

## How to install MageComp Extensions using composer.

:: Installation User Guide ::

### Table of Content

1. [Get your Marketplace Access API Key](#)
2. [Find Technical Details of Extension Package](#)
3. [Run Commands in Console](#)
4. [Deactivation of Extension in Case of Emergency](#)
5. [Support](#)

## Step – 1: Get your Marketplace Access API key:

- First go to [Marketplace Customer Login Page](#).
- Now login to your Marketplace Account by entering email id and password and if you don't have account yet simply click on [Register](#) button to create new account.

### Log In using your Magento Account

---

#### Registered Users

If you have an account with us, log in using your email address.

\* Email

\* Password

\* Required Fields

#### New Users

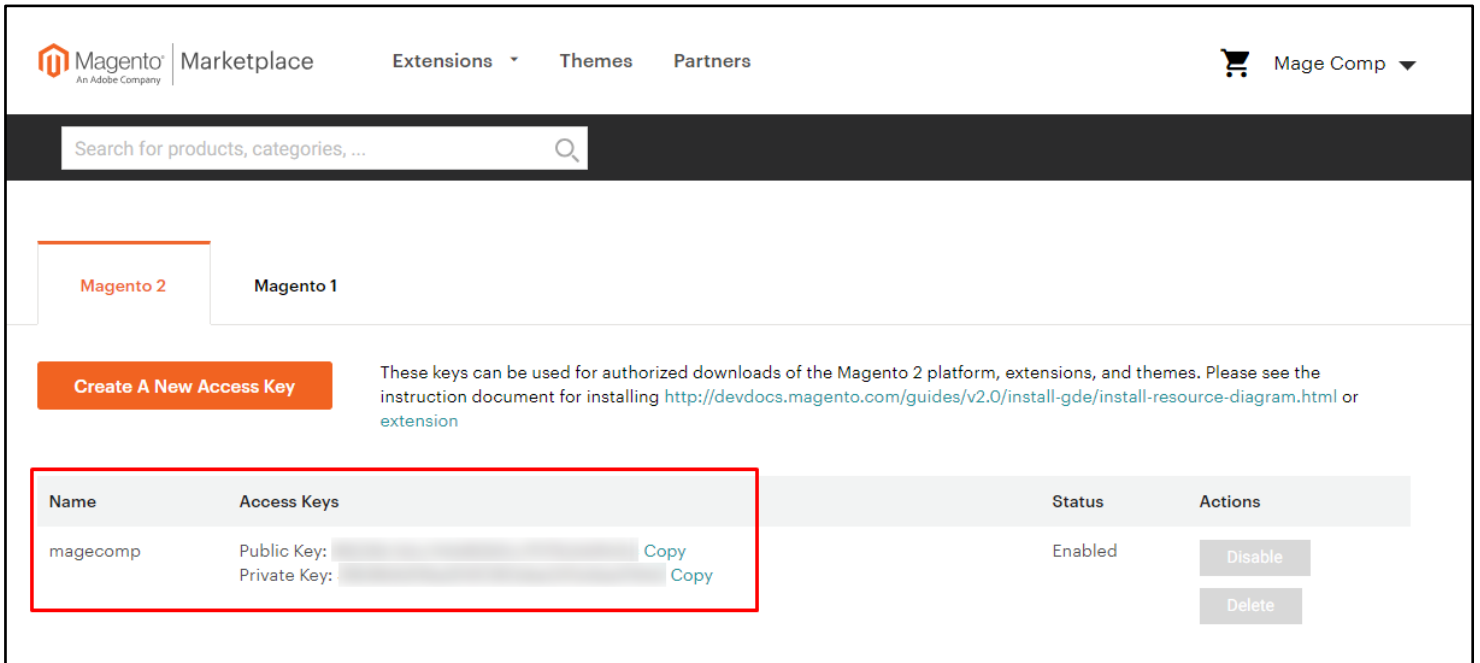

It's simple and quick to register for a new account with Magento.

- Now, click on the top- right corner menu and select “My Profile”
- And then select “Access Keys” link located under “My Products” tab.

The screenshot shows the Magento Marketplace user interface. At the top, there is a navigation bar with the Magento logo, 'Marketplace', and links for 'Extensions', 'Themes', and 'Partners'. On the right, there is a shopping cart icon labeled 'Mage Comp' and a dropdown menu with 'Sign Out' and 'My Profile' (highlighted with a red box). Below the navigation bar is a search bar. The main content area is divided into three columns: 'My Products' (with links for 'Access Keys' and 'My Purchases'), 'Payment' (with links for 'Purchase History' and 'Refunded Orders'), and 'My Information' (with a link for 'Profile Settings'). A red arrow points from the 'My Profile' link in the dropdown menu to the 'Access Keys' link in the 'My Products' column.

