue.</p> <p>✓ Check Updater Application Availability Updater application is available.</p> <p>✗ Check Cron Scripts Cron script readiness check failed. Hide detail Error from Setup Application Cron Script: Cron job has not been configured yet Other checks will fail as a result (PHP version, PHP settings, and PHP extensions) Error from Updater Application Cron Script: Cron job has not been configured yet For additional assistance, see cron scripts help.</p> <p>✓ Check Component Dependency Component dependency is correct.</p> <p>✗ PHP Version Check Your PHP version is . The required PHP version is . Show detail</p> <p>✗ PHP Settings Check *</p> <p>✗ PHP Extensions Check missing PHP extensions. Hide detail</p>
--	--

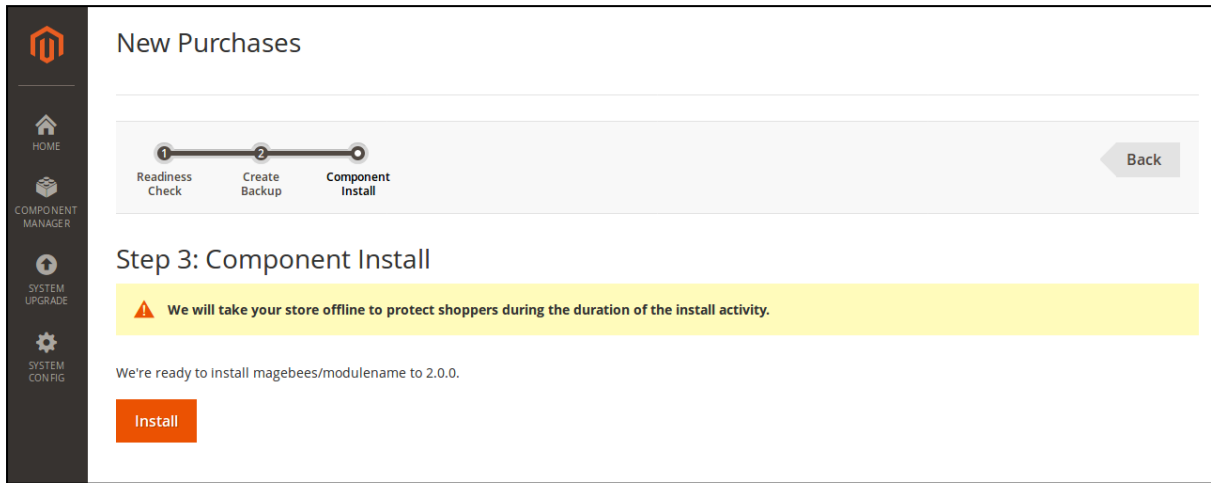

NOTE: During the readiness check process if you find the above errors, please make sure you've configured the cron job for Magento properly. [Here](#) you'll find the information on how to set up the cron job for Magento.

9. Create Backup

The screenshot shows the 'New Purchases' section of the Magento 2 admin interface. A progress bar at the top indicates three steps: 'Readiness Check' (completed), 'Create Backup' (current step), and 'Component Install'. Below the progress bar, the 'Step 2: Create Backup' section is active. It features a 'Backup Options' section with three checked checkboxes: 'Code', 'Media', and 'Database'. A message below the options reads: 'Let's check your disk space availability for taking selected backups, and then create the backups.' At the bottom of this section is a prominent orange 'Create Backup' button. On the left side of the interface, a vertical sidebar contains navigation icons for 'HOME', 'COMPONENT MANAGER', 'SYSTEM UPGRADE', and 'SYSTEM CONFIG'.

Ajax Category Products Extension for Magento 2 By MageBees

10. Install the extension. The installation process takes a couple of minutes.

11. After the installation is complete, you'll see the success page.
