1. Extension Installation Guide

- Go to My downloadable products. The file that you download normally is a zip file.
- Use FTP client (such as Filezilla, WinSCP, cuteFtp) to upload or copy all folders in the zip package to app/code/Magecomp/ Folder. Please Create the Folders Manually if needed. Extension directory after upload should be app/code/Magecomp/[extension_name]/ inside that block, controller, etc folders.
- Open Command line in folder root of Magento and run following command respectively:
 - php bin/magento setup:upgrade
 - php bin/magento setup:static-content:deploy
 - php bin/magento indexer:reindex
 - php bin/magento cache:flush
- Navigate to Stores/Configuration, if you can see the extension tab, it is installed properly.
- If you need professional help regarding [Magento Extension Installation](#), Feel free to contact us any time.

2. Configuration

Once you have successfully installed the extension, go to **Stores → Configuration** to configure the extension for your use.

- **Enable:** Choose option to enable or disable extension from here.
- **Want to include custom code?:** Using this option you can add your own custom language translation code provided by google.
- **Select Language:** Choose a languages that you want to enable for store translation.
- **Google Translator Layout:** From this dropdown, you can pick language translation style from three different style to display on store frontend.

The screenshot shows the configuration page for the Google Language Translate extension. The page is titled 'Configuration' and has a 'MageComp' logo in the top left. The extension name 'Google Language Translate' is highlighted in the left sidebar. The main configuration area contains four settings:

- Enable** (store view): A dropdown menu set to 'Enable'. An orange box highlights this setting, with an arrow pointing to the text 'Enable extension from here'.
- You Want To Include Custom Code?** (store view): A dropdown menu set to 'Disable'. An orange box highlights this setting, with an arrow pointing to the text 'Choice to add custom language code'.
- Select Language** (store view): A dropdown menu with a list of languages including Afrikaans, Albanian, Arabic, Amharic, Armenian, Azerbaijani, Basque, Belarusian, Bengali, and Bosnian. An orange box highlights this setting, with an arrow pointing to the text 'Choose language to enable on store frontend'.
- Google Translator Layout** (store view): A dropdown menu set to 'Simple Layout'. An orange box highlights this setting, with an arrow pointing to the text 'Select language bar style from here'.

At the bottom of the configuration area, there is a note: 'Allow languages for google translation.'

3. Custom Google Translation Code

You can also integrate custom language translation code provided by Google. Simply visit <https://translate.google.com/manager/website/add> and select languages and style you want to display in store frontend and paste generated code to custom code box.

You Want To Include Custom Code? [store view]

Your Custom Code [store view]

```
<div id="google_translate_element"></div><script
type="text/javascript">
function googleTranslateElementInit() {
  new google.translate.TranslateElement({pageLanguage:
'en', includedLanguages:
'ar,bn,en,es,gu,hi,it,ne,pa,ru,sd,ta,zh-CN', layout:
```

To replace custom language option and to show all languages write this.
Please visit <https://translate.google.com/manager/website/add> For Snippet code

Option to add custom language code provided by Google