- Here, you will have Access Key to your purchase products.

[Create A New Access Key](#)

These keys can be used for authorized downloads of the Magento 2 platform, extensions, and themes. Please see the instruction document for installing <http://devdocs.magento.com/guides/v2.0/install-gde/install-resource-diagram.html> or [extension](#)

Name	Access Keys	Status	Actions
magecomp	Public Key: <input type="text"/> <a href="#">Copy</a> Private Key: <input type="text"/> <a href="#">Copy</a>	Enabled	<a href="#">Disable</a> <a href="#">Delete</a>

### Step – 2: Find Technical Details of Extension Package:

- Again click on the top- right corner menu and select “My Profile”
- And then select “My Purchases” link located under “My Products” tab.

**What is next?**

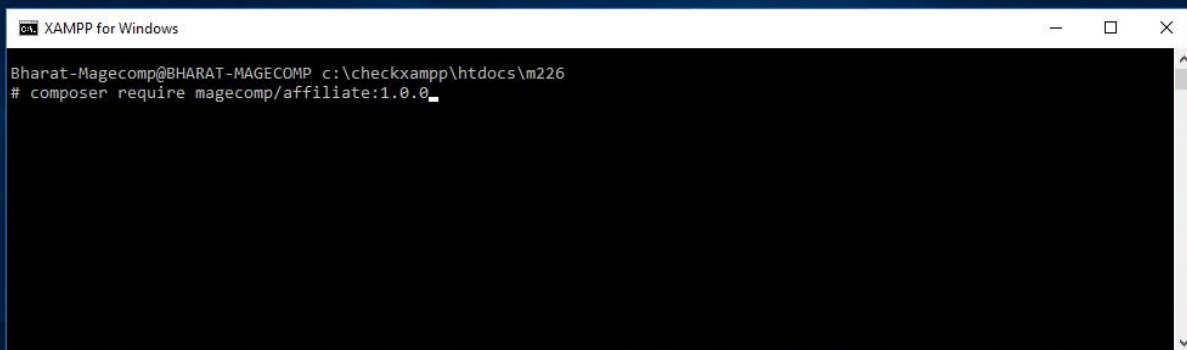

1. Click install extension
2. Once you redirected to Keys page copy private and public access key
3. Login to your store admin panel
4. Go to System > Configurations
5. Add your public and private key
6. Save & refresh your page

### Step – 3 : Run Commands in Console:

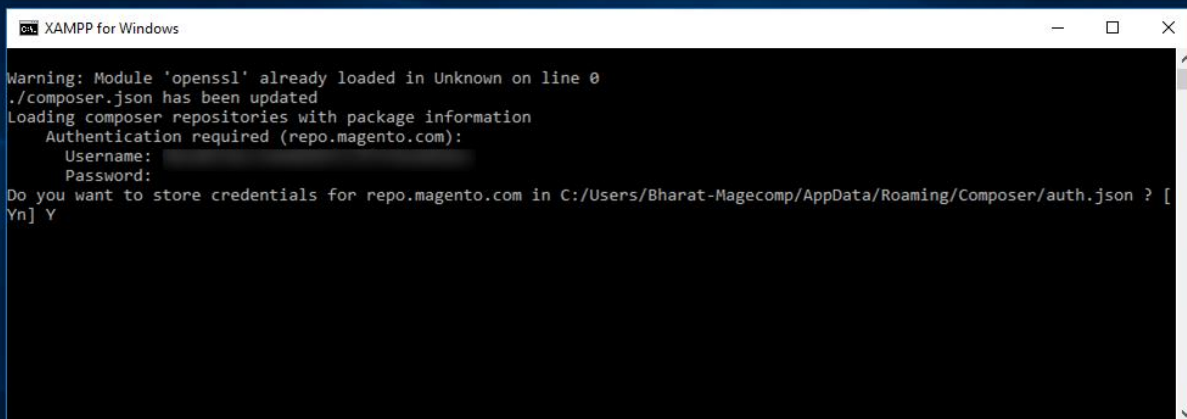

- First make sure that composer is installed on your Magento Sever, if you haven't installed composer yet then simply type "Composer install" command in your console to install composer on your server.
- Now, run command below command followed by your extension name and version of extension that you want to install on your server.

