

# Alternate Hreflang Tags for Magento 2

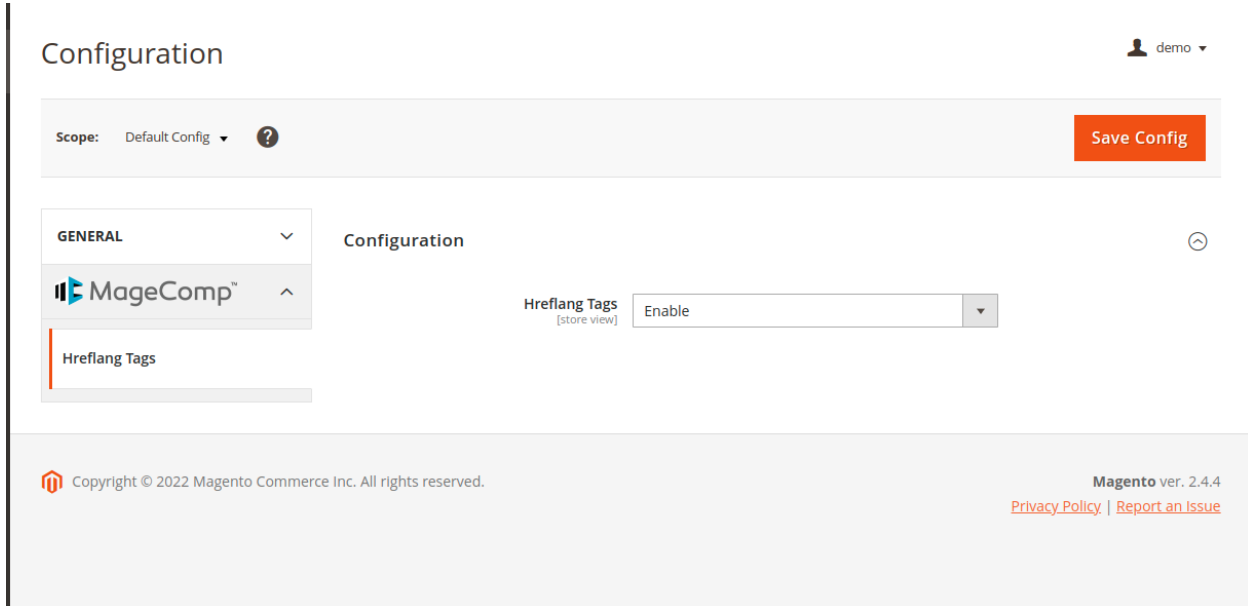

Alternate Hreflang Tag Extension for Magento 2 helps multilingual and multiregional stores to avoid identical content issues by automatically generating alternate hreflang tags and allows the search engines to show relevant websites to relevant audiences.

## Table of Content

1. Configuration
2. Frontend Display of Hreflang Language

## 1. Configuration

Once the extension is installed successfully, go to **Stores > Configuration** to configure the extension for use.

The screenshot shows the Magento Configuration interface. At the top, the title is "Configuration" and the user is logged in as "demo". Below the title, there is a "Scope" dropdown set to "Default Config" and a "Save Config" button. The left sidebar shows the "GENERAL" section expanded, with "Hreflang Tags" selected. The main content area shows the "Hreflang Tags" configuration, with a dropdown menu set to "Enable". At the bottom, the footer contains the copyright notice "Copyright © 2022 Magento Commerce Inc. All rights reserved." and the Magento version "Magento ver. 2.4.4" with links to "Privacy Policy" and "Report an Issue".

**Hreflang Tags:** You can enable or disable the hreflang extension from here. With just one click you can utilize the features of this extension. Once you select the enable option, this extension will automatically be implemented on all the web pages.

Then move to the below path

**Stores -> Configuration -> General -> Currency Setup -> Currency Options**
