1. Extension Installation Guide

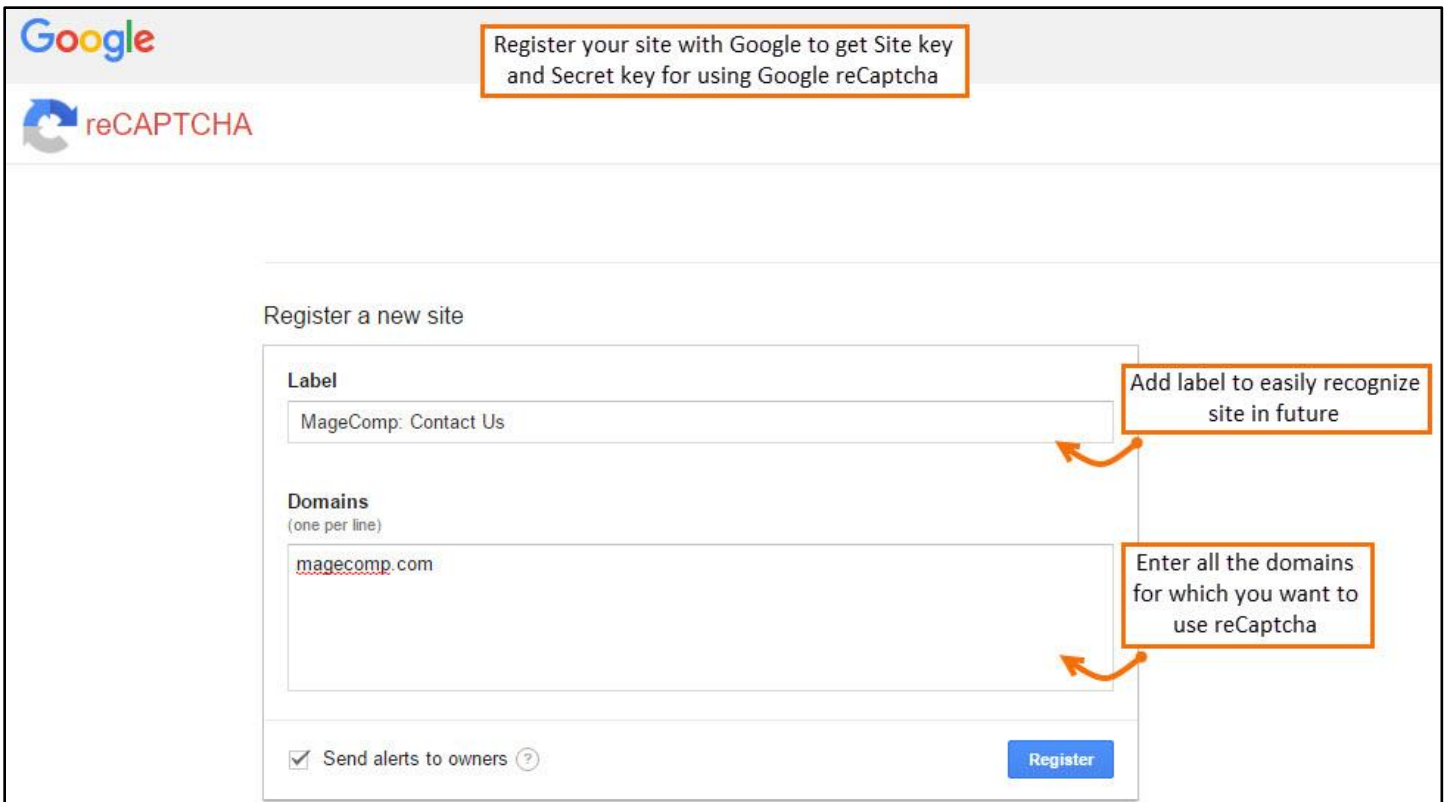

- Go to My downloadable products. The file that you download normally is a zip file.
- Use FTP client (such as Filezilla, WinSCP, cuteFtp) to upload or copy all folders in the zip package to your Magento site root folder. This will not overwrite any existing files, just add new files to the folder structure.
- Open Command line in folder root of Magento and run following command respectively:
 - php bin/magento setup:upgrade
 - php bin/magento setup:static-content:deploy
 - php bin/magento indexer:reindex
 - php bin/magento cache:flush
- Navigate to Stores/Configuration, if you can see the extension tab, it is installed properly.
- If you need professional help regarding [Magento Extension Installation](#), Feel free to contact us any time.

2. Registration for reCAPTCHA

Before you configure the extension for use, you need to register your domains with Google reCAPTCHA. Go to <http://www.google.com/recaptcha/intro/index.html> and click “Get reCAPTCHA”. Here you will find a form to register for reCAPTCHA for use in your domains.

Label: Enter label for the site.

Domains: Enter all the domains for which you want to use reCAPTCHA.

