

INSTALLING MAGENTO 2 EXTENSION OVER SSH (TERMINAL)

Before installation

Download extension and move folders from archive to your Magento 2 root directory.

1. Connect to your magento webserver using ssh

To do this, run the following command in the terminal and enter user password (**please skip this step if you're installing expansion on the local machine**):

```
ssh username@domain.com
```

2. Change your current directory to Magento 2 web root directory

Run command:

```
cd /full_path_to_magento2
```

3. Start setup process

Run command:

```
php bin/magento setup:upgrade
```

4. Run the single-tenant compiler

Run Command:

```
php bin/magento setup:di:compile
```

5. Deploy static view files

Run Command:

```
php bin/magento setup:static-content:deploy
```

6. All done

Good job!

Now you can navigate to your magento 2 admin panel and start configuring your extension. :-)
