1. Extension Installation Guide

- Go to My downloadable products. The file that you download normally is a zip or tgz file.
- It's required to disable cache in the administration panel of your site. Go to System/Cache Management. Choose all caches and take action "Disable" then submit. Also disable the Compilation if it is ON. So, make sure that Caching and Compilation is disabled before installing the extension, you can enable it again after the installation.
- Use FTP client (such as Filezilla, WinSCP, cuteFtp) to upload or copy all folders in the zip package to your Magento site root folder. This will not overwrite any existing files, just add new files to the folder structure.
- You will need to install the extension in your custom theme if you are using. Just make sure about these files to be uploaded in custom theme.
 - app/design/frontend/default/default to app/design/frontend/YourThemeFolder/PackageFolder
 - skin/design/frontend/default/default to skin/design/frontend/YourThemeFolder/PackageFolder
- After uploading is done, enable the Cache and if you keep Compilation On then re-run the Compilation.
- Navigate to System/Configuration, if you can see the extension tab, it is installed properly.
- Now if you get Access denied error when click on the extension tab, you need to log out admin panel and log in again. Go to front-end and try to process, make sure that everything is OK.

2. Configuration

Once you have successfully installed the extension, go to **System → Configuration → Sales → Payment Methods → Alipay Payment** to configure the extension for use. Here you can find various settings for the Alipay Payment method to configure the extension for use.

5. Deactivation of Extension in Case of Emergency

- Go to `app` → `etc` → `config.php` and find '`Magecomp_Alipay`' => 1, and replace 1 with 0.
- If something goes wrong, please contact us at <https://www.magecomp.com/helpdesk> or send us an email at helpdesk@magecomp.com

6. FAQs:

- **What if I get “Access denied” error after installation of the extension?**
Whenever you get Access denied error while clicking on the extension tab after installation, log out admin panel and re-login.

Thank You!