The screenshot shows the Google reCAPTCHA registration interface. At the top, there is a header with the Google logo and a reCAPTCHA logo. A grey banner contains the text: "Register your site with Google to get Site key and Secret key for using Google reCaptcha". Below this is the "Register a new site" form. The form has two main sections: "Label" and "Domains". The "Label" section has a text input field containing "MageComp: Contact Us". The "Domains" section has a text area containing "magecomp.com". At the bottom of the form, there is a checkbox labeled "Send alerts to owners" which is checked, and a blue "Register" button. Two orange callout boxes with arrows point to the form fields: one points to the "Label" field with the text "Add label to easily recognize site in future", and the other points to the "Domains" field with the text "Enter all the domains for which you want to use reCaptcha".

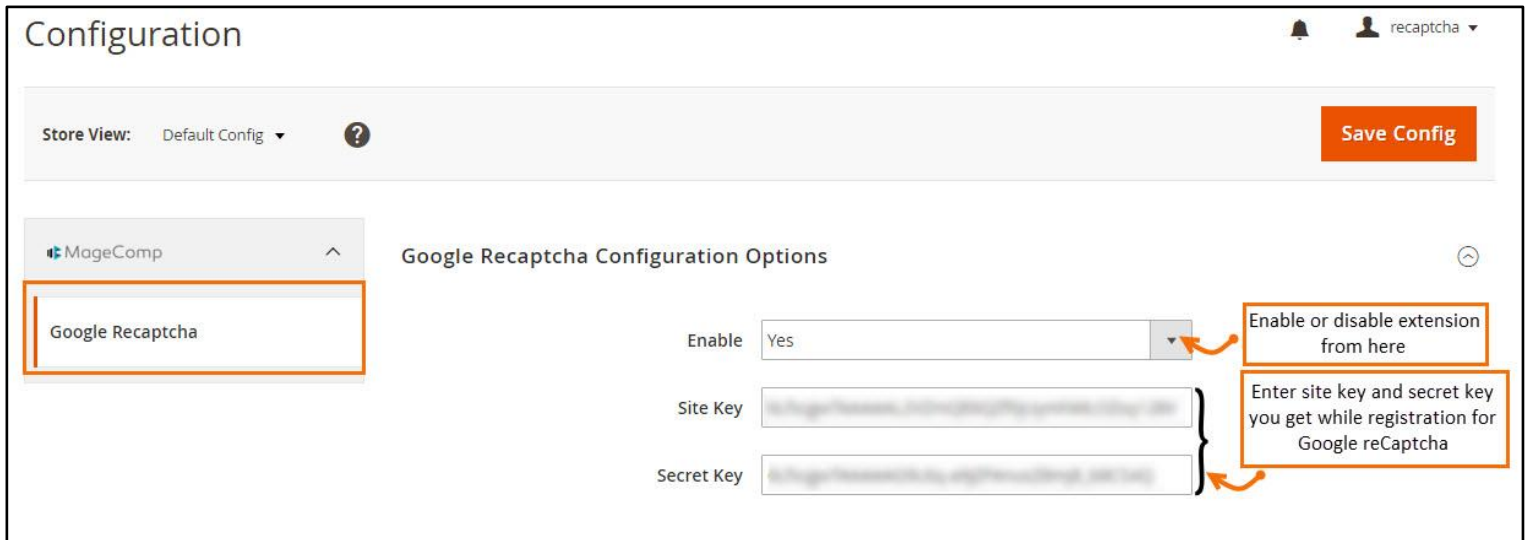

3. Configuration

Once you have successfully installed the extension, go to **Google reCAPTCHA** → **Configuration** to configure the extension for use. Here you can find various settings for the extension.

Enable: Option to enable or disable Google reCAPTCHA extension.

Site Key: Enter site key you have got while registration for Google reCAPTCHA.

Secret Key: Enter secret key you have got while registration for Google reCAPTCHA.

The screenshot shows the configuration page for Google Recaptcha. At the top, there is a 'Store View' dropdown set to 'Default Config' and a 'Save Config' button. Below this, the 'Google Recaptcha' configuration options are displayed. The 'Enable' field is a dropdown menu currently set to 'Yes'. The 'Site Key' and 'Secret Key' fields are text input boxes, both containing placeholder text. Two callout boxes provide instructions: one points to the 'Enable' dropdown with the text 'Enable or disable extension from here', and another points to the 'Site Key' and 'Secret Key' fields with the text 'Enter site key and secret key you get while registration for Google reCaptcha'.

4. Google reCAPTCHA on Frontend

Once you save the configurations, you can see Google reCAPTCHA enabled on the page you have enabled in frontend.

5. Deactivation of Extension in Case of Emergency

- Go to **app->etc->config.php** and find '**Magecomp_recaptcha**' => **1**, and replace 1 with 0.
- If something goes wrong, please contact us at <https://www.magecomp.com/helpdesk> or send us an email at helpdesk@magecomp.com

6. FAQs:

- **Do I need to register my sub domains with Google reCAPTCHA?**
No, while registration for reCAPTCHA, registering domain.com also registers subdomain.domain.com.

Thank You!

Take a look at our other feature rich extensions:

Tier Price Extension for Magento 2 will allow you to display the quantity of tier price in the drop down which you want to let your customer purchase.

SMS Country extension allows you sending text messages to customers to notify about various order status activities.
