WHY you need this extension?

Create and set rules for product tabs to display special information tabs on the selected products.

With help of our extension, These tabs configured with a set of rules can be displayed over chosen conditions on a product view page based on rules set by the Admin. You can provide additional information in separate tabs for a selected rules based products by using these functions.

The flexible configuration of rules and the content editor facilitate the use and organization of specific information for a related product view page or even for entire category of products to make Tab visible for those items listed under the category.

You can also set a time limit for Tab to make it visible for a limited time period. The Admin can also use the widget as Tab content and many other things. It also comes with options to select part of the website and group of customers where Tabs can be set to display.

This extension helps you to solve problems about different Tabs for a relevant product page. This will help the seller to provide additional information only visible for the related product view page. The customers can find it more convenient to get more information about the product they want to buy easily and organized without getting mixed with other categories.

HOW it works?

Enable Rule-Based Product Tabs

Sign in to Magento Admin panel and navigate to **Store** → **Configuration** → **Magediary** → **Rule-Based Product Tabs** → **General**, Here select **Yes** to enable and save it. If you select no then Tabs will not be visible on the frontend.

The screenshot shows the Magento Admin Configuration interface. At the top, the title "Configuration" is displayed. Below it, the "Store View" is set to "Default Config". A "Save Conf" button is visible in the top right corner. The left sidebar contains a list of configuration sections: GENERAL, CATALOG, CUSTOMERS, SALES, MAGEDIARY (selected), Rule-Based Product Tabs, SERVICES, and ADVANCED. The main content area shows the "General" tab for "Rule-Based Product Tabs". The "Enabled" dropdown menu is set to "Yes".

Add New Tab

Here we can create a new tab or manage existing tabs from the grid. Clicking on **Add New Tab** button will create a new entry.

The screenshot displays the 'Rule-Based Product Tabs' management interface. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area features a search bar, a notification bell with '5' alerts, and a user profile 'admin'. A prominent orange 'Add New Tab' button is located in the top right. Below this, there are controls for 'Filters', 'Default View', and 'Columns'. The text '2 records found' is displayed above a table. The table has columns for ID, Name, Tab Title, Start, End, Status, and Action. Two records are listed: ID 5 for 'Delivery Options' (Start: Nov 28, 2018, End: Dec 30, 2018) and ID 6 for 'Try-Buy' (Start: empty, End: empty). Both are 'Enabled' and have a 'Select' action. At the bottom, there is a pagination control showing '20 per page' and '1 of 1'. The footer contains the copyright notice 'Copyright © 2018 Magento Commerce Inc. All rights reserved.' and the version 'Magento ver. 2.2.5' with links for 'Account Activity' and 'Report an Issue'.

ID	Name	Tab Title	Start	End	Status	Action
5	Delivery Options	Delivery Options	Nov 28, 2018	Dec 30, 2018	Enabled	Select
6	Try-Buy	Try and Buy			Enabled	Select

Set Tab Information

After creating a new Tab, the following configuration will be displayed on the screen.

New Tab

Tab Information ✎

Enable Tab Yes

Tab Name * Delivery Options

Tab Title * Delivery Options

Websites * Main Website ?

Customer Groups * NOT LOGGED IN
General
Wholesale
Retailer

Here we can set some information about Tab.

Tab Name specifies the name of the related Tab for the backend purpose only.

Tab Title specifies the title of Tab which will be displayed on the frontend.

Websites determine parts of website where Tab will be visible on the frontend.

Customer Groups can be set for the audience to whom Tab will be visible on the frontend. Only selected groups can view this Tab configured in this section.

Set Priority, Time period and Content for Tab

Here you can set **From** and **To** fields to make Tab visible for a selected time period or leave blank for permanent display of Tab.

There are also options to **Discard subsequent tabs** and set **Priority**. The tabs are displayed in the order of the priority specified by the Admin.

Priority can be set in order of increasing numbers like 10>20>30...

Tab with high priority will be displayed first over Tab with less priority number.

New Tab

From: 11/29/2018

To: 12/31/2018

Discard subsequent tabs: No

Priority: 10

Tax: Applicable tax on the basis of exact location & discount will be charged at the time of checkout
 100% Original Products
 Cash on delivery might be available
 Easy 30 days returns & 30 days exchanges
 Try & Buy might be available
 magento widget

In the **Content** area, you can add content to display in Tab. You can also use the widget as tab content.

Set Conditions for Tab

In this section, the user can set conditions for the associated tab.

By configuring this section, you can set different kinds of rules like show tab for such

- category
- attribute set
- particular product attributes
- skus
- etc...

Please note that Tab is only displayed if the conditions are met.

New Tab

Path: p

Conditions

Conditions (don't add conditions if rule is applied to all products)

If **ALL** of these conditions are **TRUE** :

- Attribute Set is **Bag**
- Category is **3, 4**

WHAT are the benefits?

- Set Tabs based on predetermined rule conditions to show up on a selected rules for a product.
- Best way to provide additional product related information via Tabs to the customers.
- Admin can easily set Tab rules from the backend with ease and modify it.
- Tabs can be set to visible for targeted audiences like General, Wholesale or Retailer customer group or to specific websites.
- Rules can also be set to apply for a certain area of the website to make Tabs visible only on those parts of the website.
- Make Tabs visible for a limited time period set by the Admin or for permanent. This feature allows providing information for time-limited events about a product to the customers.
