## 1. Extension Installation Guide

- Go to My downloadable products. The file that you download normally is a zip file.
- Use FTP client (such as Filezilla, WinSCP, cuteFtp) to upload or copy all folders in the zip package to your Magento site root folder. This will not overwrite any existing files, just add new files to the folder structure.
- Open Command line in folder root of Magento and run following command respectively:
  - php bin/magento setup:upgrade
  - php bin/magento setup:static-content:deploy
  - php bin/magento indexer:reindex
  - php bin/magento cache:flush
- Navigate to Stores/Configuration, if you can see the extension tab, it is installed properly.
- If you need professional help regarding [Magento Extension Installation](#), Feel free to contact us any time.

## 2. Configuration

Once you have successfully installed the extension, go to **Stores → Configuration** to configure the extension for use. Here you can find option to enable the extension.

- **Recent Sales Notification:** Option to enable or disable extension.
- **Notification Popup Text:** Enter notification text to show in frontend popup.
- **Notification Popup Position:** Set position to show notification popup in frontend.
- **Number of Recent Orders to Fetch:** Enter number of recent orders to fetch & show information in notification popup.
- **Popup Display Frequency:** Select display interval for notification popup.

The screenshot shows the 'Configuration' page for the 'Recent Sales Notification' extension. The left sidebar has 'Recent Sales Notification' selected. The main content area contains the following settings:

- Recent Sales Notification:** A dropdown menu set to 'Enable'. A callout box says 'Enable Extension from here'.
- Notification Popup Text:** A text area containing the text: '{{customer\_name}} from {{country\_name}}, Purchase a {{product\_name}} About {{hour}} hours ago.' Below it are the variables: '{{product\_name}},{{customer\_name}},{{country\_name}}, {{hour}}'. A callout box says 'Enter notification text and use custom variable to display in notification popup on frontend'.
- Notification Popup Position:** A dropdown menu set to 'Bottom Right'. A callout box says 'Set position of notification popup in frontend'.
- Number Of Recent Orders to Fetch:** A text input field containing the number '3'. A callout box says 'Enter number of recent orders to show notifications'.
- Popup Display Frequency:** A dropdown menu set to '20 Seconds'. A callout box says 'Select popup display interval'.
- Notification Text Color:** A color picker showing '#594d59'.
- Notification Icon Color:** A color picker showing '#890421'.

A callout box on the right side of the bottom two settings says 'Select Notification popup text and icon color from here.'

- **Notification Text Color:** Select Notification text color to show in store frontend popup notification.
- **Notification Icon Color:** Select icon color to display in frontend sales feed popup.

### 3. Layout Setting

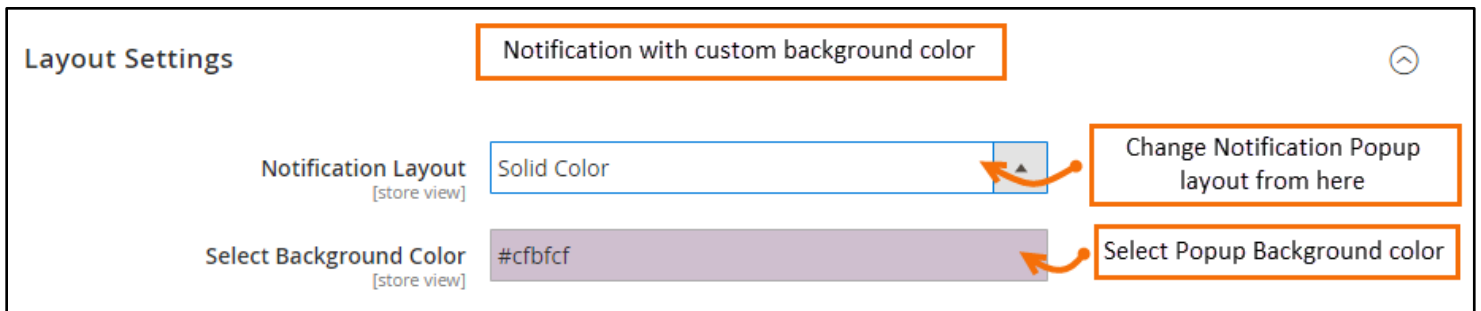

From notification layout, you can select predefined notification layout from below dropdown or can define your own.

By default, you have three options to give personalized touch to notification.

1. Select Custom Background color
2. Upload Custom Background Image
3. Select any template from predefined layouts

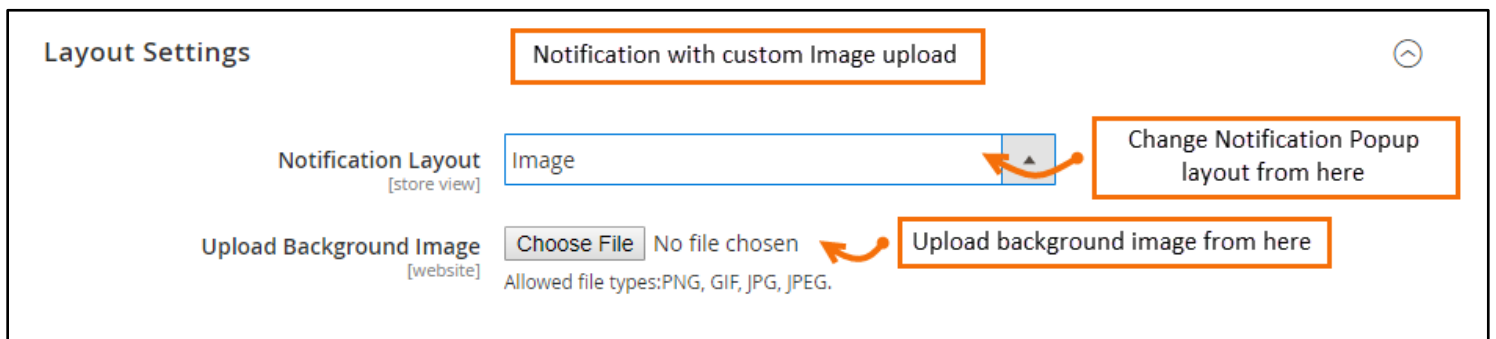

- **Notification with Custom Background Color**

You can pick a color using color picker to set custom background color to display in store frontend notification popup.

- **Notification Layout using Custom Image Upload**

You can also upload your own custom background image using file picker option available at below layout settings.

- **Notification Layout using Default Templates**

To give trendy look to recent sales notification popup you can pick any style from predefined templates.

#### 4. Recent Sales Notification in Frontend:

Once you save the configuration, you can see Recent Sales Notification enabled. Once visitors be online to your Magento store, they can see notification popup at regular interval. The notification popup includes recent orders details like customer name, location, product name and image. On click of product image, users get redirected to respective product page.

#### 5. Deactivation of Extension in Case of Emergency

- Go to **app** → **etc** → **config.php** and find '**Magecomp\_Recentsalesnotification**' => **1**, and replace 1 with 0.
- If something goes wrong, please contact us at <https://www.magecomp.com/helpdesk> or send us an email at [helpdesk@magecomp.com](mailto:helpdesk@magecomp.com)

#### 6. FAQs:

- **What if I get "Access denied" error after installation of the extension?**  
Whenever you get Access denied error while clicking on the extension tab after installation, log out admin panel and re-login.

Thank You!