**Composer require <extension name>:<version>**

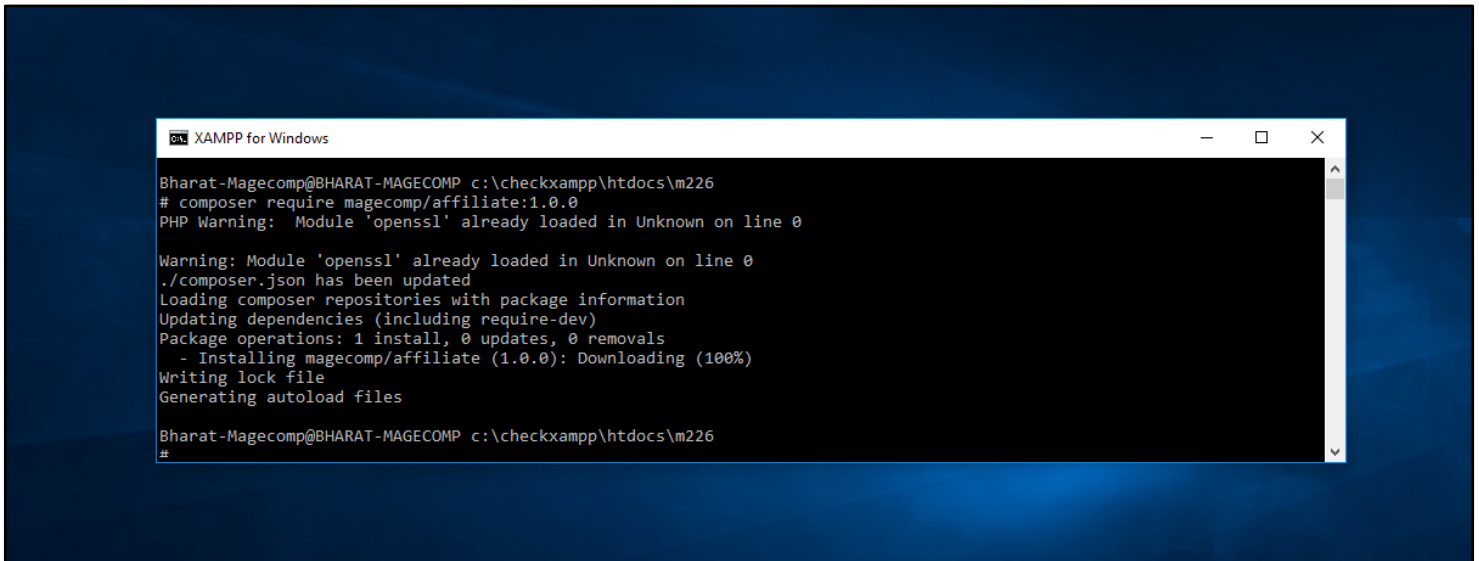

```
XAMPP for Windows
Bharat-Magecomp@BHARAT-MAGECOMP c:\checkxampp\htdocs\m226
# composer require magecomp/affiliate:1.0.0
```

- Now, it will ask you to enter your **public API key as username** and **private API key as password** of your marketplace account.

```
XAMPP for Windows
Warning: Module 'openssl' already loaded in Unknown on line 0
./composer.json has been updated
Loading composer repositories with package information
Authentication required (repo.magento.com):
Username:
Password:
Do you want to store credentials for repo.magento.com in C:/Users/Bharat-Magecomp/AppData/Roaming/Composer/auth.json ? [
Yn] Y
```

- Once you enter required details, simply hit enter and it will start installing extension.

```
XAMPP for Windows
Bharat-Magecomp@BHARAT-MAGECOMP c:\checkxampp\htdocs\m226
# composer require magecomp/affiliate:1.0.0
PHP Warning: Module 'openssl' already loaded in Unknown on line 0

#### Step – 4 : Emergency Console Commands:

**To disable extension in emergency case:**

```
php bin/magento module:disable MODULE_NAME => Module: Disable
```

**To enable Extension after disable:**

```
php bin/magento module:enable MODULE_NAME => Module: Enable
```

**To uninstall extension from Magento server:**

```
php bin/magento module:uninstall MODULE_NAME => Module: Uninstall
```

**To know the current status of Extension:**

```
php bin/magento module:status => Module: Status
```

#### Step – 5 : Support:

Only the extension related issues will be resolved under the support.

Below services are NOT covered with the given support:

1. Compatibility check between Magento and other extensions
2. Extension modification or customization
3. Third-party developer consultations
