USER MANUAL

MAGEDELIGHT.COM

E: SUPPORT@MAGEDELIGHT.COM

## Welcome

We would like to thank you for purchasing the Product PDF Print Extension from Magedelight.com. This user guide will help you through the installation process and will also help you make the best use of this extension.

## License Key

After successful installation of the Product PDF Print Extension on your Magento store, first of all, you are required to configure the license key in the **admin configuration section**. You can set it from the following link:

**Admin > System > Configuration > MageDelight > Catalog Print Setting > License Configuration**. As shown in screen shot below:

You will find two text boxes asking for Serial Key and the Activation Key. You will be able to find these details in the email you received on purchase of this extension. See the screenshot below:

The screenshot shows the 'License Configuration' form. It contains two text input fields: 'Serial Key' and 'Activation Key'. Each field has a '[STORE VIEW]' dropdown menu to its right. Below each input field is a small instruction: 'Enter the serial key that you received at time of purchase.' and 'Enter the activation key that you received at time of purchase.' respectively.

## Product PDF Print Configurations

Product PDF Print configuration option will allow managing font style, font family, update PDF design, and many more options to customize Product PDF Print Extension.

## Indexer Configuration

### 1. QR codes indexer

QR Codes for the products in your database can be configured from this button. For the best performance of Product PDF Print, Keep the products index UPDATED.

## How to utilize cache management

Cache management for the PDF Product Print Extension improves its overall performance. To enable cache management, select the product PDF collections and the Product PDF Block HTML from the cache management table.

The screenshot shows the 'Cache Storage Management' interface. At the top right, there are two buttons: 'Flush Magento Cache' and 'Flush Cache Storage'. Below the buttons is a table with columns for 'Cache Type', 'Description', 'Associated Tags', and 'Status'. The table lists various cache types, most of which are currently 'DISABLED'. Two cache types, 'Product PDF Collections' and 'Product PDF Block HTML', are shown as 'ENABLED'.

Cache Type	Description	Associated Tags	Status
<input type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG	DISABLED
<input type="checkbox"/> Layouts	Layoutbuilding instructions.	LAYOUT_GENERAL_CACHE_TAG	DISABLED
<input type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	DISABLED
<input type="checkbox"/> Translations	Translation files.	TRANSLATE	DISABLED
<input type="checkbox"/> Collections Data	Collection data files.	COLLECTION_DATA	DISABLED
<input type="checkbox"/> EAV types and attributes	Entity types declaration cache.	EAV	DISABLED
<input type="checkbox"/> Web Services Configuration	Web Services definition files (api.xml).	CONFIG_API	DISABLED
<input type="checkbox"/> Web Services Configuration	Web Services definition files (api2.xml).	CONFIG_API2	DISABLED
<input type="checkbox"/> Product PDF Collections	Product collections for pdf processing.	PRODUCTPDF_COLLECTION_CACHE	ENABLED
<input type="checkbox"/> Product PDF Block HTML	Product block html for pdf document.	PRODUCTPDF_HTML_CACHE	ENABLED

**Table:** Now From the actions drop down menu at the top right hand side of the cache storage management table, select “ENABLE”, and then click the “Submit” Button. In case these options are not selected, each time the values will be fetched from the database instead of the cache.

## PDF Catalog Booklet

The PDF catalog booklet feature provided as part of the PDF Product Print helps you to print to print the entire PDF catalog of the products on your Magento store.

### HOW TO PRINT THE PDF CATALOG BOOKLET

From the backend of your Magento store, access “Catalog” from the Main Menu. Under the Catalog Menu, select **PDF catalog Booklet**. This will bring up the PDF catalog booklet screen.

This screen consists of a tree of all the products that your store consists of, neatly divided into categories and sub categories.

To proceed, select the appropriate store view, if your store view has multiple views. Next, select the categories for which you need the PDF booklet. Once you have selected the categories and the respective subcategories, then go ahead and click on “PRINT PRODUCTS” orange button at the top right hand corner.

This will bring you to a new screen which brings up an indicator with a green extending bar saying “Wait – Catalog is preparing.” Once the green bar completes, the catalog is ready for download. Click on the [Click Here To Download Catalog](#) link to download the catalog.

## Frontend Product PDF Print

Upon successful installation of this product, you will be able access this extension from the store frontend. If you desire a PDF printout of the product description, then simply follow the following steps.

1. Click on your desired product to bring it up on your screen.
2. This will display the product on your screen along with its related product description.
3. Next to the “Add to Cart” Button, you will find the “Print Product” Button.
4. Click on this button to generate the required PDF.
5. This action will call up the save file dialog box.
6. View or save the PDF file to your local disc.

### PDF Printout – Various Elements that are displayed

Depending upon the back-end settings, you may be able to view the following elements as part of your PDF printout:

1. QR Code for the product link
2. Add to Wish List
3. Add to Compare
4. Product Details
5. Additional Information
6. Related Product
7. Upsell Products
